

Timetable preparation in the Two-Subject Bachelor

for students in their FIRST semester

What do I need to create a timetable?

To create a timetable, you need for tools:

- Exemplary study plan
- Module catalogue
- Course catalogue in HisinOne EXA
- Stud.IP

Scan the QR-Code for a video tutorial:

How do I go about creating a timetable?

Please note in general:

First plan the smaller subject and then plan the larger subject around the small subject! In larger subjects you have more choice of courses, as they are often offered at different times.

Examples of larger subjects:

- German Studies
- English: Language, Literatures and Cultures
- History
- Philosophy

Where can I find an exemplary study plan?

You can find an exemplary study plan for your subjects in the “Fachspezifischen Bestimmungen der Prüfungs- und Studienordnung” of the respective subject. You can find this document by clicking on your subject in the [A-Z-list](#) under the item “Regulations”.

Please open the latest version. At the end of the document, you will find one or more exemplary, i.e. sample, study plans. These are suggestions as to the order in which the modules* can be studied. In the next step, you have to find out which courses you have to take for a module. You can find this information in the module catalogue.

*Relevant terms related to the study program are explained in a [glossary](#).

Scan QR-Code for the glossary:

Where can I find the module catalogue?

You will find the module catalogue that is currently valid for you on the same page as the “Fachspezifischen Bestimmungen”. In the module catalogue, you will find the core curriculum of the respective subject under the indication “Übersicht nach Modulgruppen”. The core curriculum defines the modules that you must complete in order to graduate with 66 Credits in each of your subjects. Click on the module in the PDF that you have selected in the exemplary study plan. This will take you to the module description.

This contains important information, including:

- Name of the module
- Number of Credits
- Courses
- Examination/ Examination prerequisites
- Frequency and duration
- Admission requirements

When and where do the courses take place?

From the module description you now know which courses belong to the module. The courses are entered in HISinOne EXA. Log in via [e-Campus](#) and select the course catalogue. Then click on “Faculty of Humanities” and then on your respective subject. Now look for the corresponding courses. Always check whether the course is really assigned to the module you would like to take.

If available, please also read the remarks and the commentary carefully, as important information is often contained here, e.g. on the registration modalities.

Scan QR-Code for eCampus:

Where do I have to register?

You must register for the courses via Stud.IP. Please note the information on the respective registration modalities in HISinOne EXA. You can also access Stud.IP via [eCampus](#). You can find instruction videos on Stud.IP [here](#).

Often you can register for courses during certain time slots only.

If you have question about registration, please contact the respective lecturer or your subject.

Please note that registration in Stud.IP does not replace registration in FlexNow. If you want to take an exam, you must also register for it in FlexNow in time.

Examination dates are usually shown in HISinOne EXA.

I have questions about creating my timetable. Where can I go?

If you have general question about planning your courses or the study process, please feel free to contact the Student Advisory Service at the Faculty of Humanities:

Advisory for international students:

Phone: 0551-39 26721

eMail: international@phil.uni-goettingen.de

You can find the current office hours [here](#).

If you have subject-specific questions, e.g. about module content, please contact the student advisory service of your subject. You can find these either on the seminar homepage or [here](#). There you will also find further advisory services offered by the faculty.
