REGISTRATION: TWO-FACTOR AUTHENTICATION – EU LOGIN APP

Register a device (EU Login app)

Before registering the mobile device, please look for the EU Login mobile app in Google Play or App Store, depending on your device operating system, and have it installed in the device.

| Minimum Version | OS | Version |
|-----------------|--------------------------|--------------------------------|
| | Android min. SDK version | 24 or Android 7.0, Marshmallow |
| | iOS deployment target | 12.0 |

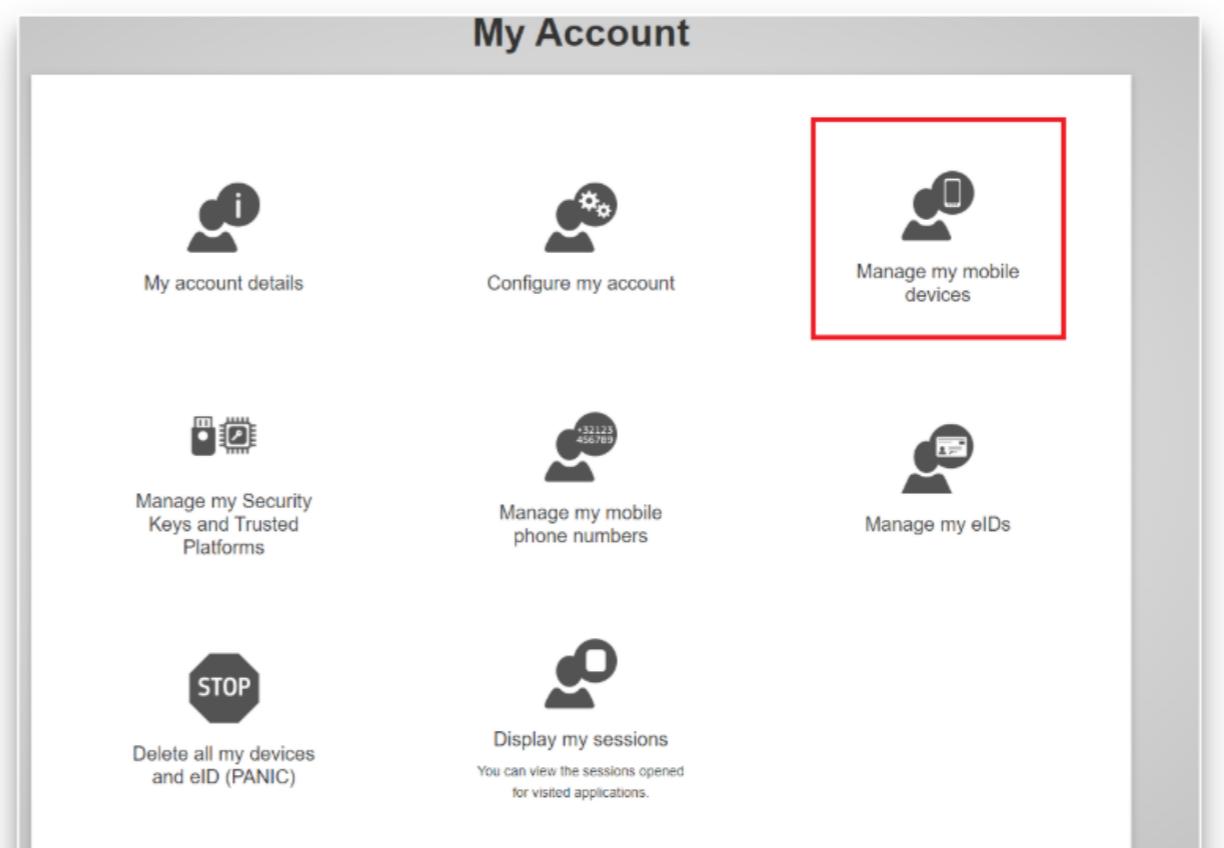

iOS/iPadOS additional step

When using iOS/IPadOS you need to accept all authorization requests for the EU Login App after installing it ([settings / applications](#) and allow everything for the EU Login App)

You will use this option to register, typically, a smartphone, but you can also register a tablet.

- 1 Access your EU Login account.

After having the app installed on the device, access your EU Login Account on the Portal (by clicking on your profile avatar on the Portal and selecting **My Account**), click on **Manage my mobile devices**.

REGISTRATION: TWO-FACTOR AUTHENTICATION – SECURITY KEY

Register a security key / trusted platform

You can register a security key or trusted platform.

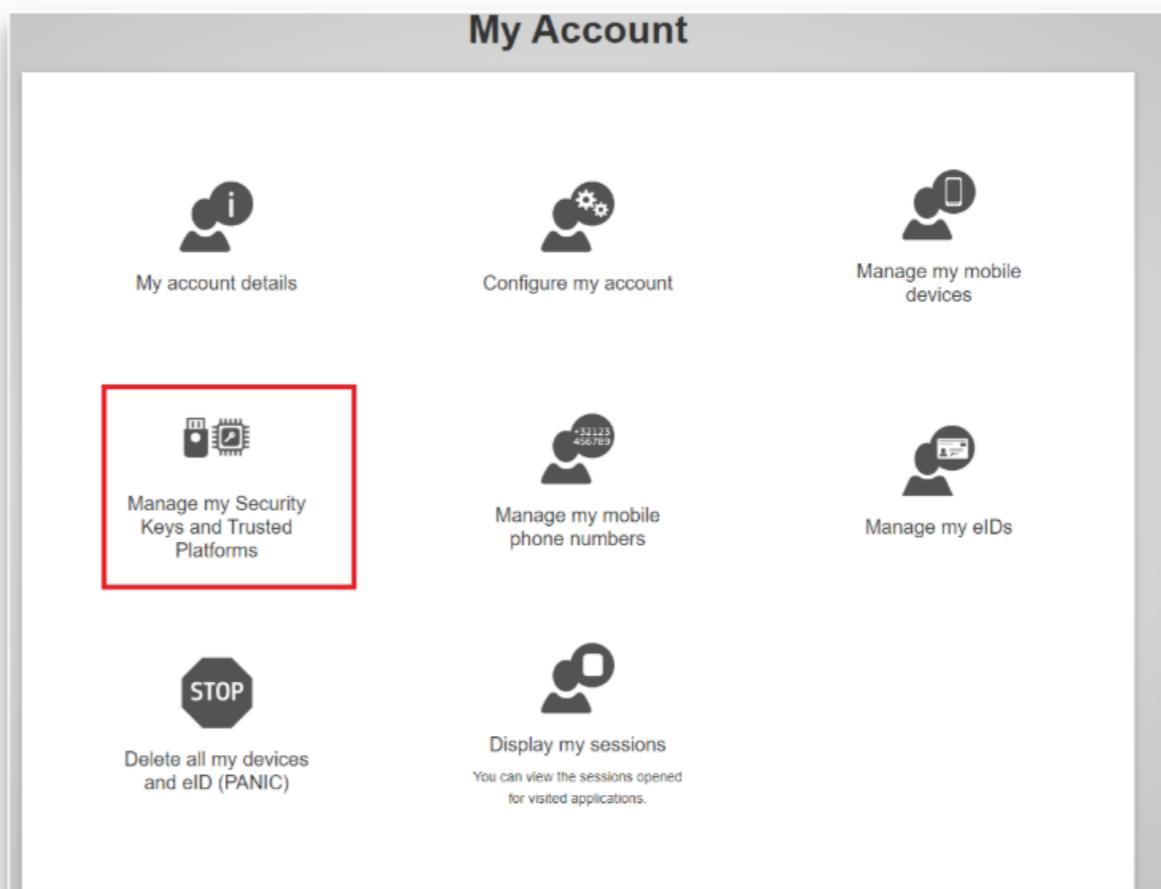

The security key is a USB key that you insert in the pc and that will act a second factor. There are different options on the market and the only prerequisite is that the security key needs to be compliant with before purchasing).

You can also register your pc as trusted platform and use it as second factor if it has a trusted platform module (TPM), a specialized security chip available in most modern PCs. You know that your PC contains solutions, such as a touch-ID, an area where you place your finger to gain access to the pc based on your previously registered fingerprint, or other means such as facial recognition. An example using TPM w PIN authentication, you can use it even if the pc does not have touch-ID nor other biometric solutions. The equivalent for TPM in MACs is called secure enclave.

To use this last option, you will need to have configured the biometric access or Pin code access in your pc first. When registering the trusted platform, EU Login will detect the TPM and ask you to use it as tru:

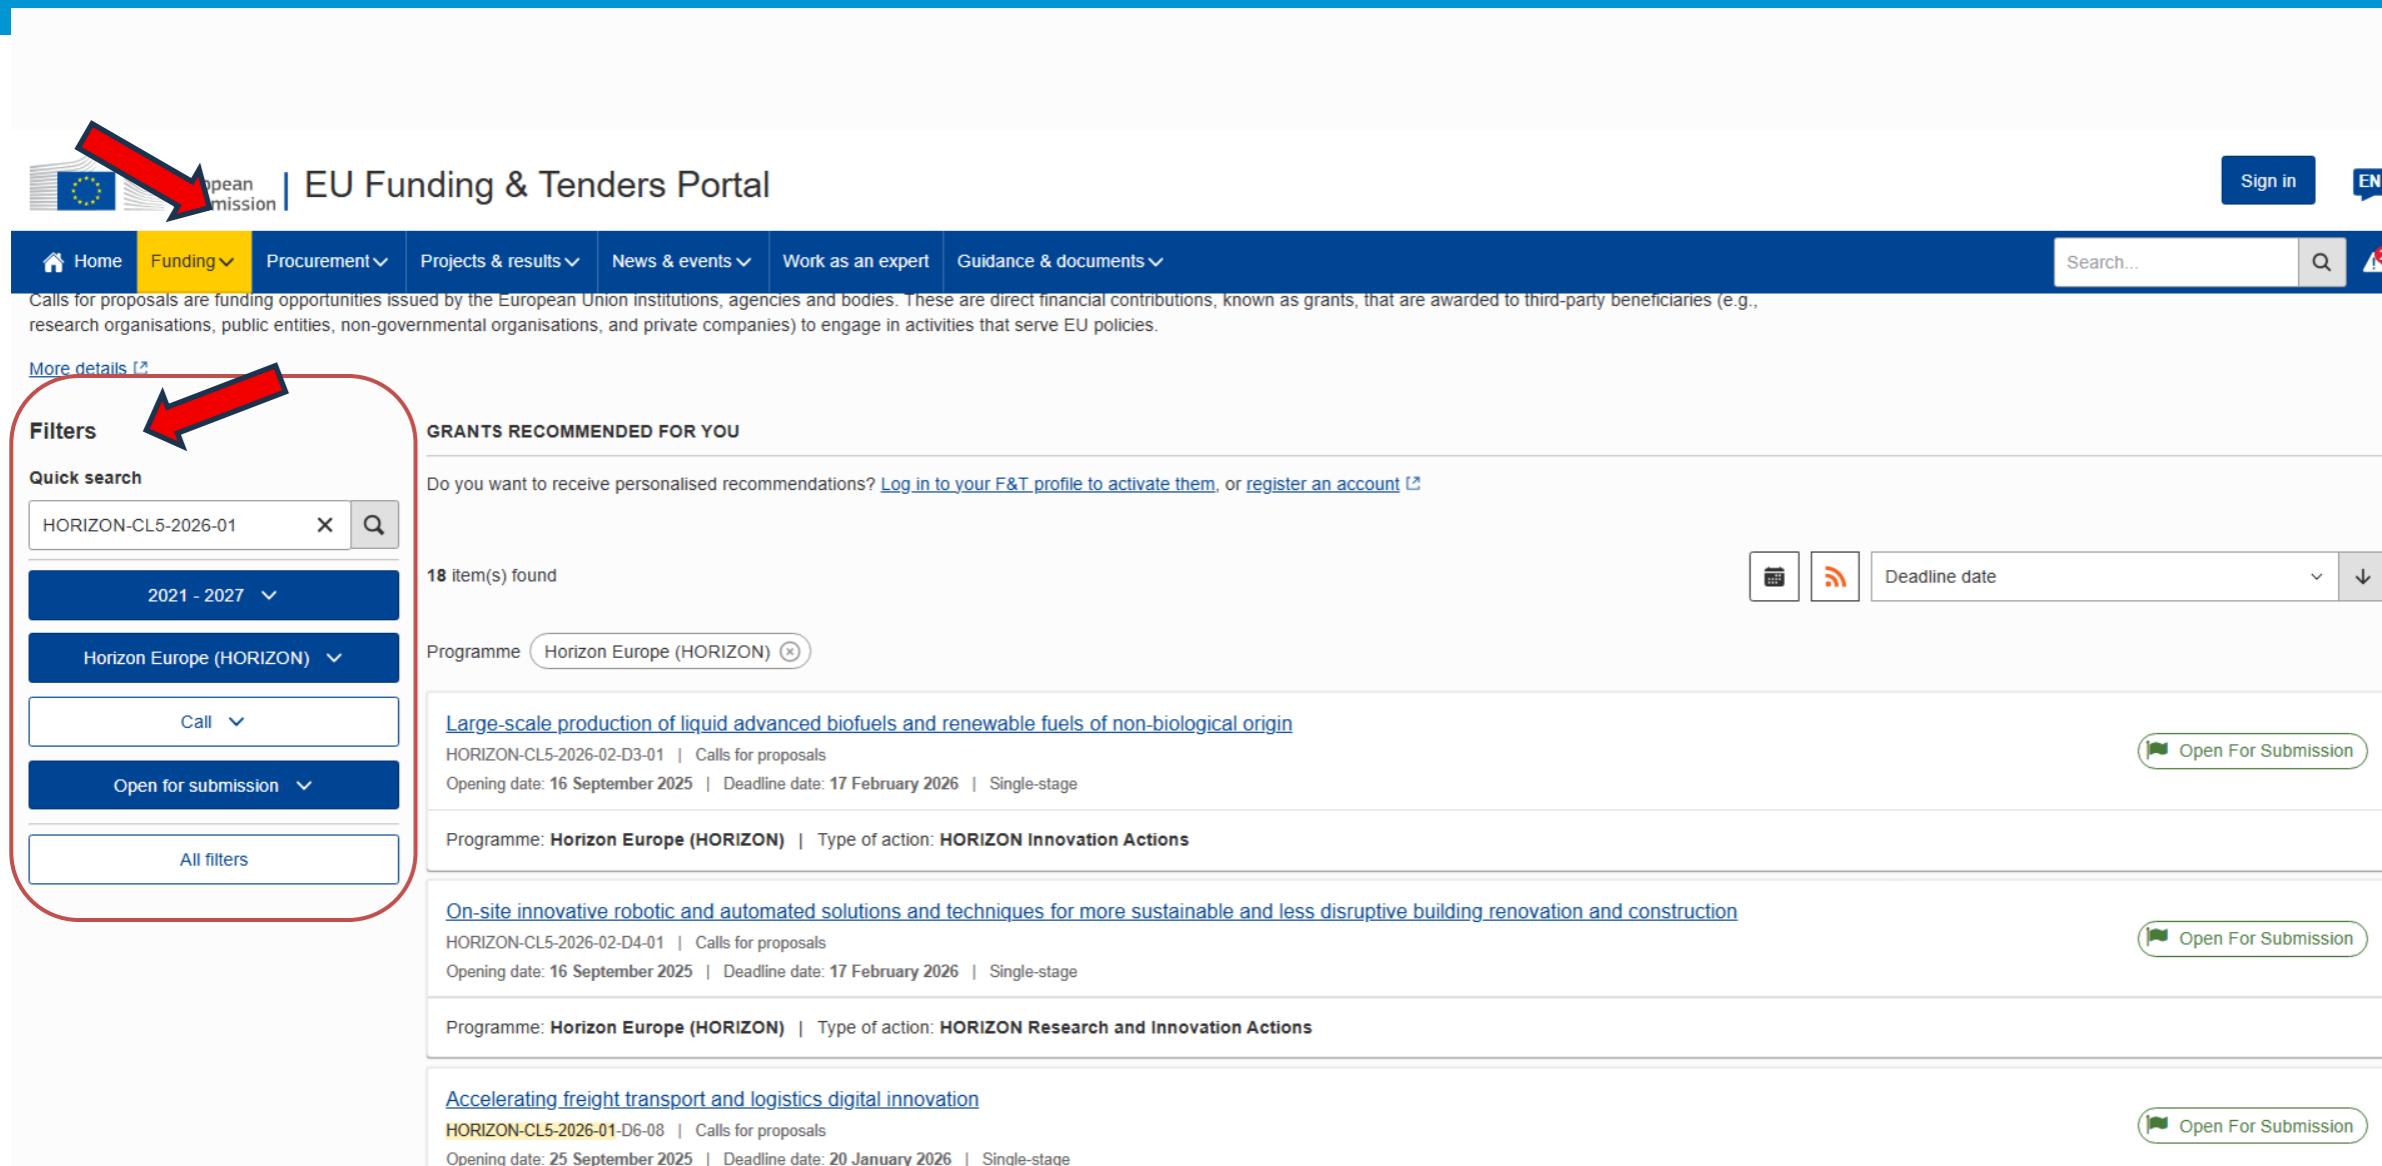

- 1 Access your EU Login account.

Access your EU Login Account on the Portal (by clicking on your profile avatar on the Portal and selecting **My Account**), click on **Manage my Security Keys and Trusted Platforms**.
