(online course for continuing education)
Degree: 'Master of Science' (M.Sc.) in Information Systems

Please visit this site for further detailed information on the programmes offered
www.economicsciences.uni-goettingen.de/studying.

There you will also find the contact details of the programme organisers as well as information on the Faculty's and University's attractive offers for study and internships abroad (for example ERASMUS and exchange programmes with the University of California and universities in South Africa, Latin America, Russia, and South Korea). Especially in our Master's Programmes do we offer more and more modules in English.

All of our programmes of study are officially accredited by the ZEvA or are currently in the accreditation process (Business and Human Resource Education). The programmes at the Faculty of Economic Sciences are additionally characterised by a modern infrastructure, high-quality equipped seminar rooms and the modern library for Economic and Social Sciences. These excellent conditions for studying have been confirmed by the top placement in the current CHE university ranking.

Transfer of Knowledge

At the centre of our Faculty's knowledge transfer activities are consulting services for businesses, government departments and international organisations as well as expertise provided to courts of law and other decision-making bodies. We also offer optimisation of teaching and learning modules for initial and continuing occupational and professional education and training. We foster the transfer of knowledge by holding lectures, conferences, seminars, and series of interdisciplinary lectures at home and abroad as well as in business and summer schools.

In addition, our Faculty participates in various international research cooperation and partnerships. International researchers are regular guests who expand the offers for research and teaching at the Faculty. Members of the Faculty of Economic

Sciences are always interested in cooperation with businesses and non-profit organisations. Possibilities for cooperation extend from guest lectures and joint seminars to conducting joint studies and research projects as well as the possibility of financing for doctoral positions and Chairs to filling teaching positions and adjunct professorships.

Alumni Göttingen

It is important to us at the Faculty to stay in contact with our students after they have finished their degrees. The alumni work of our Faculty is conducted through Alumni Göttingen, the international network of former students, graduates and students of all subjects, researchers and academics, employees as well as friends and promoters of the University of Göttingen. The alumni club has more than 3,500 members in the meantime and enables the continual and lively participation in and active contribution to the development of the Georgia Augusta.

Detailed information can be found at:
www.alumni.uni-goettingen.de

The Faculty of Economic Sciences

The Faculty of Economic Sciences is the third largest of the 13 Faculties of the University of Göttingen – an internationally renowned research university with an emphasis on research-based teaching. In 2007 the University of Göttingen achieved success with its institutional strategy "Göttingen. Tradition – Innovation – Autonomy" in the Excellence Initiative by the German Federal and State governments.

Ever since its foundation in 1737 the Georg-August-Universität has educated students in the fields of economic sciences. Today the Faculty of Economic Sciences is one of the largest of its kind in Germany. 28 professors and around 100 academic staff instruct about 3200 students enrolled at the Faculty. Our full-time academic staff is supported by honorary professors and adjunct lecturers, especially in teaching.

The Faculty of Economic Sciences

The Faculty of Economic Sciences at Georg-August-Universität Göttingen was one of the first German universities to completely restructure its single-tier diploma programmes into a two-tiered Bachelor's and Master's system, starting in the winter semester of 2005/2006. The programmes fulfil the requirements for international recognition of the acquired degree and secure a high standard of education. The programme structures, programme contents, teaching and learning methods of the Faculty are innovative and goal-oriented with small groups, project and practical seminars as well as research-oriented offers, especially in the Master's programmes. The Faculty of Economic Sciences is renowned for offering a large variety of

specialisations in research and teaching: Business Administration (including Business Information Systems), Economics, Business and Human Resource Education as well as Economic and Social History – all complemented by the empirical subjects of Statistics and Econometrics. Our research and teaching opportunities are enriched by collaborations with researchers in the neighbouring disciplines of Agricultural Economics, Forest Economics, Social and Economic Psychology, and Economic Geography.

Strengths in Research

Research conducted at the Faculty of Economic Sciences in its core subjects – Business Administration and Economics – focuses on research in "Governance", "Integration and Development", and "Marketing and Channel Management". Cross-sectional areas are Business Information Systems, Business and Human Resource Education, Economic and Social History as well as the area of Statistics and Econometrics.

In addition to the various international partnerships maintained in the area of research, many externally-funded research projects have been procured in recent years.

Researchers of the Faculty of Economic Sciences are involved in the new decision-making structures of the University as a result of the Institutional Strategy ("Zukunftskonzept") that succeeded in the Excellence Initiative, including the Göttingen Research Council (GRC) and University Research Committee.

More information is available in the Internet:
www.economicssciences.uni-goettingen.de/research
www.graduiertenschulen.uni-goettingen.de

The Faculty also offers structured doctoral programmes that greatly contribute to its research profile. Doctoral studies are conducted interdisciplinarily with other Faculties (Faculty of Agricultural Sciences, Faculty of Forest Sciences and Forest Ecology, Faculty of Law, and the Faculty of Social Sciences) and are combined in the Göttingen Graduate School of Social Sciences (GGG).

Research Centres

The Faculty currently has two interdisciplinary research centres: The Centre for European, Governance, and Economic Development Research (cege) and the Courant Research Centre "Poverty, Equity and Growth in Developing and Transition Countries" that was founded during the Excellence Initiative.

Centre for European, Governance, and Economic Development Research (cege)

Platz der Göttinger Sieben 3 · 37073 Göttingen
