You will be forwarded to the following window:

The remote-app will be downloaded by a simple click (no double click) on the desired application.

Then you will find the remote desktop file in your download folder.

Download folder in the **dock**:

Open the downloaded .rdp file:

In the following window you have to enter your user data again, which you used to logged on to the server before (<u>https://cip-app.wiso.uni-goettingen.de/RDWeb/</u>). It is **not possible** to open the programs with **another user!** The same user must be used for both logins!

for the login use **GWDG\username** or **UG-STUDENT\username** and your **password**. The first login can take several minutes.

Please log out as follows to ensure the functionality of the applications

Establishment connection with Firefox

To get connected with the remote desktop app is an existing VPN connection required. Instructions can be found on the GWDG website:

https://info.gwdg.de/docs/doku.php?id=de:services:network_services:vpn:anyconnect

Open the following link in Safari: https://cip-app.wiso.uni-goettingen.de/RDWeb/

for the login use **GWDG\username** or **UG-STUDENT\username** and your **password.** (UG-STUDENT and GWDG are the domains, which are unlocked for the Access.)

Connect local folders

To be able to access your local folders while using the remote desktop apps, you can integrate them like the folliwng:

Select "Preferences" and "General" go te the option "If folder redirection is enabled [...]" "Choose Folder" There you are able to select the folder that you also want to access from the server.
