

Teaching Experience

In the past, I have taught the following courses:

Macroeconomics II (2001), Undergraduate Course, Teaching Assistant.

Macroeconomics I (2000), Undergraduate Course, Teaching Assistant.

Empirical Economics (2000), Undergraduate Course, Teaching Assistant.

Additionally, I have written four chapters for a supplementary textbook addressed to undergraduate students at the beginning of their studies. The aim of the book was to use real-world case studies to show how economic concepts can be applied in practice. The studies included an increase in tobacco taxes in Germany to demonstrate substitution processes and discuss the concept of price elasticities. Another example discussed the various policies for greenhouse gas emission reduction – emission trading versus emission reduction laws – in the context of emission trading schemes in California.
