

Georg-August-University Göttingen

Master Program „Crop Protection“

Module M.Cp.0018: Journal Club on New Topics in Crop Protection

**Contents, Objectives**

**Contents:** Methods will be presented how to collect and read scientific literature dealing with a specific topic. The composition and structure of scientific publications, methods and ways of presentation and proving ideas are studied using specific examples. Criteria for quality assessment are applied.

**Objectives:**

Students learn how to assess and discuss a scientific subject in crop protection: They will be able to give written and oral presentations of a scientific paper and to critically judge the didactic, structure and scientific content and correctness of a scientific paper.

3 C/2 H PER SW

Lecture and Seminar

Examination: Presentation (15 minutes) and written summary of a scientific topic, based on literature study (3 pages), participation in discussion

Examination prerequisite: Participation in the seminars

**Type of module:** Compulsory module

**Entrance requirements** None

**Frequency** Summer

**Duration** One semester

**Language** English

**Number of students** 20

**Coordinators**

Prof. Dr. von Tiedemann, Dr. S. Weigand
