

2017 Indonesia Sustainable Palm Oil Summer Course

**INDONESIA
Bogor & Jambi**

**20 November -
9 December 2017**

Palm oil is a highly efficient, high yielding source of food and fuel. It has become one of the most important commodity in Indonesia, which supports millions of Indonesian livelihood.

As one of the world's largest producer of palm oil, Indonesia has been committed to improve the sustainability and productivity of palm oil industry, especially the one run by small holders.

The Summer Course spells high quality academics, combined with field experiences, and a wide range of cultural and social activities. It will enlighten its participants with a solid understanding of Indonesian sustainable oil palm industry.

The Summer Course is open for:

- * Bachelor/Master/PhD students
- * Teacher/Lecturer
- * Government Officials
- * NGOs

We have expert group of resourcepersons in palm oil industries, academicians, and palm oil scientists
