

Student assistants needed / Studentische Hilfskraft (m/w/d) gesucht

Student assistants are needed for investigating the effects of light and nutrient availability on growth and biomass partitioning of seedlings of different species. The study is a part of the RTG 2300 [*"Enrichment of European beech forests with conifers: impacts of functional traits on ecosystem functioning"*](#) subproject 8 [*"Resource availability and seedling establishment"*](#). The facilities are located at the Department of Silviculture and Forest Ecology of the Temperate Zones and the Experimental Botanical Garden. The offered contract is from October 1 – December 31. Two 40 h/month positions are available. Working hours are flexible, but have to be regular.

Tasks include:

- picking leaves and needles,
- packing and labelling samples,
- destructive seedling harvest,
- washing and weighing the samples,
- scanning the leaves and needles.

Requirements:

- English proficiency to communicate the tasks with the responsible doctoral student,
- positive attitude, patience and self-motivation to carry out uniform tasks for a prolonged period of time.

Contact: Please apply by email with a letter of motivation and CV to Ieva Bebre, ieva.bebre@uni-goettingen.de by August 30.
