

# Ecology seminar

Agroecology, University of Göttingen (Prof. Dr. Teja Tschardt)

Venue: Seminar room L 318, Grisebachstrasse 6, third floor

Time: Wednesday 10:15 - 11:45

## Winter semester 2018/2019

Date	Name	Title
17.10.2018	Felipe Libran (Agroecology, University of Göttingen)	Plant-pollinator mutualistic networks in fragmented calcareous grasslands
	Sandra Schweiger (Agroecology, University of Göttingen, MSc thesis)	Effects of flowering crops on resource utilisation and colony growth of bumblebees
24.10.2018	Prof. Dr. Carola Paul (Forstökonomie & nachhaltige Landnutzungsplanung, Universität Göttingen)	Land-use diversification and economics – a win-win relationship?
07.11.2018	Manuel Toledo (Agroecology, University of Göttingen)	Hand pollination as a sustainable strategy to improve cocoa yields and farmers' income
14.11.2018	Prof. Dr. Andreas Schuldt (Waldnaturschutz, Universität Göttingen)	Multidiversity and multifunctionality in biodiverse subtropical forests
21.11.2018	Prof. Dr. Reimund Rötter (Tropischer Pflanzenbau und Agrosystem Modellierung, Universität Göttingen):	Effects of climate change and related weather extremes on agricultural production around the globe
28.11.2018	Dr. Thomas Möckel (Grünlandwissenschaft und Nachwachsende Rohstoffe, Universität Kassel)	Remote sensing in grassland ecosystems
	Arne Wenzel (Agroecology, University of Göttingen)	Effects of urbanization on agricultural biodiversity in Bangalore, India
05.12.2018	Nicole Beyer (Agroecology, University of Göttingen)	The effect of diversified crop rotations with field beans ( <i>Vicia faba</i> ) on pollinators.
12.12.2018	Dr. Urs Kormann (Bern University of Applied Sciences, Switzerland)	Herbicides and trophic interactions shape biodiversity-profit relationships in intensively managed forests
09.01.2019	Dr. Olga Heim (Institute of Biochemistry and Biology, Universität Potsdam)	European bats in agricultural landscapes
16.01.2019	Dr. Nadja Simons (Department of Ecology and Ecosystemmanagement, TU München)	More than just (dead) wood - Ecosystem services in managed forests
23.01.2019	Prof. Dr. Ralf Seppelt (Department Computational Landscape Ecology, Martin-Luther University Halle-Wittenberg)	Reconciling food security and biodiversity conservation: Understanding a mutual relationship
30.01.2019	PD Dr. Jan Habel (Department of Ecology and Ecosystem Management, TU München)	Butterfly observations over 200 years - The relevance of time series in nature conservation biology
