

## MASTER THESIS IN THE QUALITY OF ANIMAL PRODUCTS RESEARCH GROUP

**Do you like to read and review?  
Are you interested in pork production?  
Do you want to be a part of a EU-project?**

IPEMA (Innovative Approaches for Pork Production with Entire Males) is a COST action (CA152125) supported by the European Union. The aim of the action is to find general, region-specific or chain-specific solutions to facilitate the development of

### ALTERNATIVES TO SURGICAL CASTRATION OF PIGLETS

taking into account Meat quality, Animal Welfare, Management and Production costs, Acceptance by stakeholders, Consumers and citizens.

The Master thesis will be focused on reviewing the labelling strategies and regulations adopted by the various European Countries towards all those products deriving from immunocastrated pigs.

The outcomes of this review will be essential not only to take stock of the situation but also to establish among the EU countries common guidelines regarding the labelling requirements for this type of products.

During the Thesis, you will be active part of the project and you will be in contact with some of the research groups participating to the action in order to collect all the necessary information.

**WE WANT YOU!**
