

Ecology seminar

Agroecology, University of Göttingen (Prof. Dr. Teja Tscharntke)

Venue: Seminarroom L 318, Grisebachstrasse 6, third floor

Time: Wednesday 10:15 - 11:45 am

Summer semester 2018

Date	Name	Title
11.04.2018	Dr. Yvonne Fabian (Agroecology, University of Göttingen)	Pollinator and bio-control communities and their food webs under environmental change
18.04.2018	Lukas Egli (Helmholtz Centre for Environmental Research - UFZ Department of Ecological Modelling, Leipzig)	Winners and losers of national and global efforts to reconcile agricultural intensification and biodiversity conservation
25.04.2018	Lisa Brünjes (Agroecology, University of Göttingen)	Faba bean genotypes differ in their contribution as pollen donor to cross-fertilized seed
02.05.2018	Dr. Kevin Darras (Agroecology, University of Göttingen)	Sampling Biodiversity with sound
09.05.2018	Emmeline Topp (Agroecology, University of Göttingen)	Integrating Biodiversity into Global Agricultural Supply Chains
16.05.2018	Prof. Dr. Frank Wätzold (Brandenburgische Technische Universität Cottbus)	An ecological-economic modelling procedure to determine effective and cost-effective payments for measures to conserve endangered grassland species
23.05.2018	Assoc. Prof. Dr. Johann Zaller (University of Natural Resources and Life Sciences, Institute of Zoology, Vienna)	Pesticides - what do we really know about their non-target effects?
30.05.2018	Clara van Waveren (Ecosystem Modelling, University of Göttingen)	BEEHAVE/BEESCOUT - Two connected individual-based models to evaluate agri-environmental means for pollinators at a landscape scale
06.06.2018	Dr. Patrick Weigelt (Biodiversity, Macroecology & Biogeographie, University of Goettingen- tba)	A global inventory of floras and traits and the macroecology of island floras
13.06.2018	Jan Grossarth (FAZ journalist, Frankfurt)	Metaphors and cultural symbols in German agroecological discourses – explosive agents or bridges over ideological ditches?
20.06.2018	Prof. Dr. Heinz Müller-Schärer, Département de Biologie/Ecologie & Evolution, Université de Fribourg (CH)	Benefits and risks of biological control of the invasive, allergy-inducing common ragweed in Europe
27.06.2018	Prof. Dr. Tobias Plieninger (Social-Ecological Interactions in Agricultural Systems, Universities of Kassel and Göttingen):	European wood-pastures in transition – A social-ecological approach
04.07.2018	Dr. Martin K. Obrist (Swiss Fed. Res. Ins. WSL, Switzerland)	Listening to the inaudible - challenges and promises of eavesdropping on bats
11.07.2018	Annemarie Wurz (Agroecology, University of Göttingen)	Vanilla and biodiversity – a win-win situation for North-Eastern Madagascar?
