Empirical evidence shows that economic growth has a varying impact on poverty reduction. Poverty falls less with growth when the distribution of income worsens than when it remains unchanged or becomes more progressive. Understanding the distributional consequences of growth and how they are affected by poverty, as exemplified in this book, is therefore essential to the analysis of development.’ - François Bourguignon, Vice-President and Chief Economist, The World Bank

‘The detailed case studies in this excellent volume, from Africa, Asia and Latin America, will prove useful to researchers as they debate the best methods for analysing pro-poor growth and to policy-makers as they debate alternative policy packages to get pro-poor growth.’ - Ravi Kanbur, T. H. Lee Professor of World Affairs, Cornell University

‘Pro-poor growth lies at the heart of successful development strategies. By dissecting the distributional impact of alternative policies, this book provides an invaluable guide to understanding the key ingredients of a pro-poor growth programme.’ - Anthony Shorrocks, Director, World Institute for Development Economics Research, United Nations University

Pro-poor growth is considered central for achieving sustainable poverty reduction and the Millennium Development Goals. This volume analyzes determinants of pro-poor growth in eight countries. It employs advanced methods and tools for pro-poor growth research, including ex post analytical tools as well as ex ante simulation methods, highlighting the strengths and limits of this methodological toolbox. The book places particular emphasis on the role of regional inequality, price and policy reforms as well as political economy issues affecting pro-poor growth at the country level. It also analyzes the impact of agricultural, labour market policies, macroeconomics and natural resource policies.

MICHAEL GRIMM is Professor of Economics at the University of Göttingen, Germany.

STEPHAN KLASEN is Professor of Economics at the University of Göttingen, Germany.

ANDY MCKAY is Professor of Economics at the University of Sussex, UK.
