The uniqueness of nature & culture

# Community Garden

| Village        | Number of Owners | Large (Hectares) |
|----------------|------------------|------------------|
| Desa Baru      | 63               | 126,50           |
| Semurung       | 110              | 299,75           |
| Jernih         | 163              | 322,25           |
| Lubuk Jering   | 266              | 825,50           |
| Pematang Kabau | 253              | 475,25           |
| Bukit suban    | 155              | 196,80           |
| Jumlah         | 1.010            | 2.246,05         |

**Purpose**  
To find out how encroachment occurs and conflict resolution activities.

## Research Methods

The explanatory community research method, which is the process of finding the right knowledge and understanding on various social aspects of the society through the explanation of factors causing dubious / events / social phenomena, or identifying causal network with regard to social events or phenomena through qualitative data.

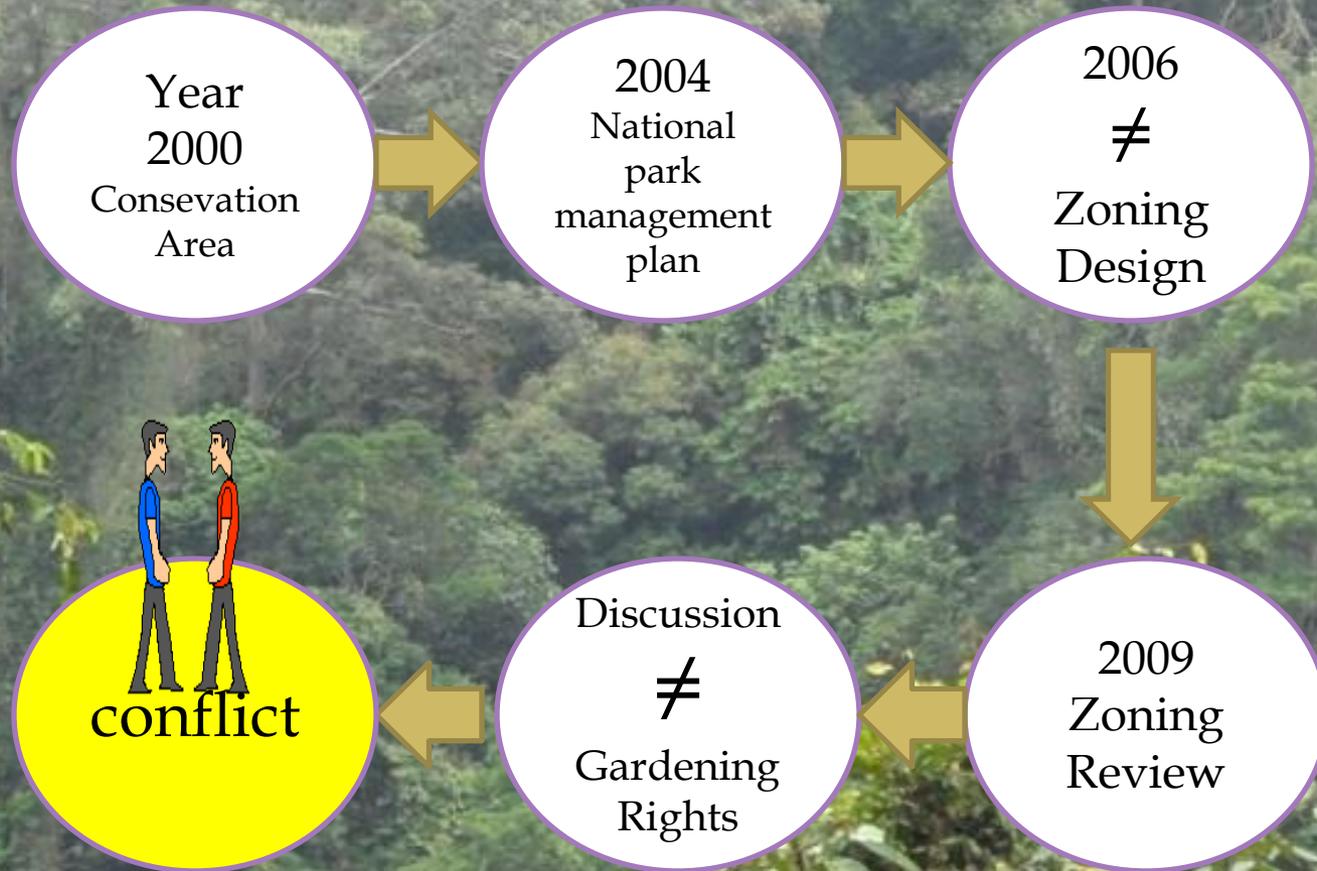

### Data collection

- Deep interview
- Direct Observation
- Study Documentation / Study Archives

# Research Result

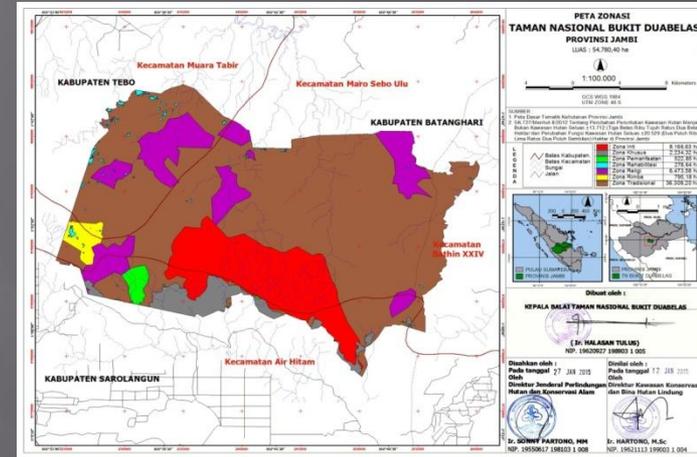

## A. Occurrence of Encroachment Conflict

# B. Conflict Resolution

## 1. Setting of National Park Zone

The Zoning of Bukit Duabelas National Park was passed on June 1, 2014 and then the conflict ended because the zoning designs had accommodated the community's proposal to manage the rubber plantation in Bukit Duabelas National Park as a special zone.

## 2. Forest and Land Rehabilitation

To improve the quality of the area and the number of plant species in specific zones, forest and land rehabilitation activities are carried out in the form of enrichment of endemic plant species and multipurpose tree species.

## 3. Community Economic Empowerment

To realize the balance between the sustainability and prosperity of the people around the area, there are integrative, participatory and comprehensive community empowerment activities.

# Conclusion

## 1. Conflict Resolution Activities

Setting of National Park Zone, Forest and Land Rehabilitation, Community Economic Empowerment

1. Conflict resolution activities have not been implemented optimally

# Suggestion

1. Establishment of long-term programs on special zone management, Forest and Land Rehabilitation and Community empowerment involving
2. Digging and developing potential environmental services in special zones such as water utilization, beeswax, research and tourism.

**Let's start from ourselves ...  
To conserve forests and environment**
