

Your future in safe hands

To support our team we are currently seeking an

Environmental Fate Scientist (m/f) Ref. No. 2012-27/HP

Role and responsibilities:

- ▶ Provide expert environmental fate advice to clients and colleagues
- ▶ Report results in compliance with registration requirements for agrochemicals
- ▶ Prepare assessment reports and dossiers for the regulatory authorities
- ▶ Monitoring, evaluation and review of studies
- ▶ Close communication and cooperation with our customers and the relevant authorities
- ▶ Build-up, maintain and share practical knowledge in a growing, strongly team-oriented working group

Benefits:

You will be working in an innovative, internationally active organization in a strongly team-oriented working group with a high degree of responsibility and independence. Intensive on-the-job training will be provided in a competent multidisciplinary team.

Location: Leverkusen, Germany or Cardiff, United Kingdom

Profile and qualifications:

- ▶ University degree in Environmental Science, Agricultural or Biology or equivalent; PhD would be a benefit
- ▶ At least three years of experience in dossier writing for crop protection products and/or with environmental fate laboratory studies
- ▶ Sound knowledge of international regulatory guidelines
- ▶ Good interpersonal skills and the ability to manage complex projects to tight deadlines
- ▶ Strong motivation with excellent communication, organizational and presentation skills
- ▶ Very good language skills in English (spoken and written); additional language skills would be an asset. In addition if the location will be Leverkusen: very good language skills in German (spoken and written)
- ▶ Self-motivated with the ability to work in a team

Dr. Knoell Consult GmbH was founded in 1996 in Mannheim, Germany, with offices in Mannheim, Leverkusen, Berlin and Wageningen (NL) as well as subsidiaries in Basel (CH), Cardiff (UK), Bristol (UK), Shanghai (CN) and Chiang Mai (TH). With more than 300 employees, we offer independent consultancy to the Agrochemical, Chemical and Pharmaceutical Industries. Our main focus is registration of agrochemicals, biocides, industrial chemicals and pharmaceuticals. Our services include the evaluation of data completeness, compilation and assessment of raw data, preparation of risk assessments and dossiers for submission to the relevant authorities.

Please submit your complete application in English or German, including a detailed Curriculum Vitae, salary expectation and availability to:
