- Diploma Political Sciences, Institute for Advanced Studies, Vienna 1983
- Habilitation in Forest Policy and Regional Planning, University of Bodenkultur, Vienna 1988
- Assistant Professor for Forest Policy, University of Bodenkultur, Vienna 1988 – 1994
- Professor for Forest Policy and Nature Conservation Policy, University of Göttingen since 1995

Major Research Interests:

Topic I National and International Forest Policy

We conduct analytical forest policy analysis with the focus on policy instruments, public administration, media discourse, forest development policy, community forestry and international forest regimes.

Topic II National and International Nature Conservation Policy

The focus of analytical policy research in nature conservation is government and governance for nature conservation especially Biodiversity in Germany.

Topic III Policy of Science and Knowledge Transfer

The main research fields are management and evaluation of interdisciplinary research programs and institutions. The knowledge transfer analysis deals mainly with the science /policy interfaced in environmental issues.
