

## LALUC (Latin American Land Use under Climate change)

### Online Seminar Series

We are very pleased that **Dr. Ana Patricia Calderón Quiñonez** will open the series by sharing her experience in coordinating transdisciplinary research on biodiversity and land use in Latin America.

**Presentation Title: Making Inter and Transdisciplinary Integration Work: Reflections from a German–Latin American Research Partnership**

Dr. Ana Patricia Calderón Quiñonez is a conservation biologist and ecological modeler who worked as a project coordinator and scientist at the Rheinland-Pfälzische Technische Universität Kaiserslautern-Landau (RPTU), Landau. In the project PRODIGY: Science-based Management Options to avoid crossing Tipping Points in the Amazon she coordinated a transdisciplinary team across Germany, Peru, Bolivia, and Brazil. Her PhD research focused on jaguar population connectivity and viability in Northern Mesoamerica.

When: **Friday, March 6th at 4:15 pm**
