

<b>Georg-August-Universität Göttingen</b> <b>Universität Kassel/Witzenhausen</b> <b>Module M.SIA.E18: Organization of food supply chains</b>	6 C 4 WLH
<b>Learning outcome, core skills:</b>  Students are introduced into various issues of the organizational design of food supply chains and agribusiness firms. Students learn to write a seminar paper and they are also able to independently acquire additional knowledge by advanced literature search. The preparation and presentation of selected topics as well as the contribution to oral discussions during seminary sessions will be examined. The comprehensive overview of organizational theories and methods enables the students to identify and classify complex problems and develop solutions.	<b>Workload:</b>  Attendance time: 68 h Self-study time: 112 h
<b>Course: Organization of food supply chains (Seminar)</b>  <b>Contents:</b>  The module introduces into basic concepts of organizational design in food supply chains and the agribusiness sector. The students write a paper based on the combination of a selected organizational theory and a practical example. The students present their papers and discuss the various organizational issues with high importance for the food and agribusiness sector. Key aspects of the lecture are:  <ul style="list-style-type: none"> <li>- Stakeholder management for farms and agribusiness firms</li> <li>- Efficient organizational design of food supply chains: Contracts, open markets, vertical integration</li> <li>- Competitive strategy and the design of food supply chains</li> <li>- Certification schemes from an organizational perspective</li> <li>- Cooperatives and the organization of food supply chains</li> <li>- Transparency of food supply chains</li> </ul> The seminar makes use of various organizational theories and provides students with insights into the practical implications of these theories.  Vorlesungsbegleitende Materialien	4 WLH
