

The Division of Microbiology and Animal Hygiene,
Georg August University Goettingen, Germany will organize

2nd International training course on the rapid point of need molecular system for the detection of emerging and endemic pathogens

The course will include lectures on point-of-care tests, isothermal amplification technology, recombinase polymerase amplification (RPA) assay, sequencing at point of need and mobile laboratory at site of an outbreak. The practical part will include training on the methods of extracting the nucleic acid at point of need (SpeedXtract), RPA oligonucleotides design and RPA data acquisition and evaluation.

When?

September 18-22, 2017

Where?

Division of Microbiology and Animal Hygiene, Georg August University Goettingen,
Burckhardtweg 2, 37077, Goettingen, Germany

Registration fees?

- 590 Euro for Academics and 1200 Euro for Industry
- The registration fee does not include airfare, accommodation or other costs.
