	Sunday	Monday		Tuesday		Wednesday	Thursday	
8:30-8:55				Theory I	**Nagata:** Molecular modeling of interfacial water	Excursion Day	Theory II	**Tremblay:** Irreversible Tautomerization in Porphycene on Cu(111) Induced by Scanning Tunnelling Microscopy
8:55-9:20		Photoelectrons at Surfaces			**Oberhofer:** Simulating photo-electrocatalytic reactions beyond the computational hydrogen electrode			**Stecher:** First-principles free-energy barriers for photo-electrochemical surface reactions
9:20-9:45			**Zacharias:** Photoelectron spectroscopy at surfaces		**Tonner:** Surface chemistry for organic-inorganic interfaces - a quantum chemical perspective			**Li ZY:** From Kinetics to Mechanisms via Multiscale Simulations
9:45-10:10			**Siefermann:** Ultrafast photoemission electron microscopy in materials science		**Meng S:** Excited State Quantum Electron-Nuclear Dynamics in Condensed Matter			**Kristoffersen:** Solid-liquid interfaces for electro-chemistry
10:10-10:40		Coffee Break						
10:40-11:05		Surface Physics	**Zhou L:** Spectral splitting, molecular symmetry, and orientations at air/aqueous interfaces	Surface Physics	**Hagemann:** Generation and detection of chemicurrents in gas-surface reactions		Molecular Beam Surface Scattering	**Harding:** Dynamics and kinetics of model catalytic reactions on surfaces
11:05-11:30			**Flege:** In situ low-energy electron microscopy of inverse model catalysts		**Engelhart:** Electron induced changes in reflectance and surface morphology of polyimide films			**Schäfer:** State-to-state molecular beam surface scattering of diatomic molecules
11:30-11:55			**Jiang Y:** Photo-induced Carrier Dynamics of Single Defects on TiO2(110) Surface		**Wei X**: Heterodyne 2D SFG for interfacial molecular structure and charge dynamics at material interfaces			**Bünermann:** Inelasticity in H atom scattering from surfaces
11:55-12:20			**Qi JB**: A New Type of Powerful THz Emitter		**Gierz:** Dynamical band structure engineering of low-dimensional solids			**Park:** State-to-state scattering of formaldehyde from Au(111)
12:20-14:00		Lunch						
14:00-14:25		Nanostructures at Surfaces	**Brida:** Sub-cycle Phase Control of Electron Tunneling in an Optical Nanoantenna	Liquid Interfaces	**Gekle:** Dielectric properties of interfacial water		Surface Physics	**Valtiner:** Quantification of Single Molecule Interactions at Electrified Interfaces
14:25-14:50			**Jiang H:** Dynamics of H Atoms Scattering from Epitaxial Graphene at Zero Surface Coverage Limit		**Tian CS:** Unveiling Microscopic Structure at Charged Water Interface			**Cui XF:** Excitons on Metal Surfaces
14:50-15:15			**Papp:** Surface chemistry of nanoclusters		**Deng GH:** Enhanced Water Structure on Hydrophobic Surfaces in Concentrated Alcohol-Water Solutions			**Zhang WT:** Looking Into Cuprate High Temperature Superconductors
15:15-15:40			**Kong XQ:** The Applications of Solid State NMR in Porous Materials		**Mezger:** X-ray reflectivity studies of ionic liquids at interfaces			**Schäfer:** Nanoscale dynamics mapped by ultrafast transmission electron microscopy
15:40-16:10		Break						
16:10-16:35		Time Resolved-Dynamics	**Kumar:** Time resolved studies of vibrational relaxation dynamics of small molecules	Physics and Chemistry at TiO2 Surfaces	**Liu WT:** Nonlinear Optical Studies of Oxide Surfaces		**Closing Remarks**	
16:35-17:00			**Backus:** Towards understanding the mechanism of water splitting on TiO2		**Ren ZF:** Probing the Adsorption Structure of Small Molecules on TiO2(110) by Surface Sum Frequency Generation Spectroscopy			
17:00-17:25			**Li:** Vibrational dynamics of adsorbed molecules at solid surfaces		**Zhou CY:** Electronic Structure at TiO2 Interface			
17:25-17:50	Arrival		**Meng JQ:** Time-Resolved and Angle-Resolved Photoemission Spectroscopy					
18:00-19:00	Reception	Dinner		Barbecue		Conference Dinner		
19:00-19:15	**Chen Lesheng:** Opening Remarks							
19:15-19:45	**Auerbach**							
19:45-20:15	**Wodtke:** Future Directions of Surface Dynamics
