11:00 – 17:00 Uhr

## Exhibition catalogue 2018

We would like to say thanks to the sponsors of the PraxisBörse:

**hannover re®**

**NORD/LB**

### Photos

Please notice that during the whole event photos will be made which are used for printed and online publications of the University of Göttingen. Please inform the photographer or our team at the Info Point if you not agree with publications.

The joint booth „business community of south lower saxony“ is supported by:

## WELCOMING SPEECH

Welcome to the 21st **PRAXISBÖRSE** job and career fair!

Every year, several thousand excellently educated and highly motivated graduates leave our university. At the PraxisBörse, students and companies have the opportunity to exchange ideas about entry-level and career opportunities and get to know each other in a laid-back atmosphere.

We are delighted that over 100 attractive employers will be presenting themselves during the two days of the fair.

The first day of the fair—held at the North Campus—will focus on the natural sciences. The second is cross-disciplinary in nature and will be held in the Central Lecture Hall Building (ZHG), which also houses the joint booth „Economy of Southern Lower Saxony“, where small and medium-sized companies from the region will be presenting themselves. You can find information on the exhibitors and the diverse preliminary and accompanying programme in this fair catalogue.

Göttingen University offers space for innovative ideas to talented young individuals who provide a breath of fresh air—whether as dedicated employees or self-employed entrepreneurs. This turns the university into a forge for the young professionals of tomorrow. We strongly encourage you to read in the preliminary programme and then make the most of the diverse offers from stakeholders across the board during the two days of

the fair. They will support you in clarifying your professional perspectives and preferences. Get answers to questions about your professional career and how to transition from studying to working life. On company tours, you can find out about attractive career opportunities in the region or, alternatively, the possibilities of setting up your own business.

I would like to thank the PraxisBörse team and all supporting institutions for their professional organisation. I am particularly grateful to our sponsors, who make a successful PraxisBörse „in publica commoda“ possible for the benefit of all.

I hope all those involved find many interesting things to talk about, and wish you all much success in your future collaborations!

Prof. Dr. Ulrike Beisiegel  
President of the Georg-August-Universität Göttingen

PREFACE

Dear Students, dear Alumni, dear Exhibitors,

We wish you all a very warm welcome to the 21st **PRAXISBÖRSE** job and career fair.

On two consecutive days at the North Campus and Central Campus, you will have the opportunity to talk about the entry and career opportunities of the companies being exhibited at the fair. Small and medium-sized companies will be represented, as well as internationally operating corporations. Be it for internships, student work, practice-oriented theses or entry into professional life, our job and career fair is a stock exchange of possibilities. We are particularly pleased that the number of sponsors has tripled since last year and delighted about all the positive feedback we have received from students, graduates and exhibiting companies. This motivates us further and we hope that this year's PraxisBörse will be just as rewarding, successful and inspiring for all those involved.

How do I apply? What do I have to consider if I want to write my thesis in collaboration with a company? Many exhibiting companies and service institutions of the university are involved in lectures and workshops on applications, entry opportunities and promotion prospects in the extensive preliminary and supporting programme of the job and career fair. We want to support you, dear students, in finding your own professional path. Since this does not necessarily have to lead to an employment relationship, this year's

framework programme of the PraxisBörse also prominently features the topic of start-ups. The university's start-up support, together with various partners, presents its support offers and outlines the entire path, from the idea, all the way up to the successful founding of a company.

We hope that all visitors, as well as our exhibiting companies, will have many interesting discussions and make valuable new contacts. Enjoy searching for and finding professionals, employers and career prospects!

## START-UP SUPPORT

### Start-up support of the University of Göttingen

We support students, staff members and scientists who are engaged in Göttingen's university and high schools. Apart from consulting (initial and follow-up), we help finding and applying for funding. Numerous events and workshops provide practical knowledge for entrepreneurs and those interested in becoming one. Moreover, we support young founders with their networking – connecting to partners and mentors or even working facilities.

#### Our services

- Consulting (initial / follow-up)
- Funding support
- Events, workshops and lectures concerning entrepreneurship
- Working space
- Start-up competition LIFT-OFF
- Search for team members, Help on team-building
- Regional networking (entrepreneurs, mentors and partners from economy)
- Jobs, theses, internships in cooperation with regional start-ups

Thursday, 28.06.2018

### From Göttingen to Brussels – A field report of an EU employee

Dr. Johannes Baur  
 Deputy Head of Unit at European  
 Commission, Brussels

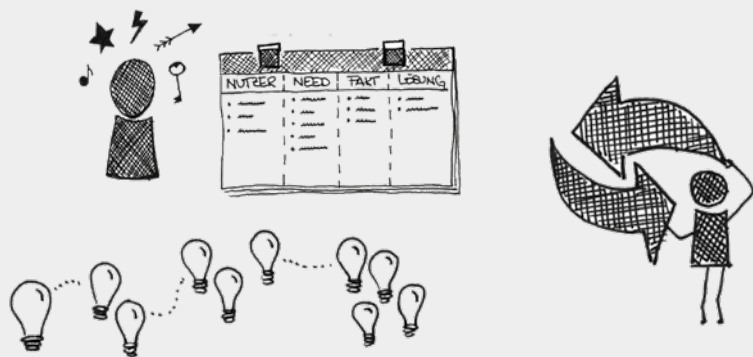

## PROGRAMME START-UP SUPPORT

### State of the art in founding support

DESIGN THINKING as an innovation method is obviously popular. However, what is it all about and why do big companies such as Daimler, Bosch or Deutsche Bahn build their trust on it? The method provides us with tools in order to start the doing part. Quickly generating ideas, empathy and uses for the user, building prototypes and testing them. No matter products or services, going through the process of Design Thinking leaves no other choice than holding in hand the first prototype, already tested. And because this is something hard to imagine, one simply has to do it! The founding unit gives you the possibility to do so. Join us at our stand and experience Design Thinking within live coaching. Viva Marie, Start-up Coach at the Pre-Inkubator of Göttingen University, let you do the process within 45 minutes!

## TIPS AND INTERESTING FACTS FOR STUDENTS

In three steps to your application success

Before the PraxisBörse

- 1 **Informing:** On the pages of the PraxisBörse are all information about workshops, talks and persons to contact available. An additional research about the companies, their contact persons and searched positions are helpful for your orientation at the fair.
- Preparing:** Which company could be your next employer? Address your application documents to them and hold all documents ready.
- Positioning:** There is no dresscode on the PraxisBörse but have in mind that your appearance can catch the attention of our companies.

At the PraxisBörse

- 2 **Recognizing:** Stay alerted and keep your ears open, even if you are not looking for a job. In conversations with our companies they could present you the prospect of an internship or a topic for your graduation work.
- Communicating:** Talk to potential employer and don't avoid the first contact. They appreciate concrete inquiries and gladly note your contact details.
- Orientating:** You can inform yourself on both fair days about open job postings. Those postings are available on our exhibitor portal beforehand [www.uni-goettingen.de/praxisboerse](http://www.uni-goettingen.de/praxisboerse)

After the PraxisBörse

- 3 **Asking:** Stay in touch with interesting exhibitors. If you had a nice conversation, feel free to contact them after the fair. They will gladly remember you.
- Working over:** You are indecisive about the next steps? Get in touch with our Career Service, they can help you with the creation of a personality profile, an individual route-strategy or a check of your application documents.
- Following up:** Use your experience from the PraxisBörse for your future orientation. All conversations with exhibitors and all information about employer and their application process will help you in future applications and conversations!

## JOB APPLICATIONS IN ENGLISH

A typical job application in English includes a CV, cover letter and sometimes a statement of purpose. Read the job description carefully to see which documents are required and whether you meet the requirements.

The following is a brief overview of the application documents.

**Laura Syms / ZESS**

### CV

1 – 2 pages long (academic CVs can be longer)

CVs include your name, address, phone number, email address, employment history and education.

Non-relevant employment and early education are not necessarily included.

In English speaking countries photos, date of birth, gender and marital status are not included on the CV.

### Cover Letter

1 page long

3 main criteria to 'AID' you in writing a successful application:

- Attention: capture the reader's attention.
- Interest: highlight your qualifications, experiences, skills to ensure the reader remains interested in you.
- Desire: make the reader want to meet you (by showing what you can offer).

**A cover letter is intended to complement your CV, not to duplicate it.**

**Structure includes the following:**

#### Address

Yours and your potential employer/ university

#### Appropriate Greeting

"Dear Sir/Madam", "Dear Mr./Mrs. Jones"

### Introduction

Who are you? Why are you writing? What position are you interested in? Where and when did you see the position advertised?

### Main body

What do you have to offer? What can you bring to the company/university? Highlight your most relevant skills and experience.

### Conclusion and Platitudes

"I look forward to hearing from you"  
"Yours faithfully", "Yours sincerely"

### Statement of Purpose

2 pages maximum unless otherwise stated.

Generally written like an essay.

Elaborates on you as a person and your

personal qualities.

Leaves the reader with a flavor of who you are, but leaves them wanting more.

Always bear in mind your goal – why are you writing this? → to get the job.

Create links between you as a person and how you will be an asset to this company/ university.

Personal but not too personal – remember, you are still writing to a stranger.

Anecdotal stories are possible. If you do use anecdotes, keep them brief and make sure you highlight their relevance to the application.

Ensure your statement stands out from the crowd – this is the one place where you can really let your personality come out in your writing.

**Be unique and honest!**
