

Your future in safe hands

To support our team, we are currently seeking a

Regulatory Toxicology Expert (m/f) Ref. No. 2013-02

Role and Responsibilities:

- ▶ Act as a fully accountable interface for assigned products between Laboratory, Experimental Toxicology, Regulatory Affairs and Human Safety Groups. Organise the generation, compilation and documentation of the toxicology data and study results, including organising the response to regulatory authorities
- ▶ Achieve the required goals for assigned projects and products by working closely with other project teams
- ▶ Resolve scientific issues related to toxicology and risk assessment for products in development and product defence

Profile and Qualifications:

- ▶ Ph.D. in toxicology-related area; an expertise in genotoxicity or reproduction toxicity would be ideal
- ▶ Knowledge of Regulatory and Experimental Toxicology including scientific basis of risk assessment methodologies, preferably in the area of pesticides
- ▶ Good communication and negotiating skills with internal (functions, customers) and external (regulatory authorities) contacts
- ▶ Very good language skills in English (spoken and written); additional language skills in French would be an asset
- ▶ Team building skills across multiple functions, sites and countries
- ▶ Ability to work in a team self-motivated

Benefits:

You will be working in a modern, professional, fast growing internationally active organization with a high degree of responsibility and independence. Intensive on-the-job training will be provided in a competent multi-disciplinary team.

Location: Area of Nice, France

Dr. Knoell Consult GmbH was founded in 1996 in Mannheim, Germany, with offices in Mannheim, Leverkusen, Berlin and Wageningen (NL) as well as subsidiaries in Basel (CH), Cardiff (UK), Bristol (UK), Shanghai (CN) and Chiang Mai (TH). With more than 300 employees, we offer independent consultancy to the Agrochemical, Chemical and Pharmaceutical Industries. Our main focus is registration of agrochemicals, biocides, industrial chemicals and pharmaceuticals. Our services include the evaluation of data completeness, compilation and assessment of raw data, preparation of risk assessments and dossiers for submission to the relevant authorities.

Please submit your complete application in English or German by e-mail, including a detailed curriculum vitae, salary expectation and availability.
