

Master of International Nature Conservation

Christchurch
New Zealand

This two-year Master of International Nature Conservation (MINC) degree gives participants a unique opportunity to study at two internationally-recognised universities, involving a work placement and a research project.

The programme combines coursework, a thesis and practical experience. The two semesters of coursework are split between Lincoln University in New Zealand and Göttingen University in Germany, with all courses taught in English. Practical work experience options can include an internship within New Zealand or with an internationally-based conservation organisation.

Students enrolled in the MINC programme through Lincoln University are supervised by Lincoln University staff. You will graduate with a truly international qualification in Nature Conservation.

See the programme website for examples of work experience and research options
