

Modulverzeichnis

**zu der Prüfungs- und Studienordnung für
den konsekutiven Master-Studiengang
"Mathematik" (Amtliche Mitteilungen I Nr.
14/2013 S. 313, zuletzt geändert durch
Amtliche Mitteilungen I Nr. 6/2023 S. 143)**

Module

B.Inf.1236: Machine Learning.....	797
B.Inf.1237: Deep Learning.....	798
B.Inf.1240: Visualization.....	799
B.Inf.1241: Computational Optimal Transport.....	800
B.Mat.0720: Mathematische Anwendersysteme (Grundlagen).....	801
B.Mat.0721: Mathematisch orientiertes Programmieren.....	803
B.Mat.0730: Praktikum Wissenschaftliches Rechnen.....	805
B.Mat.0740: Stochastisches Praktikum.....	807
B.Mat.0910: Linux effektiv nutzen.....	809
B.Mat.0921: Einführung in TeX/LaTeX und praktische Anwendungen.....	811
B.Mat.0922: Mathematics information services and electronic publishing.....	813
B.Mat.0923: Scientific Writing.....	815
B.Mat.0931: Tutorenttraining.....	817
B.Mat.0932: Vermittlung mathematischer Inhalte an ein Fachpublikum.....	819
B.Mat.0935: Historische, museumspädagogische und technische Aspekte für den Aufbau, Erhalt und die Nutzung wissenschaftlicher Modellsammlungen.....	820
B.Mat.0936: Medienbildung zu mathematischen Objekten und Problemen.....	821
B.Mat.0940: Mathematik in der Welt, in der wir leben.....	822
B.Mat.0950: Mitgliedschaft in der studentischen oder akademischen Selbstverwaltung.....	824
B.Mat.0951: Ehrenamtliches Engagement in einem mathematischen Umfeld.....	825
B.Mat.0952: Organisation einer mathematischen Veranstaltung.....	826
B.Mat.0970: Betriebspraktikum.....	827
B.Mat.1400: Maß- und Wahrscheinlichkeitstheorie.....	828
B.Mat.2100: Partielle Differenzialgleichungen.....	830
B.Mat.2110: Funktionalanalysis.....	832
B.Mat.2120: Funktionentheorie.....	834
B.Mat.2200: Moderne Geometrie.....	836
B.Mat.2210: Zahlen und Zahlentheorie.....	838
B.Mat.2300: Numerische Analysis.....	840
B.Mat.2310: Optimierung.....	842

B.Mat.3041: Overview on non-life insurance mathematics.....	844
B.Mat.3042: Overview on life insurance mathematics.....	845
B.Mat.3043: Non-life insurance mathematics.....	846
B.Mat.3044: Life insurance mathematics.....	848
B.Mat.3111: Introduction to analytic number theory.....	850
B.Mat.3112: Introduction to analysis of partial differential equations.....	852
B.Mat.3113: Introduction to differential geometry.....	854
B.Mat.3114: Introduction to algebraic topology.....	856
B.Mat.3115: Introduction to mathematical methods in physics.....	858
B.Mat.3121: Introduction to algebraic geometry.....	860
B.Mat.3122: Introduction to algebraic number theory.....	862
B.Mat.3123: Introduction to algebraic structures.....	864
B.Mat.3124: Introduction to groups, geometry and dynamical systems.....	866
B.Mat.3125: Introduction to non-commutative geometry.....	868
B.Mat.3131: Introduction to inverse problems.....	870
B.Mat.3132: Introduction to approximation methods.....	872
B.Mat.3133: Introduction to numerics of partial differential equations.....	874
B.Mat.3134: Introduction to optimisation.....	876
B.Mat.3137: Introduction to variational analysis.....	878
B.Mat.3138: Introduction to image and geometry processing.....	880
B.Mat.3139: Introduction to scientific computing / applied mathematics.....	882
B.Mat.3141: Introduction to applied and mathematical stochastics.....	884
B.Mat.3142: Introduction to stochastic processes.....	886
B.Mat.3143: Introduction to stochastic methods of econometrics.....	888
B.Mat.3144: Introduction to mathematical statistics.....	890
B.Mat.3145: Introduction to statistical modelling and inference.....	892
B.Mat.3146: Introduction to multivariate statistics.....	894
B.Mat.3147: Introduction to statistical foundations of data science.....	896
B.Mat.3311: Advances in analytic number theory.....	898
B.Mat.3312: Advances in analysis of partial differential equations.....	900
B.Mat.3313: Advances in differential geometry.....	902

Inhaltsverzeichnis

B.Mat.3314: Advances in algebraic topology.....	904
B.Mat.3315: Advances in mathematical methods in physics.....	906
B.Mat.3321: Advances in algebraic geometry.....	908
B.Mat.3322: Advances in algebraic number theory.....	910
B.Mat.3323: Advances in algebraic structures.....	912
B.Mat.3324: Advances in groups, geometry and dynamical systems.....	914
B.Mat.3325: Advances in non-commutative geometry.....	916
B.Mat.3331: Advances in inverse problems.....	918
B.Mat.3332: Advances in approximation methods.....	920
B.Mat.3333: Advances in numerics of partial differential equations.....	922
B.Mat.3334: Advances in optimisation.....	924
B.Mat.3337: Advances in variational analysis.....	926
B.Mat.3338: Advances in image and geometry processing.....	928
B.Mat.3339: Advances in scientific computing / applied mathematics.....	930
B.Mat.3341: Advances in applied and mathematical stochastics.....	932
B.Mat.3342: Advances in stochastic processes.....	934
B.Mat.3343: Advances in stochastic methods of econometrics.....	936
B.Mat.3344: Advances in mathematical statistics.....	938
B.Mat.3345: Advances in statistical modelling and inference.....	940
B.Mat.3346: Advances in multivariate statistics.....	942
B.Mat.3347: Advances in statistical foundations of data science.....	944
B.Phi.01: Basismodul Theoretische Philosophie.....	946
B.Phi.02: Basismodul Praktische Philosophie.....	948
B.Phi.03: Basismodul Geschichte der Philosophie.....	950
B.Phi.05: Aufbaumodul Theoretische Philosophie.....	952
B.Phi.06: Aufbaumodul Praktische Philosophie.....	954
B.Phi.07: Aufbaumodul Geschichte der Philosophie.....	956
B.Phi.18a: Vertiefte Bearbeitung philosophischer Themen für HörerInnen aller Fächer.....	958
B.Phi.19a: Spezielle Themen der Philosophie für HörerInnen aller Fächer.....	960
B.Phy.1551: Introduction to Astrophysics.....	961
B.Phy.5601: Theoretical and Computational Neuroscience I.....	962

B.Phy.5602: Theoretical and Computational Neuroscience II.....	963
B.Phy.5651: Advanced Computational Neuroscience.....	964
B.Phy.5652: Advanced Computational Neuroscience II.....	965
B.Phy.5676: Computer Vision and Robotics.....	966
B.WIWI-BWL.0014: Rechnungslegung der Unternehmung.....	968
B.WIWI-BWL.0023: Grundlagen der Versicherungstechnik.....	969
B.WIWI-BWL.0038: Supply Chain Management.....	971
B.WIWI-BWL.0087: International Marketing.....	973
B.WIWI-VWL.0001: Mikroökonomik II.....	975
B.WIWI-VWL.0002: Makroökonomik II.....	977
B.WIWI-VWL.0005: Grundlagen der internationalen Wirtschaftsbeziehungen.....	979
B.WIWI-VWL.0006: Wachstum und Entwicklung.....	981
B.WIWI-VWL.0007: Einführung in die Ökonometrie.....	983
B.WIWI-VWL.0008: Geldtheorie und Geldpolitik.....	985

Übersicht nach Modulgruppen

I. Study tracks in the Master's Degree programme in Mathematics (M.Sc.)

In the Master's Degree programme in Mathematics, one of the following study tracks has to be chosen, whereas modules with a total of at least 90 C have to be completed successfully in accordance with the following regulations. The regulations for the modules that can be chosen within the scope of a study focus can be found in No. II "Elective courses in Mathematics (graduate studies)".

Im Master-Studiengang „Mathematik“ ist eines der nachfolgenden Studienprofile zu wählen, wobei nach Maßgabe der folgenden Bestimmungen Module im Umfang von wenigstens 90 C erfolgreich zu absolvieren sind. Die im Rahmen eines Schwerpunktes wählbaren Module sind unter "II. Elective courses in Mathematics (graduate studies)" geregelt.

1. Study track F "Research-oriented - general"

In the study track F "Research-oriented - general" modules have to be completed successfully according to the regulations below.

Im Studienprofil F „Forschungsorientiert - allgemein“ sind Module nach Maßgabe der nachstehenden Bestimmungen erfolgreich zu absolvieren.

a. Elective compulsory modules in Mathematics (60 C)

In the study track F, elective compulsory modules in the subject mathematics with a total of at least 60 C have to be completed successfully according to the following regulations:

Im Studienprofil F müssen Wahlpflichtmodule im Fach Mathematik im Umfang von insgesamt mindestens 60 C nach Maßgabe der folgenden Bestimmungen erfolgreich absolviert werden:

i) In the study foci SP 1 or SP 2, modules with a total of at least 12 C have to be completed successfully, thereof at least a seminar module or an advanced seminar module with at least 3C (M.Mat.481*, M.Mat.482*, M.Mat.491*, M.Mat.492*). If the Master's thesis is in one out of these two study foci, a total of at least 6 C of the modules out of the other study focus have to be completed successfully.

Aus den Schwerpunkten SP 1 oder SP 2 müssen Module im Umfang von insgesamt wenigstens 12 C erfolgreich absolviert werden, davon mindestens ein Seminar- oder Oberseminarmodul (M.Mat.481*, M.Mat.482*, M.Mat.491*, M.Mat.492*) im Umfang von wenigstens 3 C; ist einer dieser beiden Schwerpunkte der Studienschwerpunkt der Masterarbeit, so müssen mindestens 6 C aus Modulen des anderen Schwerpunkts erworben werden.

ii) In the study foci SP 3 or SP 4, modules with a total of at least 12 C have to be completed successfully, thereof at least a seminar module or an advanced seminar module with at least 3C (M.Mat.483*, M.Mat.484*, M.Mat.493*, M.Mat.494*). If the Master's thesis is in one out of these two study foci, a total of at least 6 C of the modules out of the other study focus have to be completed successfully.

Aus den Schwerpunkten SP 3 oder SP 4 müssen Module im Umfang von insgesamt wenigstens 12 C erfolgreich absolviert werden, davon mindestens ein Seminar- oder Oberseminarmodul (M.Mat.483*, M.Mat.484*, M.Mat.493*, M.Mat.494*) im Umfang von wenigstens 3 C; ist einer dieser beiden Schwerpunkte der Studienschwerpunkt der Masterarbeit, so müssen mindestens 6 C aus Modulen des anderen Schwerpunkts erworben werden.

iii) Further modules can be chosen freely out of the modules offered in all four mathematical study foci.

Darüber hinaus kann frei aus den angebotenen Modulen aller vier mathematischen Studienschwerpunkte gewählt werden.

b. Elective compulsory modules in the minor subject (18 C)

In the study track F, modules with a total of at least 18 C have to be completed successfully in one out of the following minor subjects: Astrophysics, Business Administration, Chemistry, Computer Science, Philosophy, Physics, Economics. The regulations for the modules to choose from in each case can be found in No. III "Minor subjects in the graduate programme in Mathematics".

Im Studienprofil F sind Module im Gesamtumfang von wenigstens 18 C in einem der folgenden Nebenfächer erfolgreich zu absolvieren: Astrophysik, Betriebswirtschaftslehre, Chemie, Informatik, Philosophie, Physik, Volkswirtschaftslehre. Die jeweils wählbaren Module sind in "III. Minor subjects in the graduate programme in Mathematics" geregelt.

c. Elective modules in the key competencies area (12 C)

Modules with a total of at least 12 C have to be completed successfully, among them one out of the key competencies modules offered by the Unit Mathematics, according to the regulations in No. IV. "Key competencies in the graduate programme in Mathematics". The remaining modules can be chosen freely from the key competencies modules offered by the Unit Mathematics, according to the regulations in No. IV. "Key competencies in the graduate programme in Mathematics", or from the cross-faculty key competencies offer. The choice of other modules (alternative modules) is only possible with the approval of the dean of students of the faculty that offers the module. The choice of an alternative module has to be reported to the Study Office Mathematics in advance.

Es sind Module im Gesamtumfang von wenigstens 12 C erfolgreich zu absolvieren, darunter eines der Schlüsselkompetenzmodule aus dem Angebot der Lehrinheit Mathematik nach "IV. Key competencies in the graduate programme in Mathematics". Die übrigen Module können frei aus den unter IV. "Schlüsselkompetenzmodule im Masterstudium" genannten Wahlmodulen aus dem Angebot der Lehrinheit Mathematik oder aus dem universitätsweiten Schlüsselkompetenzangebot gewählt werden. Die Belegung anderer Module (Alternativmodule) ist mit Zustimmung der Studiendekanin oder des Studiendekans der Fakultät, die das Modul anbietet, ebenfalls möglich. Die Belegung eines Alternativmoduls ist dem Studienbüro vorab anzuzeigen.

2. Study track Phy "Physics"

In the research-oriented study track Phy "Physics", modules below have to be completed successfully according to the regulations.

Im forschungsorientierten Studienprofil Phy "Physik" sind Module nach Maßgabe der nachstehenden Bestimmungen erfolgreich zu absolvieren.

a. Elective compulsory modules in Mathematics (60 C)

In the study track Phy, elective compulsory modules covering a total of at least 60 C have to be completed successfully according to the following regulations:

Im Studienprofil Phy müssen Wahlpflichtmodule im Umfang von insgesamt mindestens 60 C nach Maßgabe der folgenden Bestimmungen erfolgreich absolviert werden.

i) In the study foci SP 3 or SP 4, elective compulsory modules with a total of at least 12 C have to be completed successfully, thereof at least a seminar module or an advanced seminar module with at least 3 C (M.Mat.483*, M.Mat.484*, M.Mat.493*, M.Mat.494*).

Es müssen Wahlpflichtmodule aus den Schwerpunkten SP 3 oder SP 4 im Gesamtumfang von wenigstens 12 C erfolgreich absolviert werden, davon mindestens ein Seminar- oder Oberseminarmodul im Umfang von wenigstens 3 C.

ii) In the cycles "Mathematical Methods in Physics", "Analysis of Partial Differential Equations", "Differential Geometry", "Algebraic Topology", "Non-commutative Geometry" and "Groups, Geometry and Dynamical Systems", modules with a total of at least 12 C have to be completed successfully, thereof at least a seminar module or an advanced seminar module with at least 3C.

Es müssen Module im Gesamtumfang von mindestens 12 C aus den Zyklen Mathematische Methoden der Physik, Analysis partieller Differentialgleichungen, Differentialgeometrie, Algebraische Topologie, Nichtkommutative Geometrie sowie Gruppen, Geometrie und Dynamische Systeme erfolgreich absolviert werden, davon mindestens ein Seminar- oder Oberseminarmodul im Umfang von wenigstens 3 C.

iii) Further moduls can be chosen freely out the modules offered in all four mathematical study foci SP1-4. Additionally, modules in the section No. III.6. "Physics" can be chosen freely, however this option is restricted to modules with a total of at most 12 C.

Ferner kann frei aus den angebotenen Modulen aller vier mathematischen Studienschwerpunkte gewählt werden. Weiterhin können Module im Gesamtumfang von maximal 12 C aus dem Bereich "III.6. Physics" frei gewählt werden.

b. Elective compulsory modules in the minor subject (18 C)

In the study track Phy, in the minor subject "Physics", modules with a total of at least 18 C have to be completed successfully. The regulations for the modules that can be chosen can be found in No.III "Minor subjects in the graduate programme in Mathematics".

Im Studienprofil Phy sind Module im Gesamtumfang von mindestens 18 C im Nebenfach Physik erfolgreich zu absolvieren. Die jeweils wählbaren Module sind in "III. Minor subjects in the graduate programme in Mathematics" geregelt.

c. Elective modules of the key competencies area (12 C)

At least one key competencies module out of the offer of the Faculty of Physics or out of the offer of the Unit Mathematics has to be completed successfully. Furthermore, modules can be chosen freely from the key competencies modules offered by the Unit Mathematics, according to the regulations in No. IV. "Key competencies in the graduate programme in Mathematics", or from the cross-faculty key competencies offer. The choice of other modules (alternative modules) is only possible with the approval of the dean of students of the faculty that offers the module. The choice of an alternative module has to be reported to the Study Office Mathematics in advance.

Es ist ein Schlüsselkompetenzmodul aus dem Angebot der Fakultät für Physik oder eines aus dem Angebot der Lehrinheit Mathematik erfolgreich zu absolvieren. Ferner können Module aus den unter IV. "Schlüsselkompetenzmodule im Masterstudium" genannten Wahlmodulen aus dem Angebot der Lehrinheit Mathematik oder aus dem universitätsweiten Schlüsselkompetenzangebot frei gewählt werden. Die Belegung anderer Module (Alternativmodule) ist mit Zustimmung der Studiendekanin oder des Studiendekans der Fakultät, die das Modul anbietet, ebenfalls möglich. Die Belegung eines Alternativmoduls ist dem Studienbüro vorab anzuzeigen.

3. Study track MDS "Mathematical Data Science"

In the study track MDS "Mathematical Data Science" modules have to be completed successfully according to the regulations below. In the study track "Mathematical Data Science" the study foci SP 3 or SP 4 are permitted as study focus of the Master's thesis, only.

Im forschungsorientierten Studienprofil MDS "Mathematical Data Science" sind Module nach Maßgabe der nachstehenden Bestimmungen erfolgreich zu absolvieren. Als Schwerpunkt der Masterarbeit sind im Studienprofil Mathematical Data Science nur die Schwerpunkte SP 3 oder SP 4 zugelassen.

a. Elective compulsory modules in Mathematics (60 C)

In the study track MDS, elective compulsory modules in the subject mathematics with a total of at least 60 C have to be completed successfully according to the following regulations:

Im Studienprofil MDS müssen Wahlpflichtmodule im Umfang von insgesamt mindestens 60 C nach Maßgabe der folgenden Bestimmungen erfolgreich absolviert werden.

aa. Elective compulsory modules in SP 3

In the cycles listed below, modules with a total of at least 12 C have to be completed successfully, thereof at least a seminar module or an advanced seminar module with at least 3C.

Es müssen Module im Gesamtumfang von mindestens 12 C, davon mindestens ein Seminar- oder Oberseminarmodul im Umfang von wenigstens 3 C, aus den folgenden Zyklen absolviert werden.

- Inverse problems
- Optimisation
- Variational analysis
- Image and geometry processing
- Scientific computing / applied mathematics

bb. Elective compulsory modules in SP 4

In the cycles listed below, modules with a total of at least 12 C have to be completed successfully, thereof at least a seminar module or an advanced seminar module with at least 3C.

Es müssen Module im Gesamtumfang von mindestens 12 C, davon mindestens ein Seminar- oder Oberseminarmodul im Umfang von wenigstens 3 C, aus den folgenden Zyklen absolviert werden.

- Applied and mathematical stochastics
- Statistical modelling and inference
- Multivariate and non-Euclidean statistics
- Statistical foundations of data science

cc. Practical course

One out of the following practical course modules with 10 C has to be completed successfully:

Eines der folgenden Praktikumsmodule im Umfang von 10 C muss erfolgreich absolviert werden:

- M.Mat.0731: Advanced practical course in scientific computing (10 C, 4 SWS)..... 1031
- M.Mat.0741: Advanced practical course in stochastics (10 C, 6 SWS)..... 1033

dd. Computer science

In the area "Computer science", one out of the following modules has to be completed successfully.

Es muss eines der folgenden Module erfolgreich absolviert werden.

- B.Inf.1236: Machine Learning (6 C, 4 SWS)..... 797
- B.Inf.1237: Deep Learning (6 C, 4 SWS)..... 798
- B.Inf.1240: Visualization (5 C, 3 SWS)..... 799
- B.Inf.1241: Computational Optimal Transport (6 C, 4 SWS)..... 800
- M.Inf.1112: Effiziente Algorithmen (5 C, 3 SWS)..... 1000
- M.Inf.1141: Semistrukturierte Daten und XML (6 C, 4 SWS)..... 1001

M.Inf.1151: Vertiefung Softwaretechnik: Data Science und Big Data Analytics (5 C, 3 SWS).....	1002
M.Inf.1171: Cloud and Service Computing (5 C, 3 SWS).....	1003
M.Inf.1172: Using Research Infrastructures (5 C, 3 SWS).....	1005
M.Inf.1185: Sensor Data Fusion (5 C, 4 SWS).....	1007
M.Inf.1186: Seminar Hot Topics in Data Fusion and Analytics (5 C, 2 SWS).....	1009
M.Inf.1188: Mobile Robotics (5 C, 4 SWS).....	1010
M.Inf.1210: Seminar Algorithmische Methoden und theoretische Konzepte (5 C, 2 SWS)....	1011
M.Inf.1211: Probabilistische Datenmodelle und ihre Anwendungen (6 C, 4 SWS).....	1012
M.Inf.1213: Algorithmisches Lernen und Mustererkennung (6 C, 4 SWS).....	1013
M.Inf.1216: Datenkompression und Informationstheorie (6 C, 4 SWS).....	1014
M.Inf.1231: Spezialisierung Verteilte Systeme (6 C, 4 SWS).....	1016
M.Inf.1232: Parallel Computing (6 C, 4 SWS).....	1018
M.Inf.1244: Seminar on optimal transport (5 C, 2 SWS).....	1020
M.Inf.1268: Informationstheorie (6 C, 4 SWS).....	1021
M.Inf.1802: Praktikum XML (6 C, 4 SWS).....	1022
M.Inf.1806: Projektseminar Datenbanken und Informationssysteme (6 C, 2 SWS).....	1023
M.Inf.1808: Practical Course on Parallel Computing (6 C, 4 SWS).....	1024
M.Inf.2102: Advanced Statistical Learning for Data Science (6 C, 4 SWS).....	1026
M.Inf.2201: Probabilistic Machine Learning (9 C, 6 SWS).....	1028
M.Inf.2241: Current Topics in Machine Learning (5 C, 2 SWS).....	1030

ee. Elective modules

In order to achieve 60 C, modules out of the four study foci in Mathematics can be added. In addition, modules with a total of at most 12 C can be chosen in the subject "Computer science" as listed in No.III.4 "Computer Science". However, those listed in No.I.4.a.dd) "Computer Science" are recommended.

Zum Auffüllen auf 60 C kann frei aus den angebotenen Modulen aller vier mathematischen Studienschwerpunkte gewählt werden. Weiterhin können Module im Gesamtumfang von maximal 12 C aus dem Bereich III.4 "Computer Science" frei gewählt werden, empfohlen werden die im Abschnitt .I.4.a.dd) "Computer Science" gelisteten Module.

b. Elective compulsory modules in the minor subject (18 C)

In the study track MDS, in the minor subject "Computer science" modules with a total of at least 18 C have to be completed successfully. The regulations can be found in No.III.4) "Computer science". However, those listed in No.I.4.a.dd) "Computer Science" are recommended.

Im Studienprofil MDS sind Module im Gesamtumfang von mindestens 18 C im Nebenfach Informatik erfolgreich zu absolvieren. Die wählbaren Module sind in Nr. III.4) "Computer science" geregelt, empfohlen werden die im Abschnitt I.4.a.dd) "Computer Science" gelisteten Module.

c. Elective modules in the key competencies area (12 C)

One out of the key competencies modules offered by the Unit Mathematics, according to the regulations in No. IV. "Key competencies in the graduate programme in Mathematics", or from the modules according to section dd. "Computer science" has to be completed successfully.

Further modules may be chosen freely from the key competencies modules offered by the Unit Mathematics, according to the regulations in No. IV. "Key competencies in the graduate programme in Mathematics", or from the cross-faculty key competencies offer.

The choice of other modules (alternative modules) is only possible with the approval of the dean of students of the faculty that offers the module. The choice of an alternative module has to be reported to the Study Office Mathematics in advance.

Es ist ein Modul aus den in Nr. IV) "Schlüsselkompetenzmodule im Masterstudium" genannten Wahlmodulen aus dem Angebot der Lehrinheit Mathematik oder aus den im Abschnitt iv) „Informatik“ gelisteten Modulen zu belegen.

Ferner können weitere Module aus den unter IV. "Schlüsselkompetenzmodule im Masterstudium" genannten Wahlmodulen aus dem Angebot der Lehrinheit Mathematik oder aus dem universitätsweiten Schlüsselkompetenzangebot frei gewählt werden.

Die Belegung anderer Module (Alternativmodule) ist mit Zustimmung der Studiendekanin oder des Studiendekans der Fakultät, die das Modul anbietet, ebenfalls möglich. Die Belegung eines Alternativmoduls ist dem Studienbüro Mathematik vorab anzuzeigen.

II. Elective courses in Mathematics (graduate studies)

1. Elective compulsory modules in study focus SP 1 "Analysis, geometry, topology"

M.Mat.3110: Higher analysis (9 C, 6 SWS)..... 1036

B.Mat.3111: Introduction to analytic number theory (9 C, 6 SWS).....850

B.Mat.3112: Introduction to analysis of partial differential equations (9 C, 6 SWS).....852

B.Mat.3113: Introduction to differential geometry (9 C, 6 SWS).....854

B.Mat.3114: Introduction to algebraic topology (9 C, 6 SWS)..... 856

B.Mat.3115: Introduction to mathematical methods in physics (9 C, 6 SWS)..... 858

B.Mat.3311: Advances in analytic number theory (9 C, 6 SWS)..... 898

B.Mat.3312: Advances in analysis of partial differential equations (9 C, 6 SWS).....900

B.Mat.3313: Advances in differential geometry (9 C, 6 SWS).....902

B.Mat.3314: Advances in algebraic topology (9 C, 6 SWS)..... 904

B.Mat.3315: Advances in mathematical methods in physics (9 C, 6 SWS).....906

M.Mat.4511: Specialisation in analytic number theory (9 C, 6 SWS)..... 1042

M.Mat.4512: Specialisation in analysis of partial differential equations (9 C, 6 SWS).....	1044
M.Mat.4513: Specialisation in differential geometry (9 C, 6 SWS).....	1046
M.Mat.4514: Specialisation in algebraic topology (9 C, 6 SWS).....	1048
M.Mat.4515: Specialisation in mathematical methods in physics (9 C, 6 SWS).....	1050
M.Mat.4611: Aspects of analytic number theory (6 C, 4 SWS).....	1090
M.Mat.4612: Aspects of analysis of partial differential equations (6 C, 4 SWS).....	1092
M.Mat.4613: Aspects of differential geometry (6 C, 4 SWS).....	1094
M.Mat.4614: Aspects of algebraic topology (6 C, 4 SWS).....	1096
M.Mat.4615: Aspects of mathematical methods in physics (6 C, 4 SWS).....	1098
M.Mat.4711: Special course in analytic number theory (3 C, 2 SWS).....	1138
M.Mat.4712: Special course in analysis of partial differential equations (3 C, 2 SWS).....	1140
M.Mat.4713: Special course in differential geometry (3 C, 2 SWS).....	1142
M.Mat.4714: Special course in algebraic topology (3 C, 2 SWS).....	1144
M.Mat.4715: Special course in mathematical methods in physics (3 C, 2 SWS).....	1146
M.Mat.4811: Seminar on analytic number theory (3 C, 2 SWS).....	1186
M.Mat.4812: Seminar on analysis of partial differential equations (3 C, 2 SWS).....	1188
M.Mat.4813: Seminar on differential geometry (3 C, 2 SWS).....	1190
M.Mat.4814: Seminar on algebraic topology (3 C, 2 SWS).....	1192
M.Mat.4815: Seminar on mathematical methods in physics (3 C, 2 SWS).....	1194
M.Mat.4911: Advanced seminar on analytic number theory (3 C, 2 SWS).....	1234
M.Mat.4912: Advanced seminar on analysis of partial differential equations (3 C, 2 SWS).....	1236
M.Mat.4913: Advanced seminar on differential geometry (3 C, 2 SWS).....	1238
M.Mat.4914: Advanced seminar on algebraic topology (3 C, 2 SWS).....	1240
M.Mat.4915: Advanced seminar on mathematical methods in physics (3 C, 2 SWS).....	1242

2. Elective compulsory modules in study focus SP 2 "Algebra, geometry, number theory"

B.Mat.3121: Introduction to algebraic geometry (9 C, 6 SWS).....	860
B.Mat.3122: Introduction to algebraic number theory (9 C, 6 SWS).....	862
B.Mat.3123: Introduction to algebraic structures (9 C, 6 SWS).....	864
B.Mat.3124: Introduction to groups, geometry and dynamical systems (9 C, 6 SWS).....	866

B.Mat.3125: Introduction to non-commutative geometry (9 C, 6 SWS).....	868
B.Mat.3321: Advances in algebraic geometry (9 C, 6 SWS).....	908
B.Mat.3322: Advances in algebraic number theory (9 C, 6 SWS).....	910
B.Mat.3323: Advances in algebraic structures (9 C, 6 SWS).....	912
B.Mat.3324: Advances in groups, geometry and dynamical systems (9 C, 6 SWS).....	914
B.Mat.3325: Advances in non-commutative geometry (9 C, 6 SWS).....	916
M.Mat.4521: Specialisation in algebraic geometry (9 C, 6 SWS).....	1052
M.Mat.4522: Specialisation in algebraic number theory (9 C, 6 SWS).....	1054
M.Mat.4523: Specialisation in algebraic structures (9 C, 6 SWS).....	1056
M.Mat.4524: Specialisation in groups, geometry and dynamical systems (9 C, 6 SWS).....	1058
M.Mat.4525: Specialisation in non-commutative geometry (9 C, 6 SWS).....	1060
M.Mat.4621: Aspects of algebraic geometry (6 C, 4 SWS).....	1100
M.Mat.4622: Aspects of algebraic number theory (6 C, 4 SWS).....	1102
M.Mat.4623: Aspects of algebraic structures (6 C, 4 SWS).....	1104
M.Mat.4624: Aspects of groups, geometry and dynamical systems (6 C, 4 SWS).....	1106
M.Mat.4625: Aspects of non-commutative geometry (6 C, 4 SWS).....	1108
M.Mat.4721: Special course in algebraic geometry (3 C, 2 SWS).....	1148
M.Mat.4722: Special course in algebraic number theory (3 C, 2 SWS).....	1150
M.Mat.4723: Special course in algebraic structures (3 C, 2 SWS).....	1152
M.Mat.4724: Special course in groups, geometry and dynamical systems (3 C, 2 SWS).....	1154
M.Mat.4725: Special course in non-commutative geometry (3 C, 2 SWS).....	1156
M.Mat.4821: Seminar on algebraic geometry (3 C, 2 SWS).....	1196
M.Mat.4822: Seminar on algebraic number theory (3 C, 2 SWS).....	1198
M.Mat.4823: Seminar on algebraic structures (3 C, 2 SWS).....	1200
M.Mat.4824: Seminar on groups, geometry and dynamical systems (3 C, 2 SWS).....	1202
M.Mat.4825: Seminar on non-commutative geometry (3 C, 2 SWS).....	1204
M.Mat.4921: Advanced seminar on algebraic geometry (3 C, 2 SWS).....	1244
M.Mat.4922: Advanced seminar on algebraic number theory (3 C, 2 SWS).....	1246
M.Mat.4923: Advanced seminar on algebraic structures (3 C, 2 SWS).....	1248
M.Mat.4924: Advanced seminar on groups, geometry and dynamical systems (3 C, 2 SWS).....	1250
M.Mat.4925: Advanced seminar on non-commutative geometry (3 C, 2 SWS).....	1252

3. Elective compulsory modules in study focus SP 3 "Numerical and applied mathematics"

M.Mat.0731: Advanced practical course in scientific computing (10 C, 4 SWS).....	1031
M.Mat.3110: Higher analysis (9 C, 6 SWS).....	1036
M.Mat.3130: Operations research (9 C, 6 SWS).....	1038
B.Mat.3131: Introduction to inverse problems (9 C, 6 SWS).....	870
B.Mat.3132: Introduction to approximation methods (9 C, 6 SWS).....	872
B.Mat.3133: Introduction to numerics of partial differential equations (9 C, 6 SWS).....	874
B.Mat.3134: Introduction to optimisation (9 C, 6 SWS).....	876
B.Mat.3137: Introduction to variational analysis (9 C, 6 SWS).....	878
B.Mat.3138: Introduction to image and geometry processing (9 C, 6 SWS).....	880
B.Mat.3139: Introduction to scientific computing / applied mathematics (9 C, 6 SWS).....	882
B.Mat.3331: Advances in inverse problems (9 C, 6 SWS).....	918
B.Mat.3332: Advances in approximation methods (9 C, 6 SWS).....	920
B.Mat.3333: Advances in numerics of partial differential equations (9 C, 6 SWS).....	922
B.Mat.3334: Advances in optimisation (9 C, 6 SWS).....	924
B.Mat.3337: Advances in variational analysis (9 C, 6 SWS).....	926
B.Mat.3338: Advances in image and geometry processing (9 C, 6 SWS).....	928
B.Mat.3339: Advances in scientific computing / applied mathematics (9 C, 6 SWS).....	930
M.Mat.4531: Specialisation in inverse problems (9 C, 6 SWS).....	1062
M.Mat.4532: Specialisation in approximation methods (9 C, 6 SWS).....	1064
M.Mat.4533: Specialisation in numerical methods of partial differential equations (9 C, 6 SWS).....	1066
M.Mat.4534: Specialisation in optimisation (9 C, 6 SWS).....	1068
M.Mat.4537: Specialisation in variational analysis (9 C, 6 SWS).....	1070
M.Mat.4538: Specialisation in image and geometry processing (9 C, 6 SWS).....	1072
M.Mat.4539: Specialisation in scientific computing / applied mathematics (9 C, 6 SWS).....	1074
M.Mat.4631: Aspects of inverse problems (6 C, 4 SWS).....	1110
M.Mat.4632: Aspects of approximation methods (6 C, 4 SWS).....	1112
M.Mat.4633: Aspects of numerical methods of partial differential equations (6 C, 4 SWS).....	1114
M.Mat.4634: Aspects of optimisation (6 C, 4 SWS).....	1116

M.Mat.4637: Aspects of variational analysis (6 C, 4 SWS).....	1118
M.Mat.4638: Aspects of image and geometry processing (6 C, 4 SWS).....	1120
M.Mat.4639: Aspects of scientific computing / applied mathematics (6 C, 4 SWS).....	1122
M.Mat.4731: Special course in inverse problems (3 C, 2 SWS).....	1158
M.Mat.4732: Special course in approximation methods (3 C, 2 SWS).....	1160
M.Mat.4733: Special course in numerical methods of partial differential equations (3 C, 2 SWS)....	1162
M.Mat.4734: Special course in optimisation (3 C, 2 SWS).....	1164
M.Mat.4737: Special course in variational analysis (3 C, 2 SWS).....	1166
M.Mat.4738: Special course in image and geometry processing (3 C, 2 SWS).....	1168
M.Mat.4739: Special course in scientific computing / applied mathematics (3 C, 2 SWS).....	1170
M.Mat.4831: Seminar on inverse problems (3 C, 2 SWS).....	1206
M.Mat.4832: Seminar on approximation methods (3 C, 2 SWS).....	1208
M.Mat.4833: Seminar on numerical methods of partial differential equations (3 C, 2 SWS).....	1210
M.Mat.4834: Seminar on optimisation (3 C, 2 SWS).....	1212
M.Mat.4837: Seminar on variational analysis (3 C, 2 SWS).....	1214
M.Mat.4838: Seminar on image and geometry processing (3 C, 2 SWS).....	1216
M.Mat.4839: Seminar on scientific computing / applied mathematics (3 C, 2 SWS).....	1218
M.Mat.4931: Advanced seminar on inverse problems (3 C, 2 SWS).....	1254
M.Mat.4932: Advanced seminar on approximation methods (3 C, 2 SWS).....	1256
M.Mat.4933: Advanced seminar on numerical methods of partial differential equations (3 C, 2 SWS).....	1258
M.Mat.4934: Advanced seminar on optimisation (3 C, 2 SWS).....	1260
M.Mat.4937: Advanced seminar on variational analysis (3 C, 2 SWS).....	1262
M.Mat.4938: Advanced seminar on image and geometry processing (3 C, 2 SWS).....	1264
M.Mat.4939: Advanced seminar on scientific computing / applied mathematics (3 C, 2 SWS).....	1266

4. Elective compulsory modules in study focus SP 4 "Mathematical stochastics"

M.Mat.0741: Advanced practical course in stochastics (10 C, 6 SWS).....	1033
B.Mat.3041: Overview on non-life insurance mathematics (3 C, 2 SWS).....	844
B.Mat.3042: Overview on life insurance mathematics (3 C, 2 SWS).....	845
B.Mat.3043: Non-life insurance mathematics (6 C, 4 SWS).....	846

B.Mat.3044: Life insurance mathematics (6 C, 4 SWS).....	848
M.Mat.3140: Mathematical statistics (9 C, 6 SWS).....	1040
B.Mat.3141: Introduction to applied and mathematical stochastics (9 C, 6 SWS).....	884
B.Mat.3142: Introduction to stochastic processes (9 C, 6 SWS).....	886
B.Mat.3143: Introduction to stochastic methods of econometrics (9 C, 6 SWS).....	888
B.Mat.3144: Introduction to mathematical statistics (9 C, 6 SWS).....	890
B.Mat.3145: Introduction to statistical modelling and inference (9 C, 6 SWS).....	892
B.Mat.3146: Introduction to multivariate statistics (9 C, 6 SWS).....	894
B.Mat.3147: Introduction to statistical foundations of data science (9 C, 6 SWS).....	896
B.Mat.3341: Advances in applied and mathematical stochastics (9 C, 6 SWS).....	932
B.Mat.3342: Advances in stochastic processes (9 C, 6 SWS).....	934
B.Mat.3343: Advances in stochastic methods of econometrics (9 C, 6 SWS).....	936
B.Mat.3344: Advances in mathematical statistics (9 C, 6 SWS).....	938
B.Mat.3345: Advances in statistical modelling and inference (9 C, 6 SWS).....	940
B.Mat.3346: Advances in multivariate statistics (9 C, 6 SWS).....	942
B.Mat.3347: Advances in statistical foundations of data science (9 C, 6 SWS).....	944
M.Mat.4541: Specialisation in applied and mathematical stochastics (9 C, 6 SWS).....	1076
M.Mat.4542: Specialisation in stochastic processes (9 C, 6 SWS).....	1078
M.Mat.4543: Specialisation in stochastic methods in econometrics (9 C, 6 SWS).....	1080
M.Mat.4544: Specialisation in mathematical statistics (9 C, 6 SWS).....	1082
M.Mat.4545: Specialisation in statistical modelling and inference (9 C, 6 SWS).....	1084
M.Mat.4546: Specialisation in multivariate statistics (9 C, 6 SWS).....	1086
M.Mat.4547: Specialisation in statistical foundations of data science (9 C, 6 SWS).....	1088
M.Mat.4641: Aspects of applied and mathematical stochastics (6 C, 4 SWS).....	1124
M.Mat.4642: Aspects of stochastic processes (6 C, 4 SWS).....	1126
M.Mat.4643: Aspects of stochastics methods of econometrics (6 C, 4 SWS).....	1128
M.Mat.4644: Aspects of mathematical statistics (6 C, 4 SWS).....	1130
M.Mat.4645: Aspects of statistical modelling and inference (6 C, 4 SWS).....	1132
M.Mat.4646: Aspects of multivariate statistics (6 C, 4 SWS).....	1134
M.Mat.4647: Aspects of statistical foundations of data science (6 C, 4 SWS).....	1136
M.Mat.4741: Special course in applied and mathematical stochastics (3 C, 2 SWS).....	1172

M.Mat.4742: Special course in stochastic processes (3 C, 2 SWS).....	1174
M.Mat.4743: Special course in stochastic methods of econometrics (3 C, 2 SWS).....	1176
M.Mat.4744: Special course in mathematical statistics (3 C, 2 SWS).....	1178
M.Mat.4745: Special course in statistical modelling and inference (3 C, 2 SWS).....	1180
M.Mat.4746: Special course in multivariate statistics (3 C, 2 SWS).....	1182
M.Mat.4747: Special course in statistical foundations of data science (3 C, 2 SWS).....	1184
M.Mat.4841: Seminar on applied and mathematical stochastics (3 C, 2 SWS).....	1220
M.Mat.4842: Seminar on stochastic processes (3 C, 2 SWS).....	1222
M.Mat.4843: Seminar on stochastic methods of econometrics (3 C, 2 SWS).....	1224
M.Mat.4844: Seminar on mathematical statistics (3 C, 2 SWS).....	1226
M.Mat.4845: Seminar on statistical modelling and inference (3 C, 2 SWS).....	1228
M.Mat.4846: Seminar on multivariate statistics (3 C, 2 SWS).....	1230
M.Mat.4847: Seminar on statistical foundations of data science (3 C, 2 SWS).....	1232
M.Mat.4941: Advanced seminar on applied and mathematical stochastics (3 C, 2 SWS).....	1268
M.Mat.4942: Advanced seminar on stochastic processes (3 C, 2 SWS).....	1270
M.Mat.4943: Advanced seminar on stochastic methods in econometrics (3 C, 2 SWS).....	1272
M.Mat.4944: Advanced seminar on mathematical statistics (3 C, 2 SWS).....	1274
M.Mat.4945: Advanced seminar on statistical modelling and inference (3 C, 2 SWS).....	1276
M.Mat.4946: Advanced seminar on multivariate statistics (3 C, 2 SWS).....	1278
M.Mat.4947: Advanced seminar on statistical foundations of data science (3 C, 2 SWS).....	1280

III. Minor subjects in the graduate programme in Mathematics

1. Astrophysics

In "Astrophysics" as a minor subject the following module has to be completed successfully. Furthermore, all modules with module number B.Phy.55** and M.Phy.55** may be chosen.

Im Nebenfach "Astrophysik" ist folgendes Modul erfolgreich zu absolvieren. Weiterhin stehen alle Module mit Modulnummern B.phy.55** und M.Phy.55** zur Auswahl.

B.Phy.1551: Introduction to Astrophysics (8 C, 6 SWS).....	961
--	-----

2. Business Administration

In "Business Administration" as a minor subject the following modules may be chosen.

Im Nebenfach "Betriebswirtschaftslehre" stehen folgende Module zur Auswahl:

B.WIWI-WIN.0001: Management der Informationssysteme (6 C, 3 SWS).....	991
---	-----

B.WIWI-WIN.0002: Management der Informationswirtschaft (6 C, 6 SWS).....	994
B.WIWI-BWL.0014: Rechnungslegung der Unternehmung (6 C, 4 SWS).....	968
B.WIWI-BWL.0023: Grundlagen der Versicherungstechnik (6 C, 2 SWS).....	969
B.WIWI-BWL.0038: Supply Chain Management (6 C, 2 SWS).....	971
B.WIWI-BWL.0087: International Marketing (6 C, 2 SWS).....	973
M.WIWI-BWL.0001: Finanzwirtschaft (6 C, 4 SWS).....	1289
M.WIWI-BWL.0002: Rechnungslegung nach IFRS (6 C, 4 SWS).....	1291
M.WIWI-BWL.0003: Unternehmensbesteuerung (6 C, 4 SWS).....	1293
M.WIWI-BWL.0004: Financial Risk Management (6 C, 4 SWS).....	1295
M.WIWI-BWL.0006: Seminar in Finanzwirtschaft (6 C, 2 SWS).....	1297
M.WIWI-BWL.0008: Derivate (6 C, 4 SWS).....	1298
M.WIWI-BWL.0023: Performance Management (6 C, 4 SWS).....	1300
M.WIWI-BWL.0034: Logistik- und Supply Chain Management (6 C, 3 SWS).....	1302
M.WIWI-BWL.0133: Banking Supervision (6 C, 2 SWS).....	1304
M.WIWI-BWL.0134: Panel Data Analysis in Marketing (6 C, 2 SWS).....	1306
M.WIWI-QMW.0002: Advanced Statistical Inference (Likelihood & Bayes) (6 C, 4 SWS).....	1307
M.WIWI-QMW.0009: Introduction to Time Series Analysis (6 C, 4 SWS).....	1312
M.WIWI-QMW.0012: Multivariate Time Series Analysis (6 C, 4 SWS).....	1314

3. Chemistry

In "Chemistry" as a minor subject the following module may be chosen. Furthermore all modules in Chemistry out of the graduate programm in Chemistry (module number M.Che.****) can be chosen. Selection of modules out of the undergraduate programme in Chemistry may be selected provided approval through the dean of studies of the Faculty of Chemistry. In this case the Study Office Mathematics must be informed beforehand.

Im Nebenfach "Chemie" stehen folgende Module zur Auswahl. Darüber hinaus können alle Chemie-Module aus dem Master-Studiengang "Chemie" (Modul-Nummern M.Che.****) gewählt werden. Die Belegung von Chemie-Modulen aus dem Bachelor-Studiengang "Chemie" ist mit Zustimmung durch die Studiendekanin oder den Studiendekan der Fakultät für Chemie zulässig. Die Belegung eines solchen Moduls ist dem Studienbüro vorab anzuzeigen.

M.Che.1311: Schwingungsspektroskopie und zwischenmolekulare Dynamik (6 C, 4 SWS).....	996
M.Che.1313: Elektronische Spektroskopie und Reaktionsdynamik (6 C, 4 SWS).....	997
M.Che.1314: Biophysikalische Chemie (6 C, 5 SWS).....	998
M.Che.1315: Chemical Dynamics at Surfaces (6 C, 4 SWS).....	999

4. Computer Science

a.

In "Computer Science" as a minor subject all the modules with module number B.Inf.**** or M.Inf.**** can be chosen with the exception of the following modules.

Im Nebenfach „Informatik“ stehen alle Module mit den Modul-Nummern B.Inf.**** und M.Inf.**** zur Auswahl. Davon abweichend können folgende Module nicht eingebracht werden.

- B.Inf.1101: Grundlagen der Informatik und Programmierung
- B.Inf.1102: Grundlagen der Praktischen Informatik
- B.Inf.1801: Programmierkurs

b.

In addition, following modules may be chosen.

Weiterhin können folgende Module eingebracht werden.

B.Phy.5601: Theoretical and Computational Neuroscience I (3 C, 2 SWS).....	962
B.Phy.5602: Theoretical and Computational Neuroscience II (3 C, 2 SWS).....	963
B.Phy.5651: Advanced Computational Neuroscience (3 C, 2 SWS).....	964
B.Phy.5652: Advanced Computational Neuroscience II (3 C, 2 SWS).....	965
B.Phy.5676: Computer Vision and Robotics (9 C, 6 SWS).....	966
M.Phy.5601: Seminar Computational Neuroscience/Neuroinformatik (4 C, 2 SWS).....	1288

5. Philosophy

In "Philosophy" as a minor subject the following modules can be chosen; for at least one of the selected modules a term paper has to be prepared. Advanced studies modules may be chosen after the respective basic studies module has successfully been completed, only.

Im Nebenfach "Philosophie" stehen folgende Module zur Auswahl; in einem der gewählten Module muss eine Hausarbeit angefertigt werden. Aufbaumodule dürfen nur belegt werden, wenn zuvor die entsprechenden Basismodule erfolgreich abgeschlossen wurden.

B.Phi.01: Basismodul Theoretische Philosophie (9 C, 4 SWS).....	946
B.Phi.02: Basismodul Praktische Philosophie (9 C, 4 SWS).....	948
B.Phi.03: Basismodul Geschichte der Philosophie (9 C, 4 SWS).....	950
B.Phi.05: Aufbaumodul Theoretische Philosophie (10 C, 4 SWS).....	952
B.Phi.06: Aufbaumodul Praktische Philosophie (10 C, 4 SWS).....	954
B.Phi.07: Aufbaumodul Geschichte der Philosophie (10 C, 4 SWS).....	956
B.Phi.18a: Vertiefte Bearbeitung philosophischer Themen für HörerInnen aller Fächer (6 C, 2 SWS).....	958
B.Phi.19a: Spezielle Themen der Philosophie für HörerInnen aller Fächer (3 C, 2 SWS).....	960
M.Phi.101: Ausgewählte Themen der Theoretischen Philosophie (9 C, 4 SWS).....	1282
M.Phi.102: Ausgewählte Themen der Praktischen Philosophie (9 C, 4 SWS).....	1284

M.Phi.103: Ausgewählte Themen der Geschichte der Philosophie (9 C, 4 SWS)..... 1286

6. Physics

In "Physics" as a minor subject all modules with module number B.Phy.**** or M.Phy.*** can be chosen, with the exception of the following module:

Im Nebenfach "Physik" stehen alle Module mit den Modul-Nummer B.Phy.**** oder M.Phy.**** zur Auswahl. Davon abweichend kann folgendes Modul nicht absolviert werden:

- B.Phy.1301 "Rechenmethoden der Physik"

7. Economics

In "Economics" as a minor subject the following modules can be chosen:

Im Nebenfach "Volkswirtschaftslehre" stehen folgende Module zur Auswahl:

B.WIWI-BWL.0023: Grundlagen der Versicherungstechnik (6 C, 2 SWS)..... 969

B.WIWI-VWL.0001: Mikroökonomik II (6 C, 5 SWS)..... 975

B.WIWI-VWL.0002: Makroökonomik II (6 C, 4 SWS)..... 977

B.WIWI-VWL.0005: Grundlagen der internationalen Wirtschaftsbeziehungen (6 C, 4 SWS)..... 979

B.WIWI-VWL.0006: Wachstum und Entwicklung (6 C, 4 SWS)..... 981

B.WIWI-VWL.0007: Einführung in die Ökonometrie (6 C, 6 SWS)..... 983

B.WIWI-VWL.0008: Geldtheorie und Geldpolitik (6 C, 4 SWS)..... 985

B.WIWI-VWL.0010: Einführung in die Institutionenökonomik (6 C, 2 SWS)..... 987

B.WIWI-VWL.0059: Internationale Finanzmärkte (6 C, 4 SWS)..... 989

M.WIWI-BWL.0134: Panel Data Analysis in Marketing (6 C, 2 SWS)..... 1306

M.WIWI-QMW.0002: Advanced Statistical Inference (Likelihood & Bayes) (6 C, 4 SWS)..... 1307

M.WIWI-QMW.0004: Econometrics I (6 C, 6 SWS)..... 1309

M.WIWI-QMW.0005: Econometrics II (6 C, 4 SWS)..... 1311

M.WIWI-QMW.0009: Introduction to Time Series Analysis (6 C, 4 SWS)..... 1312

M.WIWI-QMW.0012: Multivariate Time Series Analysis (6 C, 4 SWS)..... 1314

M.WIWI-VWL.0001: Advanced Microeconomics (6 C, 4 SWS)..... 1316

M.WIWI-VWL.0041: Panel Data Econometrics (6 C, 4 SWS)..... 1318

M.WIWI-VWL.0092: International Trade (6 C, 4 SWS)..... 1321

M.WIWI-VWL.0128: Deep Determinants of Growth and Development (6 C, 2 SWS)..... 1323

IV. Key competencies in the graduate programme in Mathematics

Within the graduate programme in Mathematics, the Unit Mathematics offers the following modules.

Die Lehrereinheit Mathematik bietet im Master-Studiengang "Mathematik" folgende Schlüsselkompetenzmodule an.

B.Mat.0720: Mathematische Anwendersysteme (Grundlagen) (3 C, 2 SWS).....	801
B.Mat.0721: Mathematisch orientiertes Programmieren (6 C, 3 SWS).....	803
B.Mat.0730: Praktikum Wissenschaftliches Rechnen (9 C, 4 SWS).....	805
M.Mat.0731: Advanced practical course in scientific computing (10 C, 4 SWS).....	1031
B.Mat.0740: Stochastisches Praktikum (9 C, 6 SWS).....	807
M.Mat.0741: Advanced practical course in stochastics (10 C, 6 SWS).....	1033
B.Mat.0910: Linux effektiv nutzen (3 C, 2 SWS).....	809
B.Mat.0921: Einführung in TeX/LaTeX und praktische Anwendungen (3 C, 2 SWS).....	811
B.Mat.0922: Mathematics information services and electronic publishing (3 C, 2 SWS).....	813
B.Mat.0923: Scientific Writing (3 C, 2 SWS).....	815
B.Mat.0931: Tutorenttraining (4 C, 2 SWS).....	817
B.Mat.0932: Vermittlung mathematischer Inhalte an ein Fachpublikum (3 C, 2 SWS).....	819
B.Mat.0935: Historische, museumspädagogische und technische Aspekte für den Aufbau, Erhalt und die Nutzung wissenschaftlicher Modellsammlungen (4 C, 2 SWS).....	820
B.Mat.0936: Medienbildung zu mathematischen Objekten und Problemen (4 C, 2 SWS).....	821
B.Mat.0940: Mathematik in der Welt, in der wir leben (3 C, 2 SWS).....	822
B.Mat.0950: Mitgliedschaft in der studentischen oder akademischen Selbstverwaltung (3 C, 1 SWS)...	824
B.Mat.0951: Ehrenamtliches Engagement in einem mathematischen Umfeld (3 C, 1 SWS).....	825
B.Mat.0952: Organisation einer mathematischen Veranstaltung (3 C, 2 SWS).....	826
B.Mat.0970: Betriebspraktikum (8 C).....	827
M.Mat.0971: Internship (10 C).....	1035

V. Master's thesis

By successfully completing a Master's thesis students earn 30 C.

VI. Additional optional modules ("Zusatzmodule") (graduate studies)

In addition to the compulsory, the elective compulsory and the elective modules, additional optional modules can be completed, a distinction is made between two classes.

Es können weitere als die erforderlichen Module als Zusatzmodule absolviert werden. Es wird zwischen den nachstehenden Gruppen unterschieden.

1. Additional optional modules ("Zusatzmodule") in Mathematics (graduate studies)

Upon written request the grades of additional optional modules ("Zusatzmodule") are counted towards the overall grade of the Master's Degree. This option is restricted to modules with numbers B.Mat.**** and M.Mat.**** and it is limited to a total of 30 C. These modules are listed as additional optional courses on the Master's Degree certificate and the Transcript of Records.

Auf Antrag werden Noten von freiwilligen Zusatzleistungen ("Zusatzmodule") in Modulen B.Mat.**** oder M.Mat.**** des Master-Studiengangs Mathematik im Umfang von höchstens 30 C bei der Berechnung des Gesamtergebnisses der Masterprüfung berücksichtigt. Diese Zusatzmodule werden als freiwillige Zusatzleistungen in Zeugnis und Zeugnisergänzung (Diploma Supplement) ausgewiesen.

2. Further additional optional modules (graduate studies)

Beyond the additional modules mentioned in the preceding item, further modules not required for the Master's Degree can be completed. These are listed as additional optional modules ("Zusatzmodule") on the Master's Degree certificate and the Transcript of Records, too. However, the respective grades will **not** count towards the overall grade of the Master's Degree. Pre-approval is required in case a module is not listed in this directory of modules.

Über die in dem vorhergehenden Punkt genannten Zusatzmodule hinaus können weitere, für den Masterabschluss nicht erforderliche Module als Zusatzmodule absolviert werden. Diese werden in Zeugnis und Zeugnisergänzung (Transcript of Records) als freiwillige Zusatzleistungen gelistet, jedoch bei der Berechnung des Gesamtergebnisses der Masterprüfung **nicht** berücksichtigt. Im Fall von Modulen, die nicht in diesem Modulverzeichnis genannt werden, muss die Belegung vorab genehmigt werden.

VII. Modulpakete "Mathematik" im Umfang von 36 C oder 18 C (belegbar ausschließlich im Rahmen eines anderen geeigneten Master-Studiengangs)

This paragraph is addressed to students in non-mathematics M.A. graduate programmes, only.

Die Lehrinheit Mathematik bietet folgende Modulpakete für Studierende anderer Studiengänge an. Studierende des Master-Studiengangs „Mathematik“ können das Modul B.Mat.1400 und die Module der Form B.Mat.2XXX ausschließlich als freiwillige Zusatzprüfungen absolvieren; dabei fließt die Note nicht in das Gesamtergebnis der Masterprüfung im Master-Studiengang „Mathematik“ ein.

1. Zugangsvoraussetzungen

Für die Modulpakete „Mathematik“ im Umfang von 36 C bzw. 18 C gelten folgende gemeinsame Zugangsvoraussetzungen:

Nachweis von Leistungen aus Grundlagen der Mathematik im Umfang von insgesamt wenigstens 33 C, darunter Grundlagen der Analysis im Umfang von insgesamt wenigstens 18 C (z.B. durch die Module B.Mat.0011 und B.Mat.0021) sowie der Analytischen Geometrie und Linearen Algebra im Umfang von insgesamt wenigstens 15 C (z.B. durch die Module B.Mat.0012 und B.Mat.0026). Ferner der Nachweis weiterführender Leistungen der reinen oder angewandten Mathematik im Umfang von insgesamt wenigstens 21 C.

2. Modulpaket "Mathematik" im Umfang von 36 C

Es müssen aus dem nachfolgenden Angebot Module im Umfang von insgesamt wenigstens 36 C erfolgreich absolviert werden. Es können weiterführende mathematische Module des Bachelor-Studiengangs „Mathematik“ der Georg-August-Universität Göttingen (Modulnummern B.Mat.3XXX) oder mathematische Wahlpflichtmodule aus dem Modulverzeichnis des Master-Studiengangs „Mathematik“ der Georg-August-Universität Göttingen (Modulnummern M.Mat.4XXX) absolviert werden. Empfohlen werden folgende Module:

B.Mat.1400: Maß- und Wahrscheinlichkeitstheorie (9 C, 6 SWS)..... 828

B.Mat.2100: Partielle Differenzialgleichungen (9 C, 6 SWS).....	830
B.Mat.2110: Funktionalanalysis (9 C, 6 SWS).....	832
B.Mat.2120: Funktionentheorie (9 C, 6 SWS).....	834
B.Mat.2200: Moderne Geometrie (9 C, 6 SWS).....	836
B.Mat.2210: Zahlen und Zahlentheorie (9 C, 6 SWS).....	838
B.Mat.2300: Numerische Analysis (9 C, 6 SWS).....	840
B.Mat.2310: Optimierung (9 C, 6 SWS).....	842

3. Modulpaket "Mathematik" im Umfang von 18 C

Es müssen aus dem nachfolgenden Angebot Module im Umfang von insgesamt wenigstens 18 C erfolgreich absolviert werden. Es können weiterführende mathematische Module des Bachelor-Studiengangs „Mathematik“ der Georg-August-Universität Göttingen (Modulnummern B.Mat.3XXX) oder mathematische Wahlpflichtmodule aus dem Modulverzeichnis des Master-Studiengangs „Mathematik“ der Georg-August-Universität Göttingen (Modulnummern M.Mat.4XXX) absolviert werden. Empfohlen werden folgende Module:

B.Mat.1400: Maß- und Wahrscheinlichkeitstheorie (9 C, 6 SWS).....	828
B.Mat.2100: Partielle Differenzialgleichungen (9 C, 6 SWS).....	830
B.Mat.2110: Funktionalanalysis (9 C, 6 SWS).....	832
B.Mat.2120: Funktionentheorie (9 C, 6 SWS).....	834
B.Mat.2200: Moderne Geometrie (9 C, 6 SWS).....	836
B.Mat.2210: Zahlen und Zahlentheorie (9 C, 6 SWS).....	838
B.Mat.2300: Numerische Analysis (9 C, 6 SWS).....	840
B.Mat.2310: Optimierung (9 C, 6 SWS).....	842

VIII. Methods of examination and glossary

Methods of examination

As far as in this directory of modules a module description is published in the English language the following mapping applies:

Soweit in diesem Modulverzeichnis Modulbeschreibungen in englischer Sprache veröffentlicht werden, gilt für die verwendeten Prüfungsformen nachfolgende Zuordnung:

- Oral examination = mündliche Prüfung [§ 15 Abs. 8 APO]
- Written examination = Klausur [§ 15 Abs. 9 APO]
- Term paper = Hausarbeit [§ 15 Abs. 11 APO]
- Presentation = Präsentation [§ 15 Abs. 12 APO]
- Presentation and written report = Präsentation mit schriftlicher Ausarbeitung [§ 15 Abs. 12 APO]

Glossary

APO = Allgemeinen Prüfungsordnung für Bachelor- und Master-Studiengänge sowie sonstige Studienangebote an der Universität Göttingen

PStO = Prüfungs- und Studienordnung für den Bachelor/Master-Studiengang "Mathematik"

WLH = Weekly lecture hours = SWS

Programme coordinator = Studiengangsbeauftragte/r

Georg-August-Universität Göttingen		6 C
Module B.Inf.1236: Machine Learning		4 WLH
Learning outcome, core skills: Students <ul style="list-style-type: none"> • learn concepts and techniques of machine learning and understand their advantages and disadvantages compared with alternative approaches • learn techniques of supervised learning for classification and regression • learn techniques of unsupervised learning for density estimation, dimensionality reduction and clustering • implement machine learning algorithms like linear regression, logistic regression, kernel methods, tree-based methods, neural networks, principal component analysis, k-means and Gaussian mixture models • solve practical data science problems using machine learning methods 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Machine Learning (Lecture) Bishop: Pattern recognition and machine learning. https://cs.ugoe.de/prml		2 WLH
Examination: Written examination (90 minutes) Examination prerequisites: B.Inf.1236.Ex: At least 50% of homework exercises solved and N-1 attempts presented to tutors Examination requirements: Knowledge of the working principles, advantages and disadvantages of the machine learning methods covered in the lecture		6 C
Course: Machine Learning - Exercise (Exercise) <i>Contents:</i> Students present their solutions of the homework exercises to tutors and discuss them with their tutors.		2 WLH
Admission requirements: none	Recommended previous knowledge: Knowledge of basic linear algebra and probability English language proficiency at level B2 (CEFR)	
Language: English	Person responsible for module: Prof. Dr. Alexander Ecker	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 4	
Maximum number of students: 100		

Georg-August-Universität Göttingen Module B.Inf.1237: Deep Learning		6 C 4 WLH
Learning outcome, core skills: Students <ul style="list-style-type: none"> • learn concepts and techniques of deep learning and understand their advantages and disadvantages compared to alternative approaches • learn to solve practical data science problems using deep learning • implement deep learning techniques like multi-layer perceptrons, convolutional neural networks and other modern deep learning architectures • learn techniques for optimization and regularization of deep neural networks • learn applications of deep neural networks for computer vision tasks such as segmentation and object detection 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Deep Learning for Computer Vision (Lecture) Goodfellow, Bengio, Courville: Deep Learning. https://www.deeplearningbook.org Bishop: Pattern Recognition and Machine Learning. https://cs.ugoe.de/prml		2 WLH
Examination: Written examination (90 minutes) Examination prerequisites: B.Inf.1237.Ex: At least 50% of homework exercises solved and N-1 attempts presented to tutors Examination requirements: Knowledge of basic deep learning techniques, their advantages and disadvantages and approaches to optimization and regularization. Ability to implement these techniques.		6 C
Course: Deep Learning for Computer Vision - Exercise (Exercise) <i>Contents:</i> Students present their solutions of the homework exercises to tutors and discuss them with their tutors.		2 WLH
Admission requirements: none	Recommended previous knowledge: Basic knowledge of linear algebra and probability Completion of B.Inf.1236 Machine Learning or equivalent	
Language: English	Person responsible for module: Prof. Dr. Constantin Pape Prof. Dr. Alexander Ecker	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 5	
Maximum number of students: 100		

Georg-August-Universität Göttingen		5 C
Module B.Inf.1240: Visualization		3 WLH
Learning outcome, core skills: Knowledge of <ul style="list-style-type: none"> • the potentials and limitations of data visualization • the fundamentals of visual perception and cognition and their implications for data visualization. Students can apply these to the design of visualizations and detect manipulative design choices • a broad variety of techniques for visual representation of data, including abstract and high-dimensional data. Students can select appropriate methods on new problems • integration of visualization into the data analysis process, algorithmic generation and interactive methods 		Workload: Attendance time: 42 h Self-study time: 108 h
Course: Visualization (Lecture, Exercise)		3 WLH
Examination: Practical project (2-3 weeks) with presentation and questions during oral exam in groups (approx. 20 minutes per examinee). Examination prerequisites: At least 50% of homework exercises solved. Examination requirements: Knowledge of potentials and limitations of data visualization, fundamentals of visual perception and their implications for good design choices, techniques for visual representation and how to use them.		5 C
Admission requirements: none	Recommended previous knowledge: Foundations of linear algebra and analysis (e.g. B.Mat.0801 and B.Mat.0802) and programming skills (e.g. B.Inf.1842).	
Language: English	Person responsible for module: Prof. Dr. Bernhard Schmitzer	
Course frequency: once a year	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 3 - 6	
Maximum number of students: 50		

Georg-August-Universität Göttingen		6 C
Module B.Inf.1241: Computational Optimal Transport		4 WLH
Learning outcome, core skills: Knowledge of <ul style="list-style-type: none"> • the fundamental notions of optimal transport, and its strengths and limitations as a data analysis tool • the discrete Kantorovich formulation, its convex duality, and Wasserstein distances • classical numerical algorithms, entropic regularization, and their scopes of applicability • examples for data analysis applications. Students can transfer these to new potential applications 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Computational Optimal Transport (Lecture, Exercise)		4 WLH
Examination: Written exam (90 minutes) or oral exam (approx. 20 minutes) Examination prerequisites: At least 50% of homework exercises solved. Examination requirements: Knowledge of Kantorovich duality, Wasserstein distances, standard algorithms and implications for data analysis applications.		6 C
Admission requirements: none	Recommended previous knowledge: Foundations of linear algebra and analysis (e.g. B.Mat.0801 and B.Mat.0802) and programming skills (e.g. B.Inf.1842).	
Language: English	Person responsible for module: Prof. Dr. Bernhard Schmitzer	
Course frequency: once a year	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 4 - 6	
Maximum number of students: 50		

Georg-August-Universität Göttingen Modul B.Mat.0720: Mathematische Anwendersysteme (Grundlagen) <i>English title: Mathematical application software</i>		3 C 2 SWS
Lernziele/Kompetenzen: Lernziele: Nach erfolgreichem Absolvieren des Moduls haben die Studierenden <ul style="list-style-type: none"> • die Grundprinzipien der Programmierung erfasst; • die Befähigung zum sicheren Umgang mit einer Programmiersprache im mathematische Kontext erworben; • Erfahrungen mit elementaren Algorithmen und deren Anwendungen gesammelt. Kompetenzen: Nach erfolgreichem Absolvieren des Moduls haben die Studierenden grundlegende Kenntnisse über eine Programmiersprache im mathematischen Kontext erworben. Sie <ul style="list-style-type: none"> • haben die Fähigkeit erworben, Algorithmen in einer Programmiersprache umzusetzen; • haben gelernt die Programmiersprache zum Lösen von Algebraischen Problemen zu nutzen (Computeralgebra CAS). 		Arbeitsaufwand: Präsenzzeit: 28 Stunden Selbststudium: 62 Stunden
Lehrveranstaltung: Blockkurs <i>Inhalte:</i> Blockkurs bestehend aus Vorlesung, Übungen und Praktikum, z.B. "Einführung in Python und Computeralgebra".		2 SWS
Prüfung: Klausur (90 Minuten)		3 C
Prüfungsanforderungen: Grundkenntnisse in einer Programmiersprache mit Fokus auf mathematisch orientierte Anwendung und Hintergrund.		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: B.Mat.0011, B.Mat.0012	
Sprache: Deutsch	Modulverantwortliche[r]: Studiendekan*in	
Angebotshäufigkeit: jedes Wintersemester	Dauer: 1 Semester	
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: Bachelor: 1 - 6; Master: 1 - 4	
Maximale Studierendenzahl: nicht begrenzt		
Bemerkungen: <ul style="list-style-type: none"> • Dozent/in: Lehrpersonen des Instituts für Numerische und Angewandte Mathematik. 		

- Ausschluss: Studierende, die das Modul B.Mat.0721 bereits erfolgreich absolviert haben, dürfen das Modul B.Mat.0720 nicht absolvieren.

Georg-August-Universität Göttingen Modul B.Mat.0721: Mathematisch orientiertes Programmieren <i>English title: Mathematics related programming</i>		6 C 3 SWS
Lernziele/Kompetenzen: Lernziele: Das erfolgreiche Absolvieren des Moduls ermöglicht den Studierenden den sicheren Umgang mit mathematischen Anwendersystemen. Die Studierenden <ul style="list-style-type: none"> • erwerben die Befähigung zum sicheren Umgang mit mathematischen Anwendersystemen, • erfassen die Grundprinzipien der Programmierung, • sammeln Erfahrungen mit elementaren Algorithmen und deren Anwendungen, • verstehen die Grundlagen der Programmierung in einer high-level Programmiersprache, • lernen Kontroll- und Datenstrukturen kennen, • erlernen die Grundzüge des imperativen und funktionalen Programmierens, • setzen Bibliotheken zur Lösung naturwissenschaftlicher Fragestellungen ein, • erlernen verschiedene Methoden der Visualisierung, • beherrschen die Grundtechniken der Projektverwaltung (Versionskontrolle, Arbeiten im Team). Kompetenzen: Nach erfolgreichem Absolvieren des Moduls haben die Studierenden grundlegende Techniken für das Lösen mathematisch/physikalischer Problemstellungen mit der Hilfe einer high-level Programmiersprache erlernt.		Arbeitsaufwand: Präsenzzeit: 42 Stunden Selbststudium: 138 Stunden
Lehrveranstaltung: Blockkurs <i>Inhalte:</i> Blockkurs bestehend aus Vorlesung, Übungen und Praktikum, z.B. "Mathematisch orientiertes Programmieren"		2 SWS
Prüfung: Klausur (90 Minuten) oder mündliche Prüfung (ca. 20 min)		6 C
Prüfungsanforderungen: Nachweis über den Erwerb der folgenden Kenntnisse und Fähigkeiten. Die Teilnehmer/innen weisen grundlegende Techniken für das Lösen mathematisch/physikalischer Problemstellungen mit der Hilfe einer Programmiersprache nach.		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: B.Mat.0011, B.Mat.0012	
Sprache: Deutsch	Modulverantwortliche[r]: Studiendekan*in	
Angebotshäufigkeit: jedes Sommersemester	Dauer: 1 Semester	
Wiederholbarkeit:	Empfohlenes Fachsemester:	

zweimalig	Bachelor: 1 - 6; Master: 1 - 4
Maximale Studierendenzahl: 120	
Bemerkungen: Dozent/in: Lehrpersonen des Instituts für Numerische und Angewandte Mathematik	

Georg-August-Universität Göttingen Modul B.Mat.0730: Praktikum Wissenschaftliches Rechnen <i>English title: Practical course in scientific computing</i>		9 C 4 SWS
Lernziele/Kompetenzen: Lernziele: Nach erfolgreichem Absolvieren des Moduls besitzen die Studierenden praktische Erfahrungen im wissenschaftlichen Rechnen. Sie <ul style="list-style-type: none"> • erstellen größere Programmierprojekte in Einzel- oder Gruppenarbeit; • erwerben und festigen Programmierkenntnisse; • haben Erfahrungen mit grundlegenden Verfahren zur numerischen Lösung von mathematischen Problemen. Kompetenzen: Nach erfolgreichem Absolvieren des Moduls sind die Studierenden in der Lage, <ul style="list-style-type: none"> • mathematische Algorithmen und Verfahren in einer Programmiersprache oder einem Anwendersystem zu implementieren; • spezielle numerische Bibliotheken zu nutzen; • komplexe Programmieraufgaben so zu strukturieren, dass sie effizient in Gruppenarbeit bewältigt werden können. 		Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 214 Stunden
Lehrveranstaltung: Praktikum Wissenschaftliches Rechnen		4 SWS
Prüfung: Präsentation (ca. 30 Minuten) oder Hausarbeit (max. 50 Seiten ohne Anhänge) Prüfungsvorleistungen: Regelmäßige Teilnahme im Praktikum		9 C
Prüfungsanforderungen: <ul style="list-style-type: none"> • Grundkenntnisse der numerischen Mathematik • gute Programmierkenntnisse 		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: B.Mat.0721, B.Mat.1300 Kenntnis des objektorientierten Programmierens	
Sprache: Deutsch	Modulverantwortliche[r]: Studiendekan*in	
Angebotshäufigkeit: jedes Semester	Dauer: 1 Semester	
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: Bachelor: 4 - 6; Master: 1 - 4	
Maximale Studierendenzahl: nicht begrenzt		
Bemerkungen:		

Dozent/in: Lehrpersonen des Instituts für Numerische und Angewandte Mathematik

Georg-August-Universität Göttingen Modul B.Mat.0740: Stochastisches Praktikum <i>English title: Practical course in stochastics</i>		9 C 6 SWS
Lernziele/Kompetenzen: Lernziele: Nach erfolgreichem Absolvieren des Moduls sind die Studierenden mit den grundlegenden Eigenschaften und Methoden einer stochastischen Simulations- und Analyse-Software (z.B. "R" oder Matlab) vertraut. Sie haben in Projektarbeit Spezialkenntnisse in Stochastik erworben. Sie <ul style="list-style-type: none"> • implementieren und interpretieren selbstständig einfache stochastische Problemstellungen in einer entsprechenden Software; • schreiben selbstständig einfache Programme in der entsprechenden Software; • beherrschen einige grundlegende Techniken der statistischen Datenanalyse und stochastischen Simulation, wie etwa der deskriptiven Statistik, der linearen, nichtlinearen und logistischen Regression, der Maximum-Likelihood-Schätzmethode, sowie von verschiedenen Testverfahren und Monte-Carlo-Simulationsmethoden. Kompetenzen: Nach erfolgreichem Absolvieren des Moduls sind die Studierenden in der Lage <ul style="list-style-type: none"> • eine stochastische Simulations- und Analyse-Software auf konkrete stochastische Problemstellungen anzuwenden und die erhaltenen Resultate fachgerecht zu präsentieren; • statistische Daten und ihre wichtige Eigenschaften adäquat zu visualisieren und interpretieren. 		Arbeitsaufwand: Präsenzzeit: 84 Stunden Selbststudium: 186 Stunden
Lehrveranstaltung: Stochastisches Praktikum		6 SWS
Prüfung: Präsentation (ca. 45 Minuten) mit schriftlicher Ausarbeitung (max. 50 Seiten ohne Anhänge)		9 C
Prüfungsanforderungen: Weiterführende Kenntnisse in Stochastik		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: B.Mat.2410	
Sprache: Deutsch	Modulverantwortliche[r]: Studiendekan*in	
Angebotshäufigkeit: jedes Sommersemester	Dauer: 1 Semester	
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: Bachelor: 4 - 6; Master: 1 - 4	
Maximale Studierendenzahl: nicht begrenzt

Dozent/in: Lehrpersonen des Instituts für Mathematische Stochastik

Georg-August-Universität Göttingen Modul B.Mat.0910: Linux effektiv nutzen <i>English title: Effective use of Linux</i>		3 C (Anteil SK: 3 C) 2 SWS
Lernziele/Kompetenzen: Lernziele: Das UNIX-Derivat Linux ist mit Abstand das meistgenutzte Betriebssystem, allerdings nicht auf dem Desktop, sondern in Mobiltelefonen, auf Heimgeräten und auf Servern. Auch MAC-Systeme beruhen auf einem UNIX-System. Diese Modul biete eine Einführung in Grundlagen des Systems und der Netzwerkanbindung von Linux. Der Schwerpunkt liegt in der Nutzung von Linux und der Automation von Aufgaben auf der Commandline. Nach erfolgreichem Absolvieren des Moduls verfügen die Studierenden über fundierte Grundlagenkenntnisse in folgenden Bereichen: <ul style="list-style-type: none"> • Linux als Einzelsystem; • Linux im Netzwerk; • Automatisierung von Aufgaben mit Shellskripten. Kompetenzen: Nach erfolgreichem Absolvieren des Moduls sind die Studierenden in der Lage <ul style="list-style-type: none"> • wesentlichen Abläufe im Linuxsystem zu verstehen; • mit einem Mehrbenutzerbetriebssystem auf der Ebene einfacher Systemverwaltung im Einzel- und im Netzwerkbetrieb umzugehen; • Skripte zur effektiven Aufgabenbewältigung zu erstellen. 		Arbeitsaufwand: Präsenzzeit: 28 Stunden Selbststudium: 62 Stunden
Lehrveranstaltung: Vorlesung mit integrierten Übungen		2 SWS
Prüfung: Klausur (90 Minuten), unbenotet Prüfungsvorleistungen: B.Mat.0910.Ue: Erreichen von mindestens 50% der Übungspunkte		3 C
Prüfungsanforderungen: Grundkenntnisse in der Erstellung von Skripten im Einzel- und Netzwerkbetrieb, sicherer Umgang mit und Zuordnung von Begriffen aus einem Mehrbenutzerbetriebssystem im Einzel- und Netzwerkbetrieb.		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: Sicherer Umgang mit einem Computersystem	
Sprache: Deutsch	Modulverantwortliche[r]: Studiendekan*in	
Angebotshäufigkeit: jedes Sommersemester	Dauer: 1 Semester	
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: Bachelor: 1 - 6; Master: 1 - 4; Promotion: 1 - 6	
Maximale Studierendenzahl: nicht begrenzt		

Bemerkungen:

- Dozent/in: Lehrpersonen des Mathematischen Instituts
- Schlüsselkompetenz im Bereich "EDV/IKT-Kompetenz (IKT=Informations- und Kommunikationstechnologie)", auch für Studierende anderer Fakultäten.

Georg-August-Universität Göttingen Modul B.Mat.0921: Einführung in TeX/LaTeX und praktische Anwendungen <i>English title: Introduction to TeX/LaTeX with applications</i>		3 C (Anteil SK: 3 C) 2 SWS
Lernziele/Kompetenzen: Lernziele: Nach erfolgreichem Absolvieren des Moduls sind die Studierenden mit dem Einsatz von TeX oder LaTeX zur Erstellung von wissenschaftlichen Texten und Vorträgen vertraut. Sie <ul style="list-style-type: none"> • sind vertraut mit ordentlicher Dokumentengliederung; • erstellen Literaturangaben und Querverweise; • erzeugen mathematische Formeln; • erzeugen Grafiken und binden sie ein. Kompetenzen: Nach erfolgreichem Absolvieren des Moduls sind die Studierenden in der Lage, <ul style="list-style-type: none"> • einfache Dokumente mit LaTeX zu erstellen; • ansprechende Vortragsfolien mit LaTeX zu erzeugen. 		Arbeitsaufwand: Präsenzzeit: 28 Stunden Selbststudium: 62 Stunden
Lehrveranstaltung: Blockkurs <i>Inhalte:</i> Einwöchige Blockveranstaltung mit Praktikum		
Prüfung: Hausarbeit (max. 10 Seiten), unbenotet Prüfungsvorleistungen: Regelmäßige Teilnahme an der Veranstaltung Prüfungsanforderungen: Erstellung eines wissenschaftlichen Portfolios mit TeX/LaTeX und der Folien für eine Präsentation mit Beamer-TeX.		3 C
Prüfungsanforderungen: Sicherer Umgang mit den grundlegenden Funktionen von LaTeX und Beamer-TeX		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: Grundkenntnisse im Umgang mit einem Computer.	
Sprache: Deutsch, Englisch	Modulverantwortliche[r]: Studiendekan*in	
Angebotshäufigkeit: jedes Semester	Dauer: 1 Semester	
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: Bachelor: 1 - 6; Master: 1 - 4; Promotion: 1 - 6

<p>Georg-August-Universität Göttingen</p> <p>Module B.Mat.3043: Non-life insurance mathematics</p>	<p>6 C 4 WLH</p>
<p>Learning outcome, core skills:</p> <p>Non-life insurance mathematics deals with models and methods of quantifying risks with both, the occurrence of the loss and its amount showing random patterns. In particular the following problems are to be solved:</p> <ul style="list-style-type: none"> • determining appropriate insurance premiums; • calculate adequate loss reserves; • determine how to allocate risk between policyholder and insurer resp. insurer and reinsurers. <p>The German Actuarial Association (Deutsche Aktuarvereinigung e. V.) has certified this module as element of the training as an actuary („Aktuar DAV“ / „Aktuarin DAV“, cf. www.aktuar.de). To this end, the course is designed in view of current legislative and regulatory provisions of the Federal Republic of Germany.</p> <p>Learning outcome:</p> <p>The aim of the module is to equip students with knowledge in four areas:</p> <ol style="list-style-type: none"> 1. risk models; 2. pricing; 3. reserving; 4. risk sharing. <p>After having successfully completed the module, students are familiar with fundamental terms and methods of non-life insurance mathematics. They</p> <ul style="list-style-type: none"> • are familiar with and able to handle essential definitions and terms within non-life insurance mathematics; • have an overview of the most valuable problem statements of non-life insurance; • understand central aspects of risk theory; • know substantial pricing and reserving methods; • estimate ruin probabilities; • are acquainted with most important reinsurance forms and reinsurance pricing methods. <p>Core skills:</p> <p>After having successfully completed the module, students have acquired fundamental competencies within non-life insurance. They are able to</p> <ul style="list-style-type: none"> • evaluate and quantify fundamental risks; • model the aggregate loss with individual or collective model; • apply a basic inventory of solving approaches; • analyse and develop pricing models which mathematically are state of the art; • apply different reserving methods and calculate outstanding losses; • assess reinsurance contracts. 	<p>Workload:</p> <p>Attendance time: 56 h</p> <p>Self-study time: 124 h</p>
<p>Course: Lecture course with exercise session</p>	<p>4 WLH</p>

Examination: Written examination (120 minutes)	6 C
Examination requirements: Fundamental knowledge of non-life insurance mathematics	
Admission requirements: none	Recommended previous knowledge: B.Mat.1400
Language: English	Person responsible for module: Dean of studies
Course frequency: not specified	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester: Bachelor: 4 - 6; Master: 1 - 4
Maximum number of students: not limited	
Additional notes and regulations: Instructor: External lecturers at the Institute of Mathematical Stochastics Accreditation: By the German Actuarial Association (Deutsche Aktuarvereinigung e. V.), valid until winter semester 2017/18	

<p>Georg-August-Universität Göttingen</p> <p>Module B.Mat.3044: Life insurance mathematics</p>	<p>6 C 4 WLH</p>
<p>Learning outcome, core skills:</p> <p>This module deals with the basics of different branches in life insurance mathematics. In particular, students get to know both the classical deterministic model and the stochastic model as well as how to apply them to problems relevant in the respective branch. On this base the students describe</p> <ul style="list-style-type: none"> • essential notions of present values; • premiums and their present values; • the actuarial reserve. <p>The German Actuarial Association (Deutsche Aktuarvereinigung e. V.) has certified this module as element of the training as an actuary („Aktuar DAV“ / „Aktuarin DAV“, cf. www.aktuar.de). To this end, the course is designed in view of current legislative and regulatory provisions of the Federal Republic of Germany.</p> <p>Learning outcome:</p> <p>After having successfully completed the module, students are familiar with fundamental terms and methods of life insurance mathematics. In particular they</p> <ul style="list-style-type: none"> • assess cashflows in terms of financial and insurance mathematics; • apply methods of life insurance mathematics to problems from theory and practise; • characterise financial securities and insurance contracts in terms of cashflows; • have an overview of the most valuable problem statements of life insurance; • understand the stochastic interest structure; • master fundamental terms and notions of life insurance mathematics; • get an overview of most important problems in life insurance mathematics; • understand mortality tables and leaving orders within pension insurance; • know substantial pricing and reserving methods; • know the economic and legal requirements of private health insurance in Germany; • are acquainted with per-head loss statistics, present value factor calculation and biometric accounting principles. <p>Core skills:</p> <p>After having successfully completed the module, students have acquired fundamental competencies within life insurance. They are able to</p> <ul style="list-style-type: none"> • assess cashflows with respect to both collateral and risk under deterministic interest structure; • calculate premiums and provisions in life-, health- and pension-insurance; • understand the actuarial equivalence principle as base of actuarial valuation in life insurance; • apply and understand the actuarial equivalence principle for calculating premiums, actuarial reserves and ageing provisions; • calculate profit participation in life insurance; • master premium calculation in health insurance; 	<p>Workload:</p> <p>Attendance time: 56 h</p> <p>Self-study time: 124 h</p>

<ul style="list-style-type: none"> • calculate present value and settlement value of pension obligations; • find mathematical solutions to practical questions in life, health and pension insurance. 	
Course: Lecture course with exercises	4 WLH
Examination: Written examination (120 minutes)	6 C
Examination requirements: Fundamental knowledge of life insurance mathematics	
Admission requirements: none	Recommended previous knowledge: B.Mat.1400
Language: English	Person responsible for module: Dean of studies

Georg-August-Universität Göttingen Module B.Mat.3344: Advances in mathematical statistics	9 C 6 WLH
<p>Learning outcome, core skills:</p> <p>Learning outcome:</p> <p>The successful completion of modules of the cycle "Mathematical statistics" enables students to learn methods, concepts, theories and applications in the area of "Mathematical statistics". During the course of the cycle students will be successively introduced to current research topics and able to carry out independent contributions to research (e. g. within the scope of a Master's thesis). Depending on the current course offer the following content-related competencies may be pursued. Students</p> <ul style="list-style-type: none"> • are familiar with the most important methods of mathematical statistics like estimates, testing, confidence propositions and classification and use them in simple models of mathematical statistics; • evaluate statistical methods mathematically precisely via suitable risk and loss concepts; • analyse optimality characteristics of statistical estimate methods via lower and upper bounds; • analyse the error rates of statistical testing and classification methods based on the Neyman Pearson theory; • are familiar with basic statistical distribution models that base on the theory of exponential indexed families; • know different techniques to obtain lower and upper risk bounds in these models; • are confident in modelling typical data structures of regression; • analyse practical statistical problems in a mathematically accurate way with the techniques learned on the one hand and via computer simulations on the other hand; • are able to mathematically analyse resampling methods and apply them purposively; • are familiar with advanced tools of non-parametric statistics and empirical process theory; • independently become acquainted with a current topic of mathematical statistics; • evaluate complex statistical methods and enhance them in a problem-oriented way. <p>Core skills:</p> <p>After having successfully completed the module, students will be able to</p> <ul style="list-style-type: none"> • handle methods and concepts of the area "Mathematical statistics" confidently; • explain complex issues of the area "Mathematical statistics"; • apply methods of the area "Mathematical statistics" to new problems in this area 	<p>Workload:</p> <p>Attendance time: 84 h</p> <p>Self-study time: 186 h</p>
Course: Lecture course (Lecture)	4 WLH
Examination: Oral examination (approx. 20 minutes) Examination prerequisites:	9 C

B.Mat.3344.Ue: Achievement of at least 50% of the exercise points and presentation, twice, of solutions in the exercise sessions		
Course: Exercise session (Exercise)		2 WLH
Examination requirements: Proof of advancement of knowledge and competencies acquired in the introductory module of the area "Mathematical statistics"		
Admission requirements: none	Recommended previous knowledge: B.Mat.3144	
Language: English	Person responsible for module: Dean of studies	
Course frequency: Usually subsequent to the module B.Mat.3144 "Introduction to mathematical statistics"	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: Bachelor: 6; Master: 1 - 4	
Maximum number of students: not limited		
Additional notes and regulations: Instructor: Lecturers at the Institute of Mathematical Stochastics		

Georg-August-Universität Göttingen Module B.Mat.3345: Advances in statistical modelling and inference	9 C 6 WLH
<p>Learning outcome, core skills: Learning outcome:</p> <p>The successful completion of modules of the cycle "Statistical modelling and inference" enables students to learn methods, concepts, theories and applications in this area. During the course of the cycle students will be successively introduced to current research topics and able to carry out independent contributions to research (e. g. within the scope of a Master's thesis). Depending on the current course offer the following content-related competencies may be pursued. Students</p> <ul style="list-style-type: none"> • are familiar with the fundamental principles of statistics and inference in parametric and non-parametric models: estimation, testing, confidence statements, prediction, model selection and validation; • are familiar with the tools of asymptotic statistical inference; • learn Bayes and frequentist approaches to data modelling and inference, as well as the interplay between both, in particular empirical Bayes methods; • are able to implement Monte Carlo statistical methods for Bayes and frequentist inference and learn their theoretical properties; • become confident in non-parametric (regression) modelling and inference for various types of the data: count, categorical, dependent, etc.; • are able to develop and mathematically evaluate complex statistical models for real data problems. <p>Core skills:</p> <p>After having successfully completed the module, students will be able to</p> <ul style="list-style-type: none"> • handle methods and concepts of the area "Statistical modelling and inference" confidently; • explain complex issues of the area "Statistical modelling and inference"; • apply methods of the area "Statistical modelling and inference" to new problems in this area. 	<p>Workload:</p> <p>Attendance time: 84 h</p> <p>Self-study time: 186 h</p>

<p>Prüfung: Hausarbeit (max. 15 Seiten)</p> <p>Prüfungsvorleistungen:</p> <p>regelmäßige Teilnahme an einem Proseminar; kleinere Leistung mindestens in Textform (max. 2 S.; Protokoll, Kurzreferat o.ä.)</p> <p>Prüfungsanforderungen:</p> <p>Verständnis zentraler Begriffe, Probleme und Theorieansätze der theoretischen Philosophie. Darstellung und Diskussion von Themen der theoretischen Philosophie auf elementarem Niveau mindestens in Textform.</p>	<p>7 C</p>
<p>Prüfung: Essays (insgesamt max. 15 Seiten)</p> <p>Prüfungsvorleistungen:</p> <p>regelmäßige Teilnahme an einem Proseminar; kleinere Leistung mindestens in Textform (max. 2 S.; Protokoll, Kurzreferat o.ä.)</p> <p>Prüfungsanforderungen:</p> <p>Verständnis zentraler Begriffe, Probleme und Theorieansätze der theoretischen Philosophie. Darstellung und Diskussion von Themen der theoretischen Philosophie auf elementarem Niveau mindestens in Textform.</p>	<p>7 C</p>

Prüfung: Klausur (120 Minuten) Prüfungsvorleistungen: regelmäßige Teilnahme an einem Proseminar; kleinere Leistung mindestens in Textform (max. 2 S.; Protokoll, Kurzreferat o.ä.) Prüfungsanforderungen: Verständnis zentraler Begriffe, Probleme und Theorieansätze der theoretischen Philosophie. Darstellung und Diskussion von Themen der theoretischen Philosophie auf elementarem Niveau mindestens in Textform.		7 C
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: keine	
Sprache: Deutsch	Modulverantwortliche[r]: Prof. Dr. Christian Beyer	
Angebotshäufigkeit: jedes Semester; Einführungskurs bevorzugt im Wintersemester	Dauer: 1 Semester	
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: 1 - 3	
Maximale Studierendenzahl: 100		

Georg-August-Universität Göttingen Modul B.Phi.02: Basismodul Praktische Philosophie <i>English title: Basic Studies in Practical Philosophy</i>	9 C 4 SWS
Lernziele/Kompetenzen: 1. In einem Einführungskurs (Vorlesung oder Einführungsseminar) erwerben die Studierenden Kenntnis zentraler Probleme, Grundbegriffe und Theorieansätze der Praktischen Philosophie. Sie überschauen die Teilgebiete, kennen typische Themen und Terminologien sowie einige der wichtigsten Theorieansätze in Grundzügen. 2. In einem Proseminar (Basisseminar) erlangen die Studierenden grundlegende Fähigkeiten, sich mit Sachfragen der Praktischen Philosophie begrifflich präzise und argumentativ auseinander zu setzen, insbesondere: Grundprobleme und -positionen adäquat darzustellen, ethische Argumentationen zu analysieren und auf elementarem Niveau in mündlicher und mindestens in Textform zu diskutieren.	Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 214 Stunden
Lehrveranstaltung: Einführungskurs in die Praktische Philosophie (Vorlesung, Seminar) <i>Angebotshäufigkeit:</i> jedes Semester; Einführungskurs bevorzugt im Wintersemester	2 SWS
Prüfung: Klausur (45 Minuten), unbenotet Prüfungsanforderungen: Verständnis zentraler Begriffe, Probleme und Theorieansätze der praktischen Philosophie und Fähigkeit, diese auf elementarem Niveau argumentativ verständlich darzulegen.	2 C
Lehrveranstaltung: Proseminar zur Praktischen Philosophie Es muss <u>eine</u> der nachfolgenden Prüfungsformen (Klausur, Hausarbeit oder Essays) absolviert werden.	2 SWS
Prüfung: Klausur (120 Minuten) Prüfungsvorleistungen: regelmäßige Teilnahme an einem Proseminar; kleinere Leistung mindestens in Textform (max. 2 S.; Protokoll, Kurzreferat o.ä.) Prüfungsanforderungen: Verständnis zentraler Begriffe, Probleme und Theorieansätze der praktischen Philosophie. Darstellung und Diskussion von Themen der praktischen Philosophie auf elementarem Niveau mindestens in Textform.	7 C
Prüfung: Essays (insgesamt max. 15 Seiten) Prüfungsvorleistungen: regelmäßige Teilnahme an einem Proseminar; kleinere Leistung mindestens in Textform (max. 2 S.; Protokoll, Kurzreferat o.ä.) Prüfungsanforderungen: Verständnis zentraler Begriffe, Probleme und Theorieansätze der praktischen Philosophie. Darstellung und Diskussion von Themen der praktischen Philosophie auf elementarem Niveau mindestens in Textform.	7 C
Prüfung: Hausarbeit (max. 15 Seiten)	7 C

Prüfungsvorleistungen: regelmäßige Teilnahme an einem Proseminar; kleinere Leistung mindestens in Textform (max. 2 S.; Protokoll, Kurzreferat o.ä.)	
Prüfungsanforderungen: Verständnis zentraler Begriffe, Probleme und Theorieansätze der praktischen Philosophie. Darstellung und Diskussion von Themen der praktischen Philosophie auf elementarem Niveau mindestens in Textform.	
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: keine
Sprache: Deutsch	Modulverantwortliche[r]: Prof. Dr. Holmer Steinfath
Angebotshäufigkeit: jedes Semester, Einführungskurs bevorzugt im Wintersemester	Dauer: 1 Semester
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: 1 - 3
Maximale Studierendenzahl: 100	

Georg-August-Universität Göttingen Modul B.Phi.03: Basismodul Geschichte der Philosophie <i>English title: Basic Studies in History of Philosophy</i>	9 C 4 SWS
Lernziele/Kompetenzen: 1. In einem Einführungskurs (Vorlesung oder Einführungsseminar) erwerben die Studierenden einen Überblick über Epochen der Philosophiegeschichte, sie machen eine erste Bekanntschaft mit jeweils zentralen Themenbereichen und einzelnen klassischen Werken. 2. In einem Proseminar (Basisseminar) erlangen die Studierenden Verständnis klassischer Texte der Philosophie sowie Grundfertigkeiten der Analyse eines Textes unter historischen und systematischen Gesichtspunkten.	Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 214 Stunden
Lehrveranstaltung: 1. Einführungskurs in die Geschichte der Philosophie (Vorlesung, Seminar)	2 SWS
Prüfung: Klausur (45 Minuten), unbenotet Prüfungsanforderungen: Überblick über Epochen der Philosophiegeschichte und elementares Verständnis zentraler Themen und klassischer philosophischer Texte sowie Fähigkeit, diese auf elementarem Niveau argumentativ verständlich darzulegen.	2 C
Lehrveranstaltung: 2. Proseminar zur Geschichte der Philosophie Es muss <u>eine</u> der nachfolgenden Prüfungsformen (Klausur, Hausarbeit oder Essays) absolviert werden.	2 SWS
Prüfung: Essays (insgesamt max. 15 Seiten) Prüfungsvorleistungen: regelmäßige Teilnahme an einem Proseminar; kleinere Leistung mindestens in Textform (max. 2 S.; Protokoll, Kurzreferat o.ä.) Prüfungsanforderungen: Überblick über Epochen der Philosophiegeschichte, elementares Verständnis zentraler Themen und klassischer philosophischer Texte. Darstellung und Diskussion philosophiegeschichtlicher Themen auf elementarem Niveau mindestens in Textform.	7 C
Prüfung: Klausur (120 Minuten) Prüfungsvorleistungen: regelmäßige Teilnahme an einem Proseminar; kleinere Leistung mindestens in Textform (max. 2 S.; Protokoll, Kurzreferat o.ä.) Prüfungsanforderungen: Überblick über Epochen der Philosophiegeschichte, elementares Verständnis zentraler Themen und klassischer philosophischer Texte. Darstellung und Diskussion philosophiegeschichtlicher Themen auf elementarem Niveau mindestens in Textform.	7 C
Prüfung: Hausarbeit (max. 15 Seiten) Prüfungsvorleistungen: regelmäßige Teilnahme an einem Proseminar; kleinere Leistung mindestens in Textform (max. 2 S.; Protokoll, Kurzreferat o.ä.)	7 C

Prüfungsanforderungen: Überblick über Epochen der Philosophiegeschichte, elementares Verständnis zentraler Themen und klassischer philosophischer Texte. Darstellung und Diskussion philosophiegeschichtlicher Themen auf elementarem Niveau mindestens in Textform.		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: keine	
Sprache: Deutsch	Modulverantwortliche[r]: Prof. Dr. Bernd Ludwig	
Angebotshäufigkeit: jedes Semester; Einführungskurs bevorzugt im SoSe	Dauer: 1 Semester	
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: 2 - 3	
Maximale Studierendenzahl: 100		

Georg-August-Universität Göttingen Modul B.Phi.05: Aufbauomodul Theoretische Philosophie <i>English title: Advanced Studies in Theoretical Philosophy</i>	10 C 4 SWS
Lernziele/Kompetenzen: Die Studierenden verfügen über fortgeschrittene Kenntnisse ausgewählter Themen und Theorien der theoretischen Philosophie sowie über die Fähigkeit der Darstellung und Diskussion systematischer Positionen und Probleme in mündlicher und mindestens in Textform.	Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 244 Stunden
Lehrveranstaltung: 1. Vorlesung oder Seminar zur theoretischen Philosophie	2 SWS
Lehrveranstaltung: 2. Seminar zur theoretischen Philosophie Zu beiden Lehrveranstaltungen ist je eine Prüfung zu wählen , entweder die kleine Leistung oder eine Modulprüfung in Form einer Hausarbeit, von Essays oder einer Klausur. In welcher Lehrveranstaltung die Prüfung in Form einer kleinen Leistung abgelegt wird und in welcher in Form einer Hausarbeit, von Essays oder einer Klausur, ist frei wählbar.	2 SWS
Prüfung: Kleine Leistung (max. 2 Seiten), unbenotet Prüfungsvorleistungen: regelmäßige Teilnahme, sofern Seminar Prüfungsanforderungen: Eingehende Kenntnis ausgewählter Probleme und Theorien der theoretischen Philosophie und Fähigkeit, diese mindestens in kurzer Textform argumentativ verständlich darzulegen.	3 C
Prüfung: Essays (insgesamt max. 15 Seiten) Prüfungsvorleistungen: regelmäßige Teilnahme, sofern Seminar; kleinere Leistung mindestens in Textform (max. 2 S.; Protokoll, Kurzreferat o.ä.) Prüfungsanforderungen: Eingehende Kenntnis ausgewählter Probleme und Theorien der theoretischen Philosophie. Sachgemäße u. differenzierte Erörterung von Themen der theoretischen Philosophie mindestens in Textform.	7 C
Prüfung: Hausarbeit (max. 15 Seiten) Prüfungsvorleistungen: regelmäßige Teilnahme, sofern Seminar; kleinere Leistung mindestens in Textform (max. 2 S.; Protokoll, Kurzreferat o.ä.) Prüfungsanforderungen: Eingehende Kenntnis ausgewählter Probleme und Theorien der theoretischen Philosophie. Sachgemäße u. differenzierte Erörterung von Themen der theoretischen Philosophie mindestens in Textform.	7 C
Prüfung: Klausur (120 Minuten) Prüfungsvorleistungen: regelmäßige Teilnahme, sofern Seminar; kleinere Leistung mindestens in Textform (max. 2 S.; Protokoll, Kurzreferat o.ä.)	7 C

Prüfungsanforderungen: Eingehende Kenntnis ausgewählter Probleme und Theorien der theoretischen Philosophie. Sachgemäße u. differenzierte Erörterung von Themen der theoretischen Philosophie mindestens in Textform.

Maximale Studierendenzahl:		

nicht begrenzt	
----------------	--

Georg-August-Universität Göttingen Modul B.Phi.19a: Spezielle Themen der Philosophie für HörerInnen aller Fächer <i>English title: Special Philosophical Topics</i>		3 C 2 SWS
Lernziele/Kompetenzen: Studierende aller Fächer erweitern ihre fachlichen Kompetenzen durch ausgewählte Themen mit allgemein philosophischem Charakter z.B. aus den Gebieten der Erkenntnis- und Wissenschaftstheorie, der Sprachphilosophie, der Ethik und der Politischen Philosophie. Die Studierenden besitzen die Fähigkeit, <ul style="list-style-type: none"> • die wesentlichen Aussagen und Argumente in philosophischen Texten zu erfassen, • über philosophische Probleme mit wissenschaftlicher Präzision nachzudenken und • philosophische Positionen in knapper Form mündlich und mindestens in Textform zu präsentieren und zu diskutieren. 		Arbeitsaufwand: Präsenzzeit: 28 Stunden Selbststudium: 62 Stunden
Lehrveranstaltung: Vorlesung, Proseminar, Seminar oder Hauptseminar		
Prüfung: Referat (ca. 20 Min.) mit Ausarbeitung mindestens in Textform (max. 3 Seiten) oder Essay (max. 3 Seiten) oder Klausur (ca. 45 Minuten), unbenotet Prüfungsanforderungen: Verständnis zentraler Begriffe, Probleme und Theorieansätze auf einem Gebiet der Philosophie. Fähigkeit zur strukturierten Darstellung und Diskussion eines eng umgrenzten Themas.		3 C
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: Bei Seminaren und Hauptseminaren: hinreichende Vorkenntnisse auf dem jeweiligen Gebiet (ggf. nach Rücksprache mit den Dozierenden)	
Sprache: Deutsch	Modulverantwortliche[r]: Prof. Dr. Catrin Misselhorn	
Angebotshäufigkeit: jedes Semester	Dauer: 1 Semester	
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: 1 - 6	
Maximale Studierendenzahl: nicht begrenzt		

Georg-August-Universität Göttingen		8 C
Module B.Phy.1551: Introduction to Astrophysics		6 WLH
Learning outcome, core skills: After successful completion of the module students are familiar with the basic concepts of astrophysics in observation and theory. In particular, they <ul style="list-style-type: none"> • have gained an overview of observational techniques in astronomy • understand the basic physics of the formation, structure and evolution of stars and planets have learned about the classification and structure of normal and active galaxies • understand the basic physics of homogeneous cosmology and cosmological structure formation 		Workload: Attendance time: 84 h Self-study time: 156 h
Course: Lecture and exercises for introduction to astrophysics		
Examination: oral (approx. 30 minutes) or written (120 min.) exam Examination prerequisites: At least 50% of the homework of the excercises have to be solved successfully. Examination requirements: Observational techniques, Planets and exoplanets, planet formation, stellar formation, structure and evolution, galaxies, AGN and quasars, cosmology, structure formation		8 C
Admission requirements: none	Recommended previous knowledge: none	
Language: English, German	Person responsible for module: Prof. Dr. Jens Niemeyer	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: three times	Recommended semester: Bachelor: 5 - 6; Master: 1	
Maximum number of students: 120		

Georg-August-Universität Göttingen Modul B.Phy.5601: Theoretical and Computational Neuroscience I <i>English title: Theoretical and Computational Neuroscience I</i>		3 C 2 SWS
Lernziele/Kompetenzen: Nach erfolgreichem Absolvieren des Moduls sollten die Studierenden... <ul style="list-style-type: none"> • ein vertieftes Verständnis folgender Themen entwickelt haben: TCN I: biophysikalische Grundlagen neuronaler Anregbarkeit, mathematische Grundlagen neuronaler Anregbarkeit, Input-Output Beziehungen und Bifurkationen, Klassifizierung, Existenz, Stabilität und Koexistenz synchroner und asynchroner Zustände in spikenden neuronalen Netzwerken; • Methoden und Methodenentwicklung für die Analyse hochdimensionaler Modelle ratenkodierter Einheiten in Feldmodellen verstehen; • die Handhabung von Bifurkationsszenarien und zugehörigen Instabilitäten verstanden haben. 		Arbeitsaufwand: Präsenzzeit: 28 Stunden Selbststudium: 62 Stunden
Lehrveranstaltung: Collective Dynamics Biological Neural Networks I (Vorlesung)		
Von den folgenden Prüfungen ist genau eine erfolgreich zu absolvieren:		
Prüfung: Klausur (120 Minuten)		3 C
Prüfung: Mündlich Mündliche Prüfung (ca. 30 Minuten)		3 C
Prüfung: Vortrag (2 Wochen Vorbereitungszeit) (30 Minuten)		3 C
Prüfungsanforderungen: Grundlagen der Membranbiophysik; Bifurkationen anregbarer Systeme; Verständnis der Grundlagen der Modellierungsansätze der Neurophysik; kollektive Zustände spikender neuronaler Netzwerke; insbesondere Synchronizität; Balanced State; Phase-Locking und diesen Zuständen unterliegenden lokalen und Netzwerkeigenschaften; Netzwerktopologie; Delays; inhibitorische und exzitatorische Kopplung; sparse random networks		
Zugangsvoraussetzungen: keine		Empfohlene Vorkenntnisse: keine
Sprache: Englisch		Modulverantwortliche[r]: Prof. Dr. Fred Wolf
Angebotshäufigkeit: jedes Wintersemester		Dauer: 1 Semester
Wiederholbarkeit: dreimalig		Empfohlenes Fachsemester: Bachelor: 4 - 6; Master: 1
Maximale Studierendenzahl: 90		

Georg-August-Universität Göttingen		3 C 2 SWS
Modul B.Phys.5602: Theoretical and Computational Neuroscience II <i>English title: Theoretical and Computational Neuroscience II</i>		
Lernziele/Kompetenzen: Nach erfolgreichem Absolvieren des Moduls sollten Studierende... <ul style="list-style-type: none"> das vertiefte Verständnis folgender Themen entwickelt haben: TCN II: Grundlagen neuronaler Anregbarkeit, Input-Output Beziehungen bei Einzelneuronen, eindimensionale Feldmodelle (Feature Selectivity, Contrastinvariance), zweidimensionale Feldmodell (Zusammenwirken von kurz- und langreichweitigen Verbindungen sowie lokaler Nichtlinearitäten), Amplitudengleichungen und ihre Lösungen; Methoden und Methodenentwicklung für die Analyse spikender neuronaler Netzwerke mit und ohne Delays, Handhabung von Bifurkationsszenarien und zugehörigen Instabilitäten verstehen. 		Arbeitsaufwand: Präsenzzeit: 28 Stunden Selbststudium: 62 Stunden
Lehrveranstaltung: Collective Dynamics Biological Neural Networks II (Vorlesung)		
Von den folgenden Prüfungen ist genau eine erfolgreich zu absolvieren:		
Prüfung: Klausur (120 Minuten)	3 C	
Prüfung: Mündlich (ca. 30 Minuten)	3 C	
Prüfung: Seminarvortrag (2 Wochen Vorbereitungszeit) (30 Minuten)	3 C	
Prüfungsanforderungen: Ratenmodelle von Einzelneuronen; Feldansatz in der theoretischen Neurophysik; Grundlagen der Bifurkationen anregbarer System; Verständnis der Grundlagen der Modellierungsansätze der Neurophysik; Zusammenhang diskrete/kontinuierliche Modelle; kollektive Zustände ein- und zweidimensionaler Feldmodelle, insbesondere ring model of feature selectivity; orientation preference maps.

Georg-August-Universität Göttingen Modul B.WIWI-BWL.0038: Supply Chain Management <i>English title: Supply Chain Management</i>	6 C 2 SWS
Lernziele/Kompetenzen: Nach erfolgreicher Teilnahme des Moduls sind die Studierenden in der Lage, Instrumente, mit denen Distributionsaufgaben von Industrie- und Handelsunternehmen gelöst und koordiniert werden, anzuwenden, zu beurteilen und bei Bedarf anzupassen. Hierzu zählen insbesondere die gemeinsame Prognose der Nachfrage sowie die koordinierte Bestell- und Bestandspolitik von Handel und Industrie.	Arbeitsaufwand: Präsenzzeit: 28 Stunden Selbststudium: 152 Stunden
Lehrveranstaltung: Supply Chain Management (Vorlesung) <i>Inhalte:</i> 1. Begriffliche Grundlagen des Supply Chain Managements 2. Analyserahmen für die Ausgestaltung der Supply Chain <ul style="list-style-type: none"> • Der Management-Zyklus • Elemente und Strukturen des entscheidungsorientierten Ansatzes • Entscheidungsfelder des Supply Chain Managements • Zielgrößen des Supply Chain Managements • Analyse der Einflussfaktoren 3. Koordination der Supply Chain <ul style="list-style-type: none"> • Begriffliche Grundlagen • Transaktionale versus relationale Koordination • Supplier Relationship Management • Beziehungsstile im Business to Business Geschäft 4. Standortplanung <ul style="list-style-type: none"> • Ziele, Einflussfaktoren und Optionen der Lagerstruktur • Methoden zur Lösung von Standortproblemen 5. Prognose der Nachfrage <ul style="list-style-type: none"> • Elemente eines Prognosesystems • Regressionsanalyse im Rahmen der Kausalanalyse • Grundlagen der Zeitreihenanalyse • Exponentielle Glättung Saisonmodell 6. Bestellmengenplanung <ul style="list-style-type: none"> • Bestellentscheidungen bei deterministischer Nachfrage • Bestellentscheidungen bei stochastischer Nachfrage • Das Joint Economic Lot Size (JELS) Modell 7. Technologische Voraussetzungen <ul style="list-style-type: none"> • Elektronischer Datenaustausch • Standardisierung • RFID 	2 SWS

Prüfung: Klausur (90 Minuten)		6 C
Prüfungsanforderungen: Nachweis von Fähigkeiten, Probleme der wirtschaftsstufenübergreifenden Koordination von Beschaffungs- und Distributionsproblemen zu analysieren. Beherrschung von Instrumenten, mit denen insbesondere die Schnittstelle zwischen Industrie und Handel abgestimmt wird. Kritische Diskussion der Ergebnisse solcher Instrumente.		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: B.WIWI-BWL.0005 Marketing	
Sprache: Deutsch	Modulverantwortliche[r]: Prof. Dr. Waldemar Toporowski	
Angebotshäufigkeit: jedes Sommersemester	Dauer: 1 Semester	
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: 4 - 6	
Maximale Studierendenzahl: nicht begrenzt		
Bemerkungen: Je nach Kapazität findet eine zusätzliche Übung mit Fallstudien statt. Informationen dazu stehen zu Beginn des Semesters im UniVz.		

Georg-August-Universität Göttingen		6 C
Module B.WIWI-BWL.0087: International Marketing		2 WLH
Learning outcome, core skills: After successful attendance the students understand the foundations of international marketing as well as the diverse environments of global markets. They are able to explain and the central elements of the international decision-making process, such as country and entry mode selection. Moreover, they are able to analyze and compare the attractiveness of different countries and recommend tailored marketing program strategies.		Workload: Attendance time: 28 h Self-study time: 152 h
Course: International Marketing (Lecture) <i>Contents:</i> <ul style="list-style-type: none"> • Introduction to international marketing • Social and cultural environments • Political, legal, and regulatory environments • Assessing global marketing opportunities • International marketing strategy (country selection, entry-modes, international marketing mix) • Branding across cultures <p>The course conveys theoretical knowledge which is enriched by case studies. Specific contents are international trade developments, culture and values (incl. approaches by Hofstede, Inglehart, & Schwartz), political risk assessment, legal environments, international marketing research, competitive analysis and strategy (incl. Porter's Five Forces), emerging markets, entry strategy (incl. Uppsala model vs. born global approach), country selection, market entry modes, international marketing mix, and the country-of-origin effect.</p>		2 WLH
Examination: Written examination (90 minutes)		6 C
Examination requirements: The written exam assesses students' understanding of the course content as well as their ability to apply their knowledge to case studies.		
Examples: <ul style="list-style-type: none"> • Comparing different approaches of cultural difference assessment • Assessing a country's competitive environment • Recommending entry modes for different countries

Georg-August-Universität Göttingen Modul B.WIWI-VWL.0001: Mikroökonomik II <i>English title: Microeconomics II</i>	6 C 5 SWS
Lernziele/Kompetenzen: Nach erfolgreicher Absolvierung der Veranstaltung sind Studierende in der Lage: <ul style="list-style-type: none"> • verschiedene Marktformen voneinander zu unterscheiden und deren Wohlfahrtseffekte zu analysieren, • zwischen der Gleichgewichtsanalyse eines einzelnen Marktes und der Analyse des allgemeinen Gleichgewichts aller Märkte zu unterscheiden und selbstständig anzuwenden, • das Prinzip intertemporaler Entscheidungen der Haushalte zu verstehen und in die optimale Entscheidung der Haushalte einzubeziehen, • die grundlegenden Zusammenhänge von Risiko und Versicherungsmärkten zu verstehen und in die optimale Entscheidung der Haushalte einzubeziehen, • die Grundlagen simultaner und sequentieller Spieltheorie zu verstehen und selbstständig anzuwenden, • die Konsequenzen asymmetrischer Informationen für das Verhalten der Marktteilnehmer zu analysieren. 	Arbeitsaufwand: Präsenzzeit: 70 Stunden Selbststudium: 110 Stunden
Lehrveranstaltung: Mikroökonomik II (Vorlesung) <i>Inhalte:</i> <ul style="list-style-type: none"> • Marktgleichgewicht bei vollkommener Konkurrenz und im Monopol: Grafische Analyse des Marktgleichgewichts und der allgemeinen Wohlfahrt in Abhängigkeit von der Marktform. • Monopolistische Preisdifferenzierung: Analyse von Preis-, Mengen- und Wohlfahrtseffekten. • Allgemeines Gleichgewicht: Grafische Analyse des allgemeinen Marktgleichgewichts mithilfe der Edgeworth-Box. Definition des Gesetzes von Walras sowie des ersten und zweiten Satzes der Wohlfahrtsökonomik. • Ersparnis und Investition: Mathematische und grafische Abhandlung der intertemporalen Budgetgleichung der Haushalte sowie der optimalen Konsum- und Produktionsentscheidungen. • Risiko und Versicherung: Mathematische und grafische Analyse der Entscheidung von Haushalten unter Unsicherheit. Einführung der Erwartungsnutzenhypothese und der von-Neumann-Morgenstern-Nutzenfunktion. • Oligopoltheorie: Mathematische und grafische Analyse von Cournot-, Stackelberg- und Bertrand-Gleichgewicht. • Spieltheorie: Spiele in Normalform. Bestimmung dominanter Strategien und Nash-Gleichgewicht. Sequentielle Entscheidungen. Analyse sequentieller Spiele mithilfe des Entscheidungsbaumes. • Asymmetrische Information: Analyse des Verhaltens von Marktteilnehmern im Fall von asymmetrisch verteilter Information. Moralisches Risiko (Moral hazard) und adverse Selektion. 	3 SWS

Lehrveranstaltung: Mikroökonomik II (Tutorium) <i>Inhalte:</i> In den Übungen werden die Inhalte der Vorlesung anhand von Aufgaben wiederholt und vertieft.		2 SWS
Prüfung: Klausur (90 Minuten)		6 C
Prüfungsanforderungen: <ul style="list-style-type: none"> • Aufgaben sind sowohl rechnerisch als auch grafisch und verbal intuitiv zu lösen, • Nachweis grundlegender Kenntnisse des Wettbewerbsgleichgewichts eines Marktes und des allgemeinen Gleichgewichts, insbesondere der Rolle des Preises für die Markträumung, • Nachweis der Fähigkeit zur grafischen und mathematischen Analyse verschiedener Marktformen und deren Wohlfahrtseffekte, • Nachweis grundlegender Kenntnisse der Spieltheorie und Oligopoltheorie und der Fähigkeit der Bestimmung der optimalen Strategie der Marktteilnehmer, • Nachweis der Fähigkeit zur Bewertung der Risikoeinstellung von Marktteilnehmern und der Konsequenzen für die optimale Entscheidung. 		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: Modul B.WIWI-OHP.0007: Mikroökonomik I

Maximale Studierendenzahl: nicht begrenzt		

Georg-August-Universität Göttingen Modul B.WIWI-VWL.0002: Makroökonomik II <i>English title: Macroeconomics II</i>	6 C 4 SWS
Lernziele/Kompetenzen: Die Studierenden: <ul style="list-style-type: none"> • können die außenwirtschaftlichen Beziehungen einer Volkswirtschaft systematisch erfassen, • sind in der Lage, ein gesamtwirtschaftliches Modell durch die Beziehungen zum Ausland zu erweitern und anhand dieses Modells die Wirkung verschiedener wirtschaftspolitischer Maßnahmen in einer offenen Volkswirtschaft zu diskutieren, • kennen die Eigenschaften verschiedener Währungssysteme und können deren Vor- und Nachteile unter Einbeziehung ihres Einflusses auf die Wirkung wirtschaftspolitischer Maßnahmen beurteilen, • verstehen die wesentlichen Herausforderungen der modernen Geld- und Fiskalpolitik und können wirtschaftspolitische Entscheidungsprozesse modelltheoretisch abbilden, • sind mit den Grundlagen der Wachstumsökonomik vertraut und können das Solow-Modell zur Bewertung von langfristigen Zusammenhängen und der Analyse der Quellen des Wirtschaftswachstums heranziehen, • können Mithilfe verschiedener Modellrahmen makroökonomische Argumente nachvollziehen und selbständig analysieren. 	Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 124 Stunden
Lehrveranstaltung: Makroökonomik II (Vorlesung) <i>Inhalte:</i> Die Vorlesung erweitert die makroökonomischen Grundmodelle der Vorlesung Makroökonomik I entlang drei Dimensionen. Einerseits wird die Annahme einer geschlossenen Volkswirtschaft gelockert und die makroökonomischen Prozesse um Außenhandel und Wechselkursdynamiken in einer offenen Volkswirtschaft erweitert. In diesem Kontext werden auch unterschiedliche Wechselkurssysteme diskutiert und die Auswirkungen wirtschaftspolitischer Interventionen analysiert. Des Weiteren werden ausgewählte wirtschaftspolitische Fragestellungen vertiefend analysiert, insbesondere die Interaktionen zwischen wirtschaftspolitischen Entscheidungsträgern und Wirtschaftsakteuren, sowie ausgewählte Fragestellungen der Fiskal- und Geldpolitik. Die Makroökonomik der langen Frist wird durch eine Einführung in die Wachstumstheorie analysiert, wobei insbesondere die Quellen volkswirtschaftlichen Wachstums modelltheoretisch dargestellt werden.	2 SWS
Lehrveranstaltung: Makroökonomik II (Übung) <i>Inhalte:</i> Im Rahmen der begleitenden Übung/Tutorium vertiefen die Studierenden die Kenntnisse aus der Vorlesung anhand ausgewählter theoretischer Fragestellungen und üben die eigenständige Anwendung von Modellen.	2 SWS
Prüfung: Klausur (90 Minuten)	6 C
Prüfungsanforderungen:	

<ul style="list-style-type: none"> • Nachweis von Kenntnissen über die systematische Erfassung der außenwirtschaftlichen Beziehungen einer Volkswirtschaft und von Kenntnissen über deren Bedeutung für die Analyse des gesamtwirtschaftlichen Gleichgewichts und wirtschaftspolitischer Maßnahmen, • Nachweis von Kenntnissen über verschiedene Wechselkurssysteme und deren Bedeutung für die Analyse des gesamtwirtschaftlichen Gleichgewichts und wirtschaftspolitischer Maßnahmen, • Nachweis von Kenntnissen über ausgewählte vertiefende Fragen der Fiskal- und Geldpolitik, • Nachweis von Kenntnissen des Grundmodells der Wachstumsökonomik und volkswirtschaftlicher Zusammenhänge in der langen Frist, • die Studierenden zeigen, dass sie in der Lage sind, mit verschiedenen gesamtwirtschaftlichen Modellen analytisch und grafisch zu arbeiten, die dahinterstehenden Annahmen zu reflektieren sowie die sich ergebenden Unterschiede hinsichtlich der Wirkung wirtschaftspolitischer Maßnahmen darstellen und kritisch würdigen zu können.

Maximale Studierendenzahl: nicht begrenzt	

Georg-August-Universität Göttingen Modul B.WIWI-VWL.0007: Einführung in die Ökonometrie <i>English title: Introduction to Econometrics</i>		6 C 6 SWS
Lernziele/Kompetenzen: Das Modul gibt eine umfassende Einführung in die ökonometrische Analyse ökonomischer Fragestellungen. Die Studierenden erlernen mit Hilfe der Methoden linearer Regressionsanalyse erste eigene empirische Studien durchzuführen. Die vermittelten Kompetenzen beinhalten die Spezifikation von ökonometrischen Modellen, die Modellselektion und –schätzung. Darüber hinaus werden Studierende mit ersten Problemen im Bereich der linearen Regression wie beispielsweise Heteroskedastizität und Autokorrelation vertraut gemacht. Dieses Modul bildet das Fundament für weiterführende Ökonometrie Veranstaltungen.		Arbeitsaufwand: Präsenzzeit: 84 Stunden Selbststudium: 96 Stunden
Lehrveranstaltung: Einführung in die Ökonometrie (Vorlesung) <i>Inhalte:</i> <ol style="list-style-type: none"> 1. Einführung in lineare multiple Regressionsmodelle, Modellspezifikation, KQ-Schätzung, Prognose und Modellselektion, Multikollinearität und partielle Regression. 2. Lineares Regressionsmodell mit normalverteilten Störtermen, Maximum-Likelihood-Schätzung, Intervallschätzung, Hypothesentests 3. Asymptotische Eigenschaften des KQ- und GLS Schätzers 4. Lineares Regressionsmodell mit verallgemeinerter Kovarianzmatrix, Modelle mit autokorrelierten und heteroskedastischen Fehlertermen, Testen auf Autokorrelation und Heteroskedastizität. 		2 SWS
Lehrveranstaltung: Einführung in die Ökonometrie (Übung) <i>Inhalte:</i> Die Großübung vertieft die Inhalte der Vorlesung anhand von Rechenaufgaben mit ökonomischen Fragestellungen und Datensätzen. Weiterhin werden theoretische Konzepte aus der Vorlesung detailliert hergeleitet.		2 SWS
Lehrveranstaltung: Einführung in die Ökonometrie (Tutorium) <i>Inhalte:</i> Das Tutorium vertieft die Inhalte der Vorlesung und Großübung anhand von Rechenaufgaben. Ein großer Teil beinhaltet das Schätzen von ökonometrischen Modellen mit realen Daten und mit Hilfe des Softwareprogramms Eviews.		2 SWS
Prüfung: Klausur (90 Minuten)		6 C
Prüfungsanforderungen: Die Studierenden zeigen, dass sie einfache ökonometrische Konzepte verstanden haben. Darüber hinaus sind sie in der Lage, diese auf reale wirtschaftliche Fragestellungen anzuwenden.		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: B.WIWI-OPH.0002 Mathematik B.WIWI-OPH.0006 Statistik	

Sprache: Deutsch	Modulverantwortliche[r]: Prof. Dr. Helmut Herwartz
Angebotshäufigkeit: jedes Semester	Dauer: 1 Semester
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: 3 - 5
Maximale Studierendenzahl: nicht begrenzt	

Georg-August-Universität Göttingen Modul B.WIWI-VWL.0008: Geldtheorie und Geldpolitik <i>English title: Money and International Finance</i>		6 C 4 SWS
Lernziele/Kompetenzen: Nach erfolgreicher Absolvierung der Veranstaltung sind Studierende in der Lage: <ul style="list-style-type: none"> • grundlegende makroökonomische Zusammenhänge zwischen der Geldpolitik und der Realwirtschaft zu verstehen, • die Funktionen des Finanzsystems, die Bedeutung von Zinsen und der Kreditvergabe zu verstehen, • die Transmissionskanäle der Geldpolitik zu verstehen, • die klassischen und neueren Instrumente der Zentralbanken zur Durchführung der Geldpolitik zu analysieren, • die Besonderheiten der Geldpolitik in der Eurozone zu verstehen. 		Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 124 Stunden
Lehrveranstaltung: Geldtheorie und Geldpolitik (Vorlesung) <i>Inhalte:</i> <ol style="list-style-type: none"> 1. Finanzmärkte 2. Finanzmarktinstitutionen 3. Zentralbanken 4. Geldtheorie 		2 SWS
Lehrveranstaltung: Geldtheorie und Geldpolitik (Übung) <i>Inhalte:</i> In den Übungen werden die Inhalte der Vorlesung anhand von Aufgaben wiederholt und vertieft.		2 SWS
Prüfung: Klausur (90 Minuten) Prüfungsvorleistungen: Bis zu drei Einsendehausaufgaben; Länge jeweils bis zu drei maschinengeschriebenen Seiten (Bedingung zur Zulassung zur Klausur ist das Erreichen von 60% der insgesamt erreichbaren Punkte).		6 C
Prüfungsanforderungen: <ul style="list-style-type: none"> • Nachweis fundierter Kenntnisse der Begriffe im Bereich der Geldtheorie und Geldpolitik durch intuitive und analytische Beantwortung von Fragen, • Nachweis der Fähigkeit zur grafischen und mathematischen Analyse der Geldtheorie und Geldpolitik. 		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: B.WIWI-OPH.0008 Makroökonomik I	
Sprache: Deutsch	Modulverantwortliche[r]: Prof. Dr. Tino Berger

zweimalig	3 - 6
Maximale Studierendenzahl: nicht begrenzt	

Georg-August-Universität Göttingen Modul B.WIWI-VWL.0010: Einführung in die Institutionenökonomik <i>English title: Foundations of Institutional Economics</i>	6 C 2 SWS
Lernziele/Kompetenzen: Die Studierenden: <ul style="list-style-type: none"> • kennen verschiedene Definitionen von internen und externen Institutionen, sowie deren Relevanz in der wirtschaftspolitischen Normsetzung, • kennen die Rolle von Eigentumsrechten und deren Durchsetzung in der ökonomischen Theorie und Praxis, • kennen Konzepte von Transaktionskosten und deren Wirkung auf die • Interaktion von Individuen und Firmen auf dem Markt, • kennen die Rolle des Staates bei der Einführung und Durchsetzung externer Institutionen, • kennen Grundlagen der Neuen Politischen Ökonomik und deren Theorie der Demokratie, Bürokratie und Interessengruppe, • kennen institutionenökonomische Analysekonzepte wie die Prinzipal-Agenten-Theorie oder Moral Hazard, sowie experimentelle Forschungsergebnisse zur Institutionenanalyse, • kennen die Rolle und den Wandel von Verhaltensmodellen als wirtschaftspolitisches Instrument. 	Arbeitsaufwand: Präsenzzeit: 28 Stunden Selbststudium: 152 Stunden
Lehrveranstaltung: Einführung in die Institutionenökonomik (Vorlesung) <i>Inhalte:</i> Diese Vorlesung soll die theoretischen Grundlagen der Institutionenökonomik vermitteln und verschiedene (Anwendungs-)Bereiche aufzeigen. Die Vorlesung ist inhaltlich in drei Blöcke unterteilt. Im ersten wird die institutionenökonomische Theorie vermittelt. Dabei wird mit der Abgrenzung zwischen internen und externen Institutionen, sowie ihrer Entwicklung und Bedeutung für das gesellschaftliche Zusammenleben begonnen. Dabei wird auch auf ihre Relevanz in der wirtschaftspolitischen Normsetzung und die Durchsetzungsmechanismen eingegangen. Im Anschluss werden Verfügungsrechte als eine der zentralen externen Institutionen bezüglich Konzept und Umsetzungsform erläutert und analysiert. Die Governancestrukturen sollen mithilfe der drei Akteure Unternehmen, Markt sowie Staat und politischer Prozess vermittelt werden. Dabei werden Theorie und Anwendungsmöglichkeiten von Transaktionskosten und deren Wirkung auf die Interaktion von Individuen und Firmen erörtert. Die Prinzipal-Agenten-Theorie und Moral Hazard dienen dabei als institutionenökonomische Analysekonzepte. Zudem sind die Rolle des Staates bei der Einführung und Durchsetzung externer Institutionen, sowie die Grundlagen der Neuen Politischen Ökonomik und deren Theorien der Demokratie, Bürokratie und Interessengruppen Gegenstand der Vorlesung. Der zweite Block konzentriert sich auf kulturvergleichende Institutionenökonomik. Der Fokus liegt auf dem Varieties of Capitalism-Ansatz von Hall & Soskice. Zudem wird	2 SWS

<p>der Zusammenhang von Institutionen mit wirtschaftlichem Wachstum und Entwicklung vermittelt.</p> <p>Der dritte Block thematisiert behavioral Governance und damit die Anwendungsmöglichkeiten von Institutionenökonomik. Beginnend mit der Rolle und dem Wandel von ökonomischen Verhaltensmodellen und ihrer Relevanz für die Institutionenökonomik wird unter anderem das Verhaltensmodell des homo oeconomicus institutionalis vermittelt. Daran anschließend wird das Regulatory Choice Problem Gegenstand der Vorlesung. Zum Schluss werden das Konzept des Nudging und die bisherigen vielfältigen Anwendungen in der Politik vorgestellt und diskutiert. In diesem Block gibt es einen kurzen Einstieg in die experimentelle Ökonomik als ein Tool der institutionenökonomischen Analyse.</p> <p>Neben der Vermittlung der oben genannten Theorien und Konzepte ist in jeder Vorlesung Platz für die kritische Diskussion mit den Studierenden. Zur weiteren kritischen Auseinandersetzung mit dem vermittelten Inhalt werden zwei Hausaufgaben gestellt. In diesen sollen zum einen bestimmte Konzepte wiedergegeben werden und zum anderen sollen diese in den aktuellen Forschungskontext einbezogen werden.</p>		
<p>Prüfung: Klausur (90 Minuten) Prüfungsvorleistungen: Bearbeitung von zwei Hausaufgaben, von denen mindestens eine bestanden werden muss.</p>	6 C	
<p>Prüfungsanforderungen: In der Klausur sollen die erlernten theoretischen Konzepte wiedergegeben, erklärt und kritische diskutiert bzw. reflektiert werden. Darüber hinaus müssen die Studierenden den Nachweis erbringen in der Lage zu sein diese theoretischen Konzepte auf aktuelle wirtschaftspolitische Fragestellungen anzuwenden.</p>		
<p>Zugangsvoraussetzungen: keine</p>	<p>Empfohlene Vorkenntnisse: B.WIWI-OPH.0007 Mikroökonomik I, B.WIWI-OPH.0008 Makroökonomik I</p>	
<p>Sprache: Deutsch</p>	<p>Modulverantwortliche[r]: Prof. Dr. Kilian Bizer</p>	
<p>Angebotshäufigkeit: unregelmäßig</p>	<p>Dauer: 1 Semester</p>

Georg-August-Universität Göttingen Modul B.WIWI-VWL.0059: Internationale Finanzmärkte <i>English title: International Financial Markets</i>	6 C 4 SWS
Lernziele/Kompetenzen: Nach erfolgreicher Absolvierung der Veranstaltung sind Studenten in der Lage: <ul style="list-style-type: none"> • grundlegende makroökonomische Zusammenhänge auf dem Devisenmarkt zu verstehen und intuitiv wiederzugeben, • das Zusammenspiel von verschiedenen Makrovariablen und ihre Wirkung auf den Wechselkurs zu verstehen, • optimale Investitionsentscheidungen der Investoren selbstständig zu ermitteln, • Bedingungen zu bewerten, unter denen Industrie- und Entwicklungsländer auf dem internationalen Finanzmarkt zusammenarbeiten. 	Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 124 Stunden
Lehrveranstaltung: Internationale Finanzmärkte (Vorlesung) <i>Inhalte:</i> 1. Monetärer Ansatz auf lange Sicht Einfaches monetäres Modell. Die Art und Weise wie Preisanpassungen zu einem langfristigen Gleichgewicht führen. Realzins und Wechselkurs. 2. Asset-Ansatz auf kurze Sicht Kurzfristiges Gleichgewicht am Geldmarkt und am Devisenmarkt. Die Beziehung zwischen Inlandsrenditen, Auslandsrenditen und dem Wechselkurs einschließlich Überschreitung. 3. Zahlungsbilanz Bruttonationaleinkommen, Bruttoinlandsausgaben, Ersparnis und Investitionen in einer geschlossenen / offenen Wirtschaft. Leistungsbilanz und seine Komponenten. Globales Ungleichgewicht und reale Beispiele dafür. 4. Gewinne der finanziellen Globalisierung Das Konzept des externen Reichtums und wie man es berechnet. Die langfristige Budgetbeschränkung und ihre Anwendung für Industrie- und Schwellenländer. Konsumglättung, effiziente Investition, finanzielle Offenheit und Risikostreuung. 5. Fixe und flexible Wechselkurssysteme Feste Wechselkurse, Crawling Peg und flexible Wechselkurse: Vor- und Nachteile. Wirtschaftliche Ähnlichkeit und Kosten asymmetrischer Schocks. Kooperative und nicht kooperative Anpassungen der Zinssätze. 6. Währungsunionen Das Mundell-Fleming-Modell, Geld- und Fiskalpolitik. Die Theorie optimaler Währungsräume. Die Anwendung dieser Theorie auf die Eurozone und Zusammenhang mit der Eurokrise.	2 SWS
Lehrveranstaltung: Internationale Finanzmärkte (Übung) <i>Inhalte:</i>	2 SWS

In den Übungen werden die Inhalte der Vorlesung anhand von Aufgaben wiederholt und vertieft.	
Prüfung: Klausur (90 Minuten)	6 C
Prüfungsanforderungen: <ul style="list-style-type: none"> • Nachweis fundierter Kenntnisse der Begriffe im Bereich der internationalen Finanzen durch intuitive und analytische Beantwortung von Fragen, • Nachweis der Fähigkeit zur mathematischen Herleitung der gewinnoptimierenden Entscheidung von hypothetischen Investoren oder Zentralbanken, • Nachweis der Fähigkeit zur grafischen und mathematischen Analyse der finanziellen Globalisierung. 	
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: B.WIWI-OPH.0008 Makroökonomik I, B.WIWI-VWL.0005: Grundlagen der internationalen Wirtschaftsbeziehungen
Sprache: Deutsch	Modulverantwortliche[r]: Prof. Dr. Tino Berger

Georg-August-Universität Göttingen Modul B.WIWI-WIN.0001: Management der Informationssysteme <i>English title: Management of Business Information Systems</i>	6 C 3 SWS
Lernziele/Kompetenzen: Nach erfolgreicher Teilnahme sind die Studierenden in der Lage: <ul style="list-style-type: none"> • die Phasen einer Anwendungssystementwicklung zu beschreiben sowie dortige Instrumente erläutern und anwenden zu können, • Vorgehensweisen, Ansätze und Werkzeuge zur Entwicklung von Anwendungssystemen zu beschreiben, gegenüberzustellen und vor dem Hintergrund gegebener Problemstellungen zu bewerten, • Elemente von Modellierungstechniken und Gestaltungsmöglichkeiten von Anwendungssystemen zu beschreiben und zu erläutern, • ausgewählte Methoden zur Modellierung von Anwendungssystemen selbstständig anwenden zu können, • Prinzipien der Anwendungssystementwicklung auf gegebene Problemstellungen transferieren zu können, • Modellierungsaufgaben im Themenfeld der Vorlesung eigenständig zu bearbeiten, zu reflektieren und konstruktiv zu bewerten. 	Arbeitsaufwand: Präsenzzeit: 38 Stunden Selbststudium: 142 Stunden
Lehrveranstaltung: Management der Informationssysteme (Vorlesung) <i>Inhalte:</i> Die Veranstaltung Management der Informationssysteme (MIS) beschäftigt sich mit der produktorientierten Gestaltung der betrieblichen Informationsverarbeitung. Unter Produkt wird hier das Anwendungssystem bzw. eine ganze Landschaft aus Anwendungssystemen verstanden, die es zu gestalten, zu modellieren und zu organisieren gilt. Der Fokus der Veranstaltung liegt auf der Vermittlung von Vorgehensweisen sowie Methoden und konkreten Instrumenten, welche es erlauben, Anwendungssysteme logisch-konzeptionell zu gestalten. <ul style="list-style-type: none"> - Grundlagen der Systementwicklung <ul style="list-style-type: none"> • Herausforderungen bei der Einführung einer neuen Software • Vorgehensweisen zur Systementwicklung (z. B. Prototyping) • Grunds. Ansätze der Systementwicklung (z. B. Geschäftsprozessorientierter Ansatz) - Planung- und Definitionsphase <ul style="list-style-type: none"> • Methoden zur Systemplanung (z. B. Portfolio-Analyse) • Methoden zur System-Wirtschaftlichkeitsberechnung (z. B. Kapitalwertmethode) • Lastenhefte • Pflichtenhefte - Entwurfsphase <ul style="list-style-type: none"> • Geschäftsprozessmodell (z. B. Ereignisgesteuerte Prozessketten) • Funktionsmodell (z. B. Anwendungsfall-Diagramm) • Datenmodell (z. B. Entity-Relationship-Modell) 	2 SWS

<ul style="list-style-type: none"> • Objektmodell (z. B. Klassendiagramm) • Gestaltung der Benutzungsoberfläche (Prinzipien / Standards) • Datenbankmodelle <p>- Implementierungsphase</p> <ul style="list-style-type: none"> • Prinzipien des Programmierens • Arten von Programmiersprachen • Übersetzungsprogramme • Werkzeuge (z. B. Anwendungsserver) <p>- Abnahme- und Einführungsphase</p> <ul style="list-style-type: none"> • Qualitätssicherung (z. B. Systemtests) • Prinzipien der Systemeinführung <p>- Wartungs- und Pflegephase</p> <ul style="list-style-type: none"> • Wartungsaufgaben • Portfolio-Analyse 	
<p>Lehrveranstaltung: Management der Informationssysteme (Tutorium)</p> <p><i>Inhalte:</i></p> <ul style="list-style-type: none"> • Vorstellung des grundlegenden Funktionsumfangs ausgewählter Modellierungssoftware, • Einführung in die Grundlagen des Modellierens, • Tutorielle Begleitung bei der Bearbeitung von Fallstudien. 	1 SWS
<p>Prüfung: Klausur (90 Minuten)</p> <p>Prüfungsvorleistungen:</p> <p>Erfolgreiche Bearbeitung von drei Modellierungsfallstudien und Bewertung von Lösungen im Rahmen eines kollegialen Peer-Review-Verfahrens.</p>	6 C
<p>Prüfungsanforderungen:</p> <p>Die Studierenden weisen in der Modulprüfung nach, dass sie:</p> <ul style="list-style-type: none"> • die in der Vorlesung vermittelten Aspekte der Anwendungssystementwicklung erläutern und beurteilen können, • Projekte zur Anwendungssystementwicklung in die vermittelten Phasen einordnen können, • Vorgehensweisen, Ansätze und Werkzeuge zur Entwicklung von Anwendungssystemen auf praktische Problemstellungen transferieren können, • komplexe Aufgabenstellungen mit Hilfe der vermittelten Inhalte analysieren und Lösungsansätze selbstständig aufzeigen können, • Vermittelte Methoden zur Modellierung von Anwendungssystemen notationskonform anwenden können und • in der Vorlesung vermittelten Ansätze auf vergleichbare Problemstellungen im Umfeld betrieblicher Anwendungssysteme übertragen können. 	
<p>Zugangsvoraussetzungen:</p> <p>keine</p>	<p>Empfohlene Vorkenntnisse:</p> <p>Modul B.WIWI-OPH.0003: Informations- und Kommunikationssysteme</p>

Deutsch	Prof. Dr. Lutz M. Kolbe
Angebotshäufigkeit: jedes Semester	Dauer: 1 Semester
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: 3
Maximale Studierendenzahl: nicht begrenzt	
Bemerkungen: Angebotshäufigkeit Das Modul wird in jedem Semester angeboten. Im Wintersemester wird die Vorlesung und Übung regulär gehalten. Im Sommersemester findet nur die Übung statt. Die Vorlesung ist im Selbststudium zu erarbeiten. Grundlage dafür ist die aufgezeichnete Vorlesung des jeweils vorhergehenden Wintersemesters.	

Georg-August-Universität Göttingen Modul M.Che.1311: Schwingungsspektroskopie und zwischenmolekulare Dynamik <i>English title: Vibrational Spectroscopy and Intermolecular Dynamics</i>		6 C 4 SWS
Lernziele/Kompetenzen: <ul style="list-style-type: none"> Die Absolvent*innen dieses Moduls haben vertiefte theoretische Kenntnisse zur Schwingungsspektroskopie und zwischenmolekularen Dynamik, sowie deren Ausstrahlung auf andere Gebiete der Naturwissenschaften erworben und sind in der Lage, quantitative Fragestellungen dazu zu erfassen und zu lösen. Insbesondere verstehen sie harmonische und anharmonische Kopplungen, Intensitätseffekte, fortgeschrittene Symmetrieaspekte und experimentelle Techniken der Schwingungsspektroskopie. Sie können zwischenmolekulare Wechselwirkungen beschreiben, die sich daraus ergebenden Potentialhyperflächen, Aggregatstrukturen und dynamischen Phänomene analysieren und experimentelle Methoden der Spektroskopie von Molekülaggagaten vergleichen. 		Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 124 Stunden
Lehrveranstaltung: Vorlesung mit Übung: Schwingungsspektroskopie und zwischenmolekulare Dynamik		
Prüfung: Klausur (180 Minuten)		6 C
Prüfungsanforderungen: Erfassung und quantitative Lösung von exemplarischen Fragestellungen aus dem Forschungsgebiet mit begrenzten Hilfsmitteln in vorgegebener Zeit, mindestens 50% der Sollpunktzahl.		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: keine	
Sprache: Deutsch, Englisch	Modulverantwortliche[r]: Prof. Dr. Martin Suhm	
Angebotshäufigkeit: i.d.Regel alle zwei Jahre	Dauer: 1 Semester	
Wiederholbarkeit: dreimalig	Empfohlenes Fachsemester: 1 - 2	
Maximale Studierendenzahl: 64		
Bemerkungen: Die aktive Teilnahme an den angebotenen Übungsstunden wird dringend empfohlen.		

Georg-August-Universität Göttingen Modul M.Che.1313: Elektronische Spektroskopie und Reaktionsdynamik <i>English title: Electronic Spectroscopy and Reaction Dynamics</i>		6 C 4 SWS
Lernziele/Kompetenzen: Die Absolvent*innen dieses Moduls haben vertiefte theoretische Kenntnisse zur elektronischen Spektroskopie und Reaktionsdynamik sowie deren Ausstrahlung auf andere Gebiete der Naturwissenschaften erworben und sind in der Lage, quantitative Fragestellungen dazu zu erfassen und zu lösen.		Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 124 Stunden
Lehrveranstaltung: Vorlesung mit Übung: Elektronische Spektroskopie und Reaktionsdynamik		
Prüfung: Klausur (180 Minuten)		6 C
Prüfungsanforderungen: Erfassung und quantitative Lösung von exemplarischen Fragestellungen aus dem Forschungsgebiet mit begrenzten Hilfsmitteln in vorgegebener Zeit, mindestens 50% der Sollpunktzahl.		
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: keine	
Sprache: Deutsch, Englisch	Modulverantwortliche[r]: Prof. Dr. Alec Wodtke	
Angebotshäufigkeit: i.d.Regel alle 2 Jahre	Dauer: 1 Semester

Georg-August-Universität Göttingen		6 C
Module M.Che.1315: Chemical Dynamics at Surfaces		4 WLH
Learning outcome, core skills: The students of this module will achieve a deeper theoretical knowledge of chemical dynamics on surfaces as well as their influence on other fields in natural science, in order that they will be able to approach and solve problems regarding the quantitative questions in this field.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Lecture Combined with Tutorial: Chemical Dynamics at Surfaces		
Examination: Written examination (180 minutes)		6 C
Examination requirements: By Understanding and solving exemplary questions regarding this research field with the help of limited reference material in predetermined time will count as minimum 50 % of the required score		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Alec Wodtke	
Course frequency: normally every 2 years	Duration: 1 semester[s]	
Number of repeat examinations permitted: three times	Recommended semester: 1 - 2	
Maximum number of students: 64		
Additional notes and regulations: Active participation in provided tutorial is recommended.		

Georg-August-Universität Göttingen Modul M.Inf.1112: Effiziente Algorithmen <i>English title: Efficient Algorithms</i>		5 C 3 SWS
Lernziele/Kompetenzen: Erwerb fortgeschrittener Kenntnisse und Fähigkeiten zur Entwicklung und Analyse effizienter Algorithmen und zur Untersuchung der Komplexität von Problemen in unterschiedlichen Anwendungsbereichen.	Arbeitsaufwand: Präsenzzeit: 42 Stunden Selbststudium: 108 Stunden	
Lehrveranstaltung: Vorlesung/Übung <i>Inhalte:</i> Zum Beispiel: Randomisierte und Approximationsalgorithmen, Graphalgorithmen, Onlinealgorithmen, Netzwerkalgorithmen, Neurocomputing, Pattern-Matching-Algorithmen.	3 SWS	
Prüfung: Klausur (90 Min.) oder mündliche Prüfung (ca. 25 Min.). Prüfungsanforderungen: Fähigkeit zum Entwurf von effizienten Algorithmen für gegebene Probleme. Beurteilungskompetenz von deren inherenter Komplexität in den Bereichen der Kerninformatik und ggf. ihren Anwendungen.	5 C	
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: keine	
Sprache: Deutsch, Englisch	Modulverantwortliche[r]: Prof. Dr. Stephan Waack (Prof. Dr. Carsten Damm, Prof. Dr. Anita Schöbel, Prof. Dr. Florentin Andreas Wörgötter)

Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester:	
Maximale Studierendenzahl: 30		

Georg-August-Universität Göttingen Modul M.Inf.1141: Semistrukturierte Daten und XML <i>English title: Semistructured Data and XML</i>		6 C 4 SWS
Lernziele/Kompetenzen: Die Studierenden kennen die Konzepte semistrukturierter Datenmodelle und die Parallelen sowie Unterschiede zum "klassischen" strukturierten, relationalen Datenmodell. Sie können damit für eine Anwendung abschätzen, welche Technologien gegebenenfalls zu wählen und zu kombinieren sind. Die Studierenden verfügen über praktische Grundkenntnisse in den üblichen Sprachen dieses Bereiches. Sie haben einen Überblick über die historische Entwicklung von Modellen und Sprachen im Datenbankbereich und können daran wissenschaftliche Fragestellungen und Vorgehensweisen nachvollziehen.		Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 124 Stunden
Lehrveranstaltung: Semistrukturierte Daten und XML (Vorlesung, Übung)		
Prüfung: Klausur (90 Min.) oder mündliche Prüfung (ca. 25 Min.) Prüfungsanforderungen: Konzepte semistrukturierter Datenmodelle und die Parallelen sowie Unterschiede zum "klassischen" strukturierten, relationalen Datenmodell; Fähigkeit zur Beurteilung, welche Technologien in einer konkreten Anwendung zu wählen und zu kombinieren sind; praktische Grundkenntnisse in den üblichen Sprachen dieses Bereiches; Überblick über die historische Entwicklung von Modellen und Sprachen im Datenbankbereich; Fähigkeit zum Nachvollziehen wissenschaftlicher Fragestellungen und Vorgehensweisen.		6 C
Zugangsvoraussetzungen: Datenbanken	Empfohlene Vorkenntnisse: keine	
Sprache: Deutsch, Englisch	Modulverantwortliche[r]: Prof. Dr. Wolfgang May	
Angebotshäufigkeit: unregelmäßig	Dauer: 1 Semester	
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester:	
Maximale Studierendenzahl: 100		

Georg-August-Universität Göttingen Module M.Inf.1151: Specialisation Softwareengineering: Data Science and Big Data Analytics		5 C 3 WLH
Learning outcome, core skills: The students <ul style="list-style-type: none"> • can define the terms data science, data scientist and big data, and acquire knowledge about the principle of data science and big data analytics • become acquainted with the life cycle of data science projects and know how the life cycle can be applied in practice • gain knowledge about a statistical and machine learning modelling system • gain knowledge about basic statistical tests and how to apply them • gain knowledge about clustering algorithms and how to apply them • gain knowledge about association rules and how to apply them • gain knowledge about regression techniques and how to apply them • gain knowledge about classification techniques and how to apply them • gain knowledge about text analysis techniques and how to apply them • gain knowledge about big data analytics with MapReduce • gain knowledge about advanced in-database analytics 		Workload: Attendance time: 42 h Self-study time: 108 h
Course: Data Science and Big Data Analytics (Lecture, Exercise)		3 WLH
Examination: Klausur (90 Min.) oder mündliche Prüfung (ca. 20 Min.) Examination prerequisites: Successful completion of 50% of each exercise and the conduction of a small analysis project. Examination requirements: Data science, big data, analytics, data science life cycle, statistical tests, clustering, association rules, regression, classification, text analysis, in-database analytics.		5 C
Admission requirements: none	Recommended previous knowledge: Foundations of statistics and stochastic.	
Language: English	Person responsible for module: Prof. Dr. Jens Grabowski	
Course frequency: unregelmäßig	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 30		

Georg-August-Universität Göttingen Module M.Inf.1171: Cloud and Service Computing	5 C 3 WLH
<p>Learning outcome, core skills: Successfully completing the module, students understand</p> <ul style="list-style-type: none"> • hybrid clouds, consisting of private and public clouds • basic web technologies (transfer protocols, markup languages, markup processing, RESTful and SOAP web services) • virtualization technologies (server, storage, and network virtualization) • data services (sharing, management, and analysis) • continuous integration/continuous delivery • container and orchestration in clouds (e.g. Kubernetes, OpenStack Heat) • monitoring of cloud infrastructures • interoperability in clouds (e.g. Helm) • portability and security • microservices • cloud computing workloads <p>On completion of this module students will have a good understanding of the fundamental and up-to-date concepts used in the context cloud computing. This basic knowledge can be leveraged by students to design, implement, and manage service-oriented cloud infrastructures by themselves.</p>	<p>Workload: Attendance time: 42 h Self-study time: 108 h</p>
<p>Course: Cloud and Service Computing (Lecture, Exercise) <i>Contents:</i> Cloud Computing is a method of providing shared computing resources, such as applications, computing, storage, networking, development, and deployment platforms. In cloud computing these resources can be delivered as service to the user. Such Service-oriented infrastructures are the backbone of modern IT systems. They pool resources, enable collaboration between people, and provide complex services to end-users. Everybody who uses today's web applications implicitly relies on sophisticated service-oriented infrastructures. The same is true for users of mobile devices such as tablet computers and smart phones, which provide most of their benefits leveraging services.</p> <p>The key challenges of cloud computing infrastructures are related to scaling services. More specifically large cloud-computing infrastructures require scalability of IT management, programming models, and power consumption. The challenges to scale services lie in the inherent complexity of hardware, software, and the large amount of user requests, which large-scale services are expected to handle. This module teaches methods that address and solve those challenges in practice. Key aspects of the module are the management of IT infrastructures, the management of service landscapes, and programming models for distributed applications.</p> <p>The module covers the virtualization of computing, storage, and network resources as the fundament for scaling. IT management is covered by the discussion of deployment</p>	3 WLH

<p>models, service level agreements. Programming models are covered by discussing RESTful and SOAP web-services.</p> <p>Both, lectures and exercises, keep a close connection to the practical application of the discussed topics. The practical value of service-oriented infrastructures is highlighted in the context of enterprises as well as in the context of science. The methods taught in this module benefit from the lecturers' experiences at GWDG and thus provide exclusive insights into the topic. After successfully attending these modules students will understand the most important aspects to design, implement, and manage internet-scale cloud computing infrastructures.</p>	
<p>Examination: Written exam (90 min) or oral exam (approx. 30 min)</p> <p>Examination requirements:</p> <ul style="list-style-type: none"> • Hybrid and Multi cloud infrastructures • RESTful and SOAP web services • Compute, storage, and network virtualisation • Infrastructure-as-a-service, platform-as-a-service, software-as-a-service • Characteristics of Cloud computing (NIST) • Service life cycle • Service level agreements • Cloud computing workloads (e.g. batch, SaaS, big data, back-end) 	5 C

<p>Admission requirements: none</p>	<p>Recommended previous knowledge:</p> <ul style="list-style-type: none"> • Basic programming skills • Basic knowledge of Linux operating systems
<p>Language: English</p>	<p>Person responsible for module: Prof. Dr. Ramin Yahyapour</p>
<p>Course frequency: each winter semester</p>	<p>Duration: 1 semester[s]</p>
<p>Number of repeat examinations permitted: twice</p>	<p>Recommended semester: Bachelor: 5 - 6; Master: 1 - 4</p>

Georg-August-Universität Göttingen Modul M.Inf.1210: Seminar Algorithmische Methoden und theoretische Konzepte <i>English title: Seminar on Algorithmic Methods and Theoretical Concepts in Computer Science</i>		5 C 2 SWS
Lernziele/Kompetenzen: Erwerb von Kompetenzen bei der selbständigen Erarbeitung und Präsentation von speziellen, forschungsbezogenen Themen zur Theoretischen Informatik und den Algorithmischen Methoden. Beispiele sind Probabilistische Datenmodelle, ihre mathematischen Grundlagen und ihre algorithmische Unterstützung, theoretische Grundlagen der Anwendung Informationstheoretischer Methoden in der Informatik, Methoden der Mustererkennung und des algorithmischen Lernens und ihrer Anwendungen. Überblick über die Modulinhalte: Aktuelle Originalarbeiten aus dem Bereich der theoretischen Informatik und algorithmischer Methoden.		Arbeitsaufwand: Präsenzzeit: 28 Stunden Selbststudium: 122 Stunden
Lehrveranstaltung: Algorithmische Methoden und theoretische Konzepte (Seminar) <i>Inhalte:</i> Aktuelle Originalarbeiten aus dem Bereich der theoretischen Informatik und algorithmischer Methoden.		2 SWS
Prüfung: Vortrag (ca. 45 Min.) mit schriftlicher Ausarbeitung (max. 10 Seiten) Prüfungsanforderungen: Nachweis über den Erwerb von Kompetenzen bei der selbständigen Erarbeitung und Präsentation von forschungsbezogenen Themen zu den Algorithmischen Methoden und fortgeschrittenen theoretischen Konzepten in der Informatik oder einer der Angewandten Informatiken.		5 C
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: keine	
Sprache: Deutsch, Englisch	Modulverantwortliche[r]: Prof. Dr. Stephan Waack (Prof. Dr. Carsten Damm)	
Angebotshäufigkeit: unregelmäßig	Dauer: 1 Semester	
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester:	
Maximale Studierendenzahl: 14		

Georg-August-Universität Göttingen Modul M.Inf.1211: Probabilistische Datenmodelle und ihre Anwendungen <i>English title: Probabilistic Data Models and Applications</i>		6 C 4 SWS
Lernziele/Kompetenzen: In dem Modul erwerben Studierende spezialisierte Kenntnisse zu Auswahl, Entwurf und Anwendungen von Modellen, für die die (parametrisierte) Zufälligkeit der Daten eine wesentliche Komponente der Modellierung ist. Überblick über die Modulinhalte: Zu verarbeitende Daten in verschiedensten Anwendungsbereichen (z. B. Bioinformatik) unterliegen meist statistischen Gesetzmäßigkeiten. Das Modul ist fokussiert auf Methoden zur Erkennung und algorithmischen Ausnutzung solcher typischen Muster durch geeignete probabilistische Modellierung der Daten und auf die Schätzung der Modellparameter. z. B. Vorlesung Algorithmisches Lernen, Vorlesung Datenkompression und Informationstheorie, Probabilistische Datenmodelle in der Angewandten Informatik.		Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 124 Stunden
Lehrveranstaltung: Vorlesungen, Übungen und Seminare zu den vorgenannten Themen		
Prüfung: Klausur (60 Min.) oder mündliche Prüfung (ca. 20 Min.) Prüfungsanforderungen: Nachweis über den Erwerb spezialisierter Kenntnisse und Fähigkeiten zu probabilistischen Datenmodellen, der Komplexität ihrer algorithmischen Unterstützung und ggf. ihrer Anwendung in einer der Angewandten Informatiken oder einem Anwendungsbereich.		6 C
Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: keine	
Sprache: Deutsch, Englisch	Modulverantwortliche[r]: Prof. Dr. Stephan Waack (Prof. Dr. Carsten Damm)	
Angebotshäufigkeit: unregelmäßig	Dauer: 1 Semester	
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester:	
Maximale Studierendenzahl: 30		

Georg-August-Universität Göttingen Modul M.Inf.1213: Algorithmisches Lernen und Mustererkennung <i>English title: Algorithmic Learning and Pattern Recognition</i>		6 C 4 SWS
Lernziele/Kompetenzen: Es werden spezialisierte Kompetenzen im Bereich des algorithmischen Lernens und der Mustererkennung vermittelt. Verständnis der theoretischen Grundlagen und der Probleme bei praktischen Anwendungen.		Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 124 Stunden
Lehrveranstaltung: Algorithmisches Lernen (Vorlesung, Übung) <i>Inhalte:</i> Es werden die Grundlagen des Algorithmischen Lernens vermittelt, prinzipielle Schranken und Möglichkeiten aufgezeigt und einige spezielle Ansätze diskutiert wie z. B. Grundlagen des PAC-Lernens und des PAC-Lernens mit Rauschen auf der Klassifikation. Schlüsselbegriffe wie VC Dimension und Rademacher-Komplexität von Hypothesenklassen die es ermöglichen, sowohl Möglichkeiten als auch Grenzen der Lernbarkeit zu verstehen.		4 SWS
Prüfung: Klausur (60 Min.) oder mündliche Prüfung (ca. 20 Min.) Prüfungsanforderungen: Nachweis über den Erwerb spezialisierter anwendungsorientierter Kenntnisse und Kompetenzen aus dem Bereich des algorithmischen Lernens und der Mustererkennung.		6 C

Maximum number of students: 20	

Georg-August-Universität Göttingen Module M.Inf.2102: Advanced Statistical Learning for Data Science		6 C 4 WLH
Learning outcome, core skills: Students will <ul style="list-style-type: none"> • learn concepts of advanced statistical methods and their scope of applications. These methods comprise the EM algorithm, Markov models, Hidden Markov Models, Markov chain Monte Carlo. • gain a solid understanding of ensemble learning algorithms. In particular, we will address additive tree approaches like boosting and Random Forest algorithms, as well as methods for ensemble optimization • learn strategies for model assessment and selection such as nested cross-validation, Monte Carlo validation, or permutation tests. Moreover, this will comprise measures of model quality and robustness. • acquire practical experience in the interpretation of machine learning models and learn required methods for feature selection, importance, stability, and robustness • learn techniques of statistical network inference, their implementation as well as their application to high-dimensional data. 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Advanced Statistical Learning for Data Science (Lecture) Hastie, et al. Elements of Statistical Learning https://web.stanford.edu/~hastie/ElemStatLearn/ Bishop: Pattern Recognition and Machine Learning. https://cs.ugoe.de/prml		2 WLH
Examination: Written exam (90 min) or oral exam (approx. 20 min) Examination prerequisites: M.Inf.2102.Ex: At least 50% of homework exercises solved. Examination requirements: Knowledge of advanced statistical methods, ensemble learning, model assessment, and interpretation as well as statistical network inference. Evaluate their advantages and disadvantages and the ability to implement and interpret the results of these techniques.		6 C
Course: Statistical Learning in Data Science Exercise (Exercise)		2 WLH
Admission requirements: none	Recommended previous knowledge: Basic knowledge of linear algebra and probability Completion of B.Inf.1236 Machine Learning or equivalent	
Language: English	Person responsible for module: Jun.-Prof. Dr. Anne Christin Hauschild Prof. Dr. Michael Altenbuchinger	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 1 - 3	

Maximum number of students:	
------------------------------------	--

-------------	--

Georg-August-Universität Göttingen Module M.Inf.2201: Probabilistic Machine Learning		9 C 6 WLH
Learning outcome, core skills: After successful completion of the module, students <ul style="list-style-type: none"> • know the principles, paradigms, and challenges of probabilistic reasoning • apply basis principles and tools to perform probabilistic reasoning • manipulate distributions and densities of random variables • apply different methods for inference in probabilistic models (direct solving, sampling, variational inference, Laplace approximation) • apply latent variable models for given problems • perform inference in various forms of Gaussian models using closure properties of the Gaussian family • use graphical models to describe and reason about multivariate distributions of random variables • apply and implement learning algorithms in probabilistic models • can choose from a toolbox of basic algorithms for probabilistic inference on given problems • can implement and debug probabilistic algorithms and inference techniques • apply state of the art deep probabilistic models such as variational autoencoders or normalizing flows 		Workload: Attendance time: 84 h Self-study time: 186 h
Course: Probabilistic Machine Learning (Lecture)		4 WLH
Examination: Written examination (120 minutes) Examination requirements: <ul style="list-style-type: none"> • Ability to use principles and tools of probabilistic reasoning on given problems • Ability to extend and modify existing algorithms of probabilistic inference • Ability to diagnose problems in algorithms of probabilistic reasoning • Ability to mathematically derive results in probabilistic models • Ability to use graphical models to simplify problems of probabilistic reasoning • Knowledge of common models and algorithms of probabilistic inference (Gaussian, Bayesian logistic regression, autoencoders, normalizing flows, and others). • Knowledge of common sampling algorithms (importance sampling, MCMC) 		9 C
Course: Probabilistic Machine Learning – Exercise (Exercise) Bonus % for the final exam can be gathered by successfully solving exercise sheets and defending them to a tutor.		2 WLH
Admission requirements: none	Recommended previous knowledge: <ul style="list-style-type: none"> • Basic knowledge of linear algebra • Basic knowledge of multivariate calculus • Python, in particular numpy • Basic knowledge of probability 	
Language: English	Person responsible for module: Prof. Dr. Fabian Sinz	

	Dr. Johannes Söding
Course frequency: each winter semester	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester: 1 - 4
Maximum number of students: 50	
Additional notes and regulations: The course can be taken in parallel to B.Inf.1237 Deep Learning.	

Georg-August-Universität Göttingen		5 C 2 WLH
Module M.Inf.2241: Current Topics in Machine Learning		
Learning outcome, core skills: After successful completion of the module, students <ul style="list-style-type: none"> • have gained a deeper knowledge in specific topics within the field of machine learning • have improved their oral presentation skills • know how to methodically read and analyse scientific research papers • know how to write an analysis of a specific research field based on their analysis of state-of-the-art research • have improved their ability to work independently in a pre-defined context 		Workload: Attendance time: 28 h Self-study time: 122 h
Course: Current Topics in Machine Learning (Seminar)		2 WLH
Examination: Oral presentation (approx. 30 min.) and term paper (max. 5000 words) Examination requirements: Knowledge in a specific field of machine learning; ability to present the acquired knowledge in a both orally and in a written report.		5 C
Admission requirements: none	Recommended previous knowledge: B.Inf.1236 Machine Learning B.Inf.1237 Deep Learning (the seminar can accompany lecture in the same term)	
Language: English	Person responsible for module: Prof. Dr. Alexander Ecker	
Course frequency: irregular	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 1 - 4	
Maximum number of students: 15		

Georg-August-Universität Göttingen		10 C 4 WLH
Module M.Mat.0731: Advanced practical course in scientific computing		
Learning outcome, core skills: Learning outcome: After having successfully completed the module, students are familiar with the analysis of problems in the area "Scientific computing" arising in practice. They <ul style="list-style-type: none"> • develop large programming projects doing individual or group work; • analyse complex data sets and process them; • use special numerical libraries; • are experienced with advanced methods for the numerical solution of applied problems; • are familiar with basic principles of modular and structured programming in the context of scientific computing. Core skills: After having successfully completed the module, students possess advanced practical experience in the area "Scientific computing". They will be able to <ul style="list-style-type: none"> • identify mathematical problems in applied problems and convert them into a mathematical model; • implement numerical algorithms in a programming language or a user system; • structure complex programming tasks such that they can be efficiently done by group work. 		Workload: Attendance time: 56 h Self-study time: 244 h
Course: Advanced practical course in scientific computing (Internship)		4 WLH
Examination: Term Papermax. 50 pages (not counted appendices), alternatively, presentation (appr. 30 minutes) Examination prerequisites: Regular participation in the practical course		10 C
Examination requirements: <ul style="list-style-type: none"> • analysis and systematisation of applied problems; • knowledge in special methods of optimisation; • good programming skills. 		
Admission requirements: none	Recommended previous knowledge: B.Mat.2300 Proficiency in object oriented programming	
Language: English	Person responsible for module: Dean of studies	
Course frequency: winter or summer semester, on demand	Duration: 1 semester[s]	
Number of repeat examinations permitted:	Recommended semester:	

twice	Master: 1 - 3
Maximum number of students: not limited	
Additional notes and regulations: Instructor: Lecturers at the Institute of Numerical and Applied Mathematics	

Georg-August-Universität Göttingen		10 C 6 WLH
Module M.Mat.0741: Advanced practical course in stochastics		
Learning outcome, core skills: Learning outcome: After having successfully completed the module, students have deepened and expanded their knowledge of a stochastic simulation and analysis software that they acquired in the module "Practical course in stochastics". They have acquired advanced knowledge in project work in stochastics. They <ul style="list-style-type: none"> • autonomously implement and interpret more complex stochastic problems using suitable software; • autonomously write more complex programs using suitable software; • master some advanced methods of statistical data analysis and stochastic simulation like e. g. kernel density estimation, the Bootstrap method, the creation of random numbers, the EM algorithm, survival analysis, the maximum-penalized-likelihood estimation and different test methods. Core skills: After having successfully completed the module, students will be able to <ul style="list-style-type: none"> • handle practical problems with the aid of advanced stochastic methods and the suitable stochastic simulation and analysis software and present the obtained results well; • use advanced visualisation methods for statistical data (e. g. of spatial data); • apply different algorithms to the suitable stochastic problem. 		Workload: Attendance time: 84 h Self-study time: 216 h
Course: Advanced practical course in stochastics (Internship)		6 WLH
Examination: Presentation (appr. 30 minutes) and term paper (max. 50 pages not counted appendices) Examination prerequisites: Regular participation in the practical course		10 C
Examination requirements: Special knowledge in stochastics, especially mastery of complex stochastic simulation and analysis software as well as methods for data analysis		
Admission requirements: none	Recommended previous knowledge: M.Mat.3140	
Language: English	Person responsible for module: Dean of studies	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: Master: 1 - 3	

Maximum number of students:	
------------------------------------	--

not limited

Instructor: Lecturers at the Institute of Mathematical Stochastics

Georg-August-Universität Göttingen		10 C (incl. key comp.: 10 C)
Module M.Mat.0971: Internship		
Learning outcome, core skills: After having successfully completed the module, students have competencies in project-oriented and research-oriented team work as well as in project management. They are familiar with methods, tools and processes of mathematics as well as the organisational and social environment in practice.		Workload: Attendance time: 0 h Self-study time: 300 h
Course: Examination colloquium (Colloquium)		
Examination: Presentation (appr. 20 minutes) and written report (max. 10 pages), not graded Examination prerequisites: Certificate of the successful completion of the posed duties in accordance with the internship contract		10 C
Examination requirements: Successfully handling of the posed duties according to the internship contract between the student and the enterprise.		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Dean of studies	
Course frequency: each semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: Master: 1 - 4; Promotion: 1 - 6	
Maximum number of students: not limited		
Additional notes and regulations: Instructor: Lecturers of the Unit Mathematics		

Georg-August-Universität Göttingen Module M.Mat.3110: Higher analysis	9 C 6 WLH
<p>Learning outcome, core skills: Learning outcome:</p> <p>Weighted differently depending on the current course offer, after having successfully passed the module, students are familiar with basic principles of functional analysis respectively the description of linear elliptical differential equations in functional analysis. They</p> <ul style="list-style-type: none"> • are familiar with the most known examples of function and sequence spaces like spaces of continuous functions, L_p, l_p and Sobolev spaces on bounded and unbounded areas; • identify compactness of operators and analyse the solvability of general linear operator equations, especially of boundary value problems for linear elliptical differential equations with variable coefficients with the aid of the Riesz Fredholm theory; • analyse the regularity of solutions of elliptical boundary value problems inside the domain in question and on its boundary; • use basic theorems of linear operators in Banach spaces, especially the Banach-Steinhaus theorem, the Hahn-Banach theorem and the open mapping theorem; • discuss weak convergence concepts and basic characteristics of dual and double-dual spaces; • are familiar with basic concepts of spectral theory and the spectral theorem for bounded, self-adjoint operators. <p>Core skills:</p> <p>After having successfully completed the module, students will be able to</p> <ul style="list-style-type: none"> • formulate and analyse differential equations and other problems in the language of functional analysis; • identify and describe the relevance of characteristics of functional analysis like choice of a suitable function space, completeness, boundedness or compactness; • evaluate the influence of boundary conditions and function spaces for existence, uniqueness and stability of solutions of differential equations. 	<p>Workload:</p> <p>Attendance time: 84 h</p> <p>Self-study time: 186 h</p>
Course: Functional analysis / Partial differential equations (Lecture)	4 WLH
Examination: Written examination (120 minutes) Examination prerequisites: M.Mat.3110.Ue: Achievement of at least 50% of the exercise points and presentation, twice, of solutions in the exercise sessions	9 C
Course: Functional analysis / Partial differential equations - exercise session (Exercise)	2 WLH
Examination requirements:	

Proof of the advanced knowledge about functional analysis or partial differential equations		
Admission requirements: none	Recommended previous knowledge: B.Mat.0021, B.Mat.0022, B.Mat.1100	
Language: English	Person responsible for module: Dean of studies	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: Bachelor: 4 - 6; Master: 1 - 4	
Maximum number of students: not limited		
Additional notes and regulations:		
<ul style="list-style-type: none"> • Instructor: Lecturers at the Mathematical Institute or at the Institute of Numerical and Applied Mathematics • Written examination: This module can be completed by taking a lecture course counting towards the modules B.Mat.2100 or B.Mat.2110. Compared to the exams of the modules B.Mat.2100 respectively B.Mat.2110, exams of the module "Higher analysis" have a higher level of difficulty and test advanced knowledge. • Exclusions: The module "Higher analysis" cannot be completed by taking a lecture course that has already been accounted in the Bachelor's studies. 		

Georg-August-Universität Göttingen Module M.Mat.3130: Operations research		9 C 6 WLH
Learning outcome, core skills: Learning outcome: The successful completion of the module enables students to learn methods, concepts, theories and applications in the area of the theory of operations research. Depending on the current course offer the following content-related competencies may be pursued. Students <ul style="list-style-type: none"> • are able to identify problems of operations research in application-oriented problems and formulate them as optimisation problems; • know methods for the modelling of application-oriented problems and are able to apply them; • evaluate the target function included in a model and the side conditions on the basis of their particular important characteristics; • analyse the complexity of the particular resulting optimisation problem; • are able to develop optimisation methods for the solution of a problem of operation research or adapt general methods to special problems; • know methods with which the quality of optimal solutions can be estimated to the upper and lower and apply them to the problem in question; • differentiate between accurate solution methods, approximation methods with quality guarantee and heuristics and evaluate different methods on the basis of the quality of the found solutions and their computing time; • interpret the found solutions for the underlying practical problem and evaluate the model and solution method on this basis. Core skills: After having successfully completed the module, students will be able to <ul style="list-style-type: none"> • discuss basic concepts of the area "Operations research"; • explain basic ideas of proof in the area "Operations research"; • identify typical applications in the area "Operations research". 		Workload: Attendance time: 84 h Self-study time: 186 h
Course: Lecture course (Lecture)		4 WLH
Examination: Oral examination appr. 20 minutes, alternatively written examination, 120 minutes Examination prerequisites: M.Mat.3130.Ue: Achievement of at least 50% of the exercise points and presentation, twice, of solutions in the exercise sessions		9 C
Course: Exercise session (Exercise)		2 WLH

Examination: Oral examination (approx. 20 minutes)	6 C
Examination requirements: Proof of the acquisition of special skills and the mastery of advanced competencies in the area "Optimisation"	
Admission requirements: none	Recommended previous knowledge: B.Mat.3334
Language: English	Person responsible for module: Dean of studies
Course frequency: Usually subsequent to the module M.Mat.4534 "Specialisation in optimisation"	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester: Master: 1 - 3
Maximum number of students: not limited	
Additional notes and regulations: Instructor: Lecturers at the Institute of Numerical and Applied Mathematics	

Georg-August-Universität Göttingen Module M.Mat.4637: Aspects of variational analysis	6 C 4 WLH
<p>Learning outcome, core skills: Learning outcome:</p> <p>The successful completion of modules of the cycle "Variational analysis" enables students to learn methods, concepts, theories and applications in variational analysis and continuous optimisation. During the course of the cycle students will be successively introduced to current research topics and able to carry out independent contributions to research (e. g. within the scope of a practical course in scientific computing or a Master's thesis). Depending on the current course offer the following content-related competencies may be pursued. Students</p> <ul style="list-style-type: none"> • understand basic concepts of convex and variational analysis for finite- and infinite-dimensional problems; • master the characteristics of convexity and other concepts of the regularity of sets and functions to evaluate the existence and regularity of the solutions of variational problems; • understand basic concepts of the convergence of sets and continuity of set-valued functions; • understand basic concepts of variational geometry; • calculate and use generalised derivations (subderivatives and subgradients) of non-smooth functions; • understand the different concepts of regularity of set-valued functions and their effects on the calculation rules for subderivatives of non-convex functionals; • analyse constrained and parametric optimisation problems with the help of duality theory; • calculate and use the Legendre-Fenchel transformation and infimal convolutions; • formulate optimality criteria for continuous optimisation problems with tools of convex and variational analysis; • apply tools of convex and variational analysis to solve generalised inclusions that e. g. originate from first-order optimality criteria; • understand the connection between convex functions and monotone operators; • examine the convergence of fixed point iterations with the help of the theory of monotone operators; • deduce methods for the solution of smooth and non-smooth continuous constrained optimisation problems and analyse their convergence; • apply numerical methods for the solution of smooth and non-smooth continuous constrained programs to current problems; • model application problems with variational inequations, analyse their characteristics and are familiar with numerical methods for the solution of variational inequations; • know applications of control theory and apply methods of dynamic programming; • use tools of variational analysis in image processing and with inverse problems; • know basic concepts and methods of stochastic optimisation. <p>Core skills:</p>	<p>Workload:</p> <p>Attendance time: 56 h</p> <p>Self-study time: 124 h</p>

After having successfully completed the module, students will be able to		
<ul style="list-style-type: none"> • conduct scholarly debates about problems of the area "Variational analysis"; • carry out scientific work under supervision in the area "Variational analysis". 		
Course: Lecture course (4 WLH); alternatively lecture course (2 WLH) with exercises/seminar (2 WLH)		4 WLH

During the course of the cycle students will be successively introduced to current research topics and able to carry out independent contributions to research (e. g. within the scope of a practical course in scientific computing or a Master's thesis). Depending on the current course offer the following content-related competencies may be pursued. Students</p> <ul style="list-style-type: none"> • are familiar with the theory of linear partial differential equations, e. g. questions of classification as well as existence, uniqueness and regularity of the solution; • know the basics of the theory of linear integral equations; • are familiar with basic methods for the numerical solution of linear partial differential equations with finite difference methods (FDM), finite element methods (FEM) as well as boundary element methods (BEM); • analyse stability, consistence and convergence of FDM, FEM and BEM for linear problems; • apply methods for adaptive lattice refinement on the basis of a posteriori error approximations; • know methods for the solution of larger systems of linear equations and their preconditioners and parallelisation; • apply methods for the solution of larger systems of linear and stiff ordinary differential equations and are familiar with the problem of differential algebraic problems; • apply available software for the solution of partial differential equations and evaluate the results sceptically; • evaluate different numerical methods on the basis of the quality of the solutions, the complexity and their computing time; • acquire advanced knowledge in the theory as well as development and application of numerical solution strategies in a special area of partial differential equations, e. g. in variation problems with constraints, singularly perturbed problems or of integral equations; • know propositions about the theory of non-linear partial differential equations of monotone and maximally monotone type as well as suitable iterative solution methods. <p>Core skills:</p> <p>After having successfully completed the module, students will be able to</p> <ul style="list-style-type: none"> • present a mathematical topic of current research interest in the area "Numerics of partial differential equations" in a talk; • conduct scholarly debates with reference to current research. 	<p>Workload:</p> <p>Attendance time: 28 h Self-study time: 62 h</p>

Course: Advanced seminar	2 WLH
Examination: Oral Presentation (approx. 75 minutes) Examination prerequisites: Participation in the advanced seminar	3 C
Examination requirements: Autonomous permeation and presentation of complex mathematical issues of current research literature in the area "Numerical methods of partial differential equations"	
Admission requirements: none	Recommended previous knowledge: M.Mat.4533
Language: English	Person responsible for module: Dean of studies
Course frequency: not specified	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester: Master: 1 - 4
Maximum number of students: not limited	
Additional notes and regulations: Instructor: Lecturers at the Institute of Numerical and Applied Mathematics	

Georg-August-Universität Göttingen Module M.Mat.4934: Advanced seminar on optimisation	3 C 2 WLH
<p>Learning outcome, core skills:</p> <p>Learning outcome:</p> <p>The successful completion of modules of the cycle "Optimisation" enables students to learn methods, concepts, theories and applications in the area of "Optimisation", so the discrete and continuous optimisation. During the course of the cycle students will be successively introduced to current research topics and able to carry out independent contributions to research (e. g. within the scope of a practical course in scientific computing or a Master's thesis). Depending on the current course offer the following content-related competencies may be pursued. Students</p> <ul style="list-style-type: none"> • identify optimisation problems in application-oriented problems and formulate these as mathematical programmes; • evaluate the existence and uniqueness of the solution of an optimisation problem; • identify structural characteristics of an optimisation problem, amongst others the existence of a finite candidate set, the structure of the underlying level set; • know which special characteristics of the target function and the constraints (like (virtual) convexity, dc functions) for the development of solution strategies can be utilised; • analyse the complexity of an optimisation problem; • classify a mathematical programme in a class of optimisation problems and know current solution strategies for it; • develop optimisation methods and adapt general methods to special problems; • deduce upper and lower bounds for optimisation problems and understand their meaning; • understand the geometrical structure of an optimisation problem and apply it for solution strategies; • distinguish between proper solution methods, approximation methods with quality guarantee and heuristics and evaluate different methods on the basis of the quality of the found solutions and their computing times; • acquire advanced knowledge in the development of solution strategies on the basis of a special area of optimisation, e. g. integer optimisation, optimisation of networks or convex optimisation; • acquire advanced knowledge for the solution of special optimisation problems of an application-oriented area, e. g. traffic planning or location planning; • handle advanced optimisation problems, like e. g. optimisation problems with uncertainty or multi-criteria optimisation problems. <p>Core skills:</p> <p>After having successfully completed the module, students will be able to</p> <ul style="list-style-type: none"> • present a mathematical topic of current research interest in the area "Optimisation" in a talk; • conduct scholarly debates with reference to current research. 	<p>Workload:</p> <p>Attendance time: 28 h</p> <p>Self-study time: 62 h</p>

Georg-August-Universität Göttingen Modul M.Phi.101: Ausgewählte Themen der Theoretischen Philosophie <i>English title: Selected Topics in Theoretical Philosophy</i>	9 C 4 SWS
Lernziele/Kompetenzen: Das Wahlpflichtmodul dient der Erweiterung der Kenntnisse und Fähigkeiten in einem Wahlbereich der Philosophie. Im 42-C-Master-Fach wird hier ein Schwerpunkt mit vertieften Kenntnissen ausgebildet. Im 78-C-Master-Fach sollen ergänzende Themen studiert werden, die nicht im Bereich des zu wählenden Studienschwerpunktes (s. Module 104-107) liegen. Die Studierenden besitzen vermehrte Kenntnis von Theorieansätzen und umfassendere Problemperspektiven auf Gebieten der Theoretischen Philosophie. Sie kennen unterschiedliche Methoden und Terminologien, können Positionen und Problemstellungen in größere Zusammenhänge einordnen, mit anderen Positionen vergleichen und ihre Relevanz und Leistungsfähigkeit beurteilen. Z.B. können erkenntnistheoretische Ansätze durch zusätzliche Kenntnisse aus der Sprachphilosophie, der Ontologie oder der Philosophie des Geistes adäquater eingeschätzt werden und umgekehrt.	Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 214 Stunden
Lehrveranstaltung: Vorlesung für Fortgeschrittene (= nicht Einführungskurs), Seminar oder Hauptseminar zu einem Thema der theoretischen Philosophie	2 SWS
Von den folgenden Prüfungen ist genau eine erfolgreich zu absolvieren:	
Prüfung: Hausarbeit (max. 15 Seiten) Prüfungsvorleistungen: Eine kleine Leistung mindestens in Textform (max. 3 Seiten) Prüfungsanforderungen: Kenntnisse wichtiger Positionen der Sprachphilosophie, Erkenntnistheorie, Philosophie des Geistes, Wissenschaftsphilosophie oder Metaphysik; Fähigkeit, philosophische Probleme in diesen Bereichen zu behandeln und Lösungsvorschläge unter sachgerechter Abwägung von Argumenten zu diskutieren.	7 C
Prüfung: Mündlich (ca. 30 Minuten) Prüfungsvorleistungen: Eine kleine Leistung mindestens in Textform (max. 3 Seiten) Prüfungsanforderungen: Kenntnisse wichtiger Positionen der Sprachphilosophie, Erkenntnistheorie, Philosophie des Geistes, Wissenschaftsphilosophie oder Metaphysik; Fähigkeit, philosophische Probleme in diesen Bereichen zu behandeln und Lösungsvorschläge unter sachgerechter Abwägung von Argumenten zu diskutieren.	7 C
Lehrveranstaltung: Vorlesung für Fortgeschrittene (= nicht Einführungskurs), Seminar oder Hauptseminar zu einem Thema der theoretischen Philosophie	2 SWS
Prüfung: Eine kleine Leistung mindestens in Textform (max. 3 Seiten), unbenotet Prüfungsanforderungen:	2 C

Fähigkeit, sich mit wichtigen Positionen der Sprachphilosophie, Erkenntnistheorie, Philosophie des Geistes, Wissenschaftsphilosophie oder Metaphysik auseinanderzusetzen und in kurzer schriftlicher Form einzelne Fragen, Probleme oder Lösungsvorschläge argumentativ verständlich darzulegen. Bei der kleinen Leistung kann es sich um ein Protokoll, ein Handout zu einem Referat, die Bearbeitung von Aufgaben oder Fragen zur Textvor- oder Nachbereitung, einen kurzen Essay oder Vergleichbares (je nach Arbeitsform der betreffenden Veranstaltung) handeln.	
---	--

Zugangsvoraussetzungen: keine	Empfohlene Vorkenntnisse: keine
Sprache: Deutsch	Modulverantwortliche[r]: Prof. Dr. Catrin Misselhorn
Angebotshäufigkeit: jedes Semester	Dauer: 1-2 Semester
Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: 1 - 3
Maximale Studierendenzahl: 25	

Bemerkungen: Von den zwei Lehrveranstaltungen darf nur eine in Form einer Vorlesung besucht werden, die andere muss ein Seminar oder Hauptseminar sein.

Georg-August-Universität Göttingen		9 C 4 SWS
Modul M.Phi.102: Ausgewählte Themen der Praktischen Philosophie <i>English title: Selected Topics in Practical Philosophy</i>		
Lernziele/Kompetenzen: Das Wahlpflichtmodul dient der Erweiterung der Kenntnisse und Fähigkeiten in einem Wahlbereich der Philosophie. Im 42-C-Master-Fach wird hier ein Schwerpunkt mit vertieften Kenntnissen ausgebildet. Im 78-C-Master-Fach sollen ergänzende Themen studiert werden, die nicht im Bereich des zu wählenden Studienschwerpunktes (s. Module 104-107) liegen. Die Studierenden besitzen erweiterte Kenntnisse von Theorieansätzen in mehreren Bereichen der Praktischen Philosophie. Sie können ethische und politiktheoretische Positionen und Problemstellungen in größere Zusammenhänge einordnen, unterschiedliche Ansätze vergleichen und ihre Relevanz und Leistungsfähigkeit beurteilen. Im Bereich der Ethik wird z.B. die Kenntnis individuelle ethischer Positionen durch solche der Sozialethik oder der politischen Philosophie ergänzt, durch Ansätze der Metaethik in der Grundlagendimension vertieft oder durch Ansätze der Angewandten Ethik in der Anwendungsdimension konkretisiert. Georg-August-Universität Göttingen Modul M.WIWI-BWL.0003: Unternehmensbesteuerung <i>English title: Company Taxation</i>	6 C 4 SWS
Lernziele/Kompetenzen: Mit Abschluss haben die Studierenden folgende Kompetenzen erworben: <ul style="list-style-type: none"> • Quantifizierung von rechtlichen Steuerbelastungen (steuerzahlungen) mittels geeigneter Verfahren sowie die Fähigkeit, Vor- und Nachteile dieser Verfahren diskutieren zu können, • Berechnung und Interpretation verschiedener Ausprägungen der wirtschaftlichen Steuerbelastung sowie ihrer Würdigung bezüglich ihrer Abhängigkeiten von steuerlichen Parametern, • Kenntnis über die Preiswirkungen der Besteuerung sowie die Fähigkeit, sie in konkreten Sachverhalten herausarbeiten zu können, • Kenntnis über ökonomisch bedeutsame Neutralitäten, die durch die Besteuerung nicht verletzt werden sollten, • Fähigkeit, Verfahren aufzuzeigen und anzuwenden, die eine entscheidungsneutrale Besteuerung gewährleisten, • Beurteilung von konkreten steuerlichen Gewinnermittlungsvorschriften hinsichtlich ihrer Entscheidungswirkungen anhand geeigneter Methoden und • Durchführung von Steuerwirkungsanalysen und steuerlichen Vorteilhaftigkeitsvergleichen. 	Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 124 Stunden
Lehrveranstaltung: Unternehmensbesteuerung (Vorlesung) <i>Inhalte:</i> Die Vorlesung soll den Studierenden die wirtschaftlichen Wirkungen der Besteuerung (Steuerlastlehre und Neutralitätsüberlegungen) sowie die grundlegenden Einflussfaktoren bei Steuerplanungsüberlegungen vermitteln. Hierzu gliedert sich die Vorlesung in vier Kapitel. Im ersten Kapitel erfolgt eine Einordnung der Besteuerung in die betriebswirtschaftliche Entscheidungstheorie. Im zweiten Kapitel werden Verfahren zur Messung von Steuerzahlungen und Steuerbelastungen behandelt und Formen steuerlicher Neutralität unterschieden, die aus ökonomischer Sicht durch die Besteuerung nicht verletzt werden sollten. Im dritten Kapitel werden den Studierenden institutionelle Grundlagen der Unternehmensbesteuerung vermittelt. Das vierte Kapitel bietet eine Einführung in Steuerwirkungsanalysen in Bezug auf rein nationale Sachverhalte.	2 SWS
Lehrveranstaltung: Unternehmensbesteuerung (Übung) <i>Inhalte:</i> Im Rahmen der begleitenden Übung vertiefen, ergänzen und erweitern die Studierenden die in der Vorlesung erworbenen Kenntnisse und Fähigkeiten. Insbesondere werden mit den Studierenden Übungsfälle erarbeitet und diskutiert, mithilfe derer ein tieferes Verständnis für die praktische Anwendung der in der Vorlesung theoretisch vermittelten Inhalte geschaffen wird.	2 SWS

Prüfung: Klausur (90 Minuten)	6 C
Prüfungsanforderungen: Die Studierenden erbringen den Nachweis von Kenntnissen der wirtschaftlichen Wirkungen der Besteuerung sowie grundlegender Steuerplanungsüberlegungen und zeigen, dass sie in der Lage sind, diese auf spezifische Sachverhalte anwenden können. Ferner erbringen die Studierenden den Nachweis über den Erwerb grundlegender Kenntnisse der Besteuerung alternativer Rechtsformen.

Wiederholbarkeit: zweimalig	Empfohlenes Fachsemester: 1 - 3	
Maximale Studierendenzahl: nicht begrenzt		

<p>Georg-August-Universität Göttingen Modul M.WIWI-BWL.0023: Performance Management <i>English title: Performance Management</i></p>	<p>6 C 4 SWS</p>
<p>Lernziele/Kompetenzen: Mit Abschluss haben die Studierenden die konzeptionellen Grundlagen der wesentlichen Kennzahlen im Bereich der wertorientierten Unternehmensführung kennengelernt. Durch die Kombination von wissenschaftlichen Kenntnissen und praxisnahen Inhalten haben die Studierenden Kenntnis über die positiven und negativen Wirkungen von Instrumenten des Value Based Managements erlangt. Des Weiteren haben die Studierenden Kenntnisse über Ansätze zur Messung von Nachhaltigkeit in der Unternehmenssteuerung erworben.</p>	<p>Arbeitsaufwand: Präsenzzeit: 56 Stunden Selbststudium: 124 Stunden</p>
<p>Lehrveranstaltung: Performance Management (Vorlesung) <i>Inhalte:</i> Die Veranstaltung befasst sich mit wesentlichen Aspekten des Performancemanagements unternehmerischer Aktivitäten mit dem Fokus auf einer wertorientierten Perspektive ergänzt durch die zunehmend wichtiger werdende Nachhaltigkeitsperspektive. Die Veranstaltung ist in fünf Hauptkapitel gegliedert. Zuerst werden Grundlagen des Management Accounting und der wertorientierten Unternehmensführung diskutiert. Auf dieser Basis werden Ansätze für die kapitalmarkt- und bilanzorientierte Performancemessung vorgestellt und deren Grenzen aufgezeigt. Darauffolgend werden die konzeptionellen Grundlagen eines ganzheitlichen Value Based Managements und die entsprechenden Dimensionen einer konsistenten Implementierung vorgestellt. Ein weiterer Fokus wird auf die Messung der Nachhaltigkeit im Unternehmen gelegt. Abschließend erfolgt eine Einbettung der vorgestellten Ansätze in die Ausgestaltung von Performance Management Systemen.</p>	<p>2 SWS</p>
<p>Lehrveranstaltung: Performance Management (Übung) <i>Inhalte:</i> Die Übung dient dazu die Konzepte der wertorientierten Unternehmensführung auf praktische Fragestellungen anzuwenden, indem Übungsaufgaben gelöst und die Inhalte an praktischen Beispielen diskutiert werden. Im Sinne eines breiteren Einstiegs beginnt die Übung mit einer Abgrenzung der verschiedenen Stakeholdergruppen, um sich im Folgenden stärker auf die Shareholder-orientierten Inhalte der Unternehmensbewertung und deren Eignung für ein wertorientiertes Steuerungssystem zu diskutieren. Daraufhin werden traditionelle Kennzahlenkonzepte vorgestellt und mögliche Nachteile aufgezeigt. Auf dieser Basis werden die methodischen Grundlagen von wertorientierten Kennzahlen erörtert und deren Potentiale aufgezeigt. Den Gedanken der Stakeholder Orientierung wieder aufnehmend werden die Eigenschaften von Nachhaltigkeitskennzahlen genauer betrachtet. Zum Abschluss wird die Eignung der ganzheitlichen Implementierung von Value Based Management diskutiert.</p>	<p>2 SWS</p>
<p>Prüfung: Klausur (90 Minuten)</p>	<p>6 C</p>
<p>Prüfungsanforderungen:</p>	

Nachweis von Kenntnissen der Konzepte, Dimensionen und Grenzen der Kapitalmarkt- und Bilanz-orientierten Performancemessung, des Value-Based Managements sowie von Nachhaltigkeitskennzahlen durch Nennen, Erläutern und Berechnen in entsprechenden Aufgaben. Außerdem das Anwenden des erworbenen Wissens auf praxisnahe Aufgabenstellungen.

<p>Georg-August-Universität Göttingen Module M.WIWI-BWL.0133: Banking Supervision</p>	<p>6 C 2 WLH</p>
<p>Learning outcome, core skills: After a successful completion of the course students are able to:</p> <ul style="list-style-type: none"> • understand and explain how banking supervision has developed over time and how it differs across jurisdictions, • understand, explain and critically apply standard measures and methods of banking supervision, • understand and explain the Euro area banking union, • understand, explain and critically apply key concepts in banking regulation, • understand, explain and critically apply key measures and methods to assess the risks of financial institutions, • understand and explain micro-and macroprudential supervision and their differences. 	<p>Workload: Attendance time: 28 h Self-study time: 152 h</p>
<p>Course: Banking Supervision (Lecture) <i>Contents:</i></p> <ol style="list-style-type: none"> 1. Introduction (e.g. banking structure) 2. Foundations of banking supervision <ul style="list-style-type: none"> • Historical developments • Comparison across different jurisdictions 3. Banking Union – SSM 4. Banking Regulation <ul style="list-style-type: none"> • Basel III, CRDIV/CRR • ASFR model by Gordy • Further requirements on banks 5. SSM Guide on banking supervision <ul style="list-style-type: none"> • How is banking supervision applied? 6. Risk Analysis <ul style="list-style-type: none"> • Stress testing • Bank Rating 7. Microprudential versus macroprudential supervision 	<p>2 WLH</p>
<p>Examination: Written examination (90 minutes)</p>	<p>6 C</p>
<p>Examination requirements:</p> <ul style="list-style-type: none"> • Document an understanding how banking supervision has developed over time and how it differs across jurisdictions • Demonstrate a profound knowledge of standard measures and methods of banking supervision • Show an understanding of the Euro area banking union • Demonstrate the ability to explain and to some extent to apply key concepts in banking regulation 	

<ul style="list-style-type: none"> • Document the knowledge to apply key measures and methods to assess the risks of financial institutions and to interpret the obtained results appropriately • Document an understanding of micro-and macroprudential supervision and their differences 	
Admission requirements: none	Recommended previous knowledge: M.WIWI-BWL.0001 Corporate Finance M.WIWI-BWL.0004 Financial Risk Management

Georg-August-Universität Göttingen		6 C 2 WLH
Module M.WIWI-BWL.0134: Panel Data Analysis in Marketing		
Learning outcome, core skills: Panel data refers to observations from different individuals or units (consumers, stores, products, etc.) over several time periods (days, weeks, months, etc.). After successful attendance the students will understand the methodological principles of panel data analysis, especially in the context of consumer behavior and marketing-mix models. Further, they will be able to conduct own panel data analyses using the statistical programming language R.		Workload: Attendance time: 28 h Self-study time: 152 h
Course: Panel Data Analysis in Marketing (Lecture with exercise) <i>Contents:</i> <ul style="list-style-type: none"> • Introduction to R • Refreshment in Regression Analysis • Fixed Effects Models in Marketing • Random Effects Models in Marketing • Dynamic Panel Models in Marketing 		2 WLH
Examination: Term Paper (max. 6000 words)		6 C
Examination requirements: A self-conducted empirical project. Students will be provided with empirical data, but are welcome to analyze own projects. Students are advised to use the statistical programming language R, but can be allowed to use different statistics software in exceptional cases. Theoretical, methodological and empirical elaboration of a selected topic in panel data analysis with focus on consumer behavior and/or marketing-mix modeling.		
Admission requirements: none	Recommended previous knowledge: Basics in Hypothesis testing & Regression analysis Previous knowledge in R is not required	
Language: English	Person responsible for module: Ossama Elshiewy

Maximum number of students: 25		

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.WIWI-QMW.0002: Advanced Statistical Inference (Likelihood & Bayes)		
Learning outcome, core skills: Upon completion of the module, the students have acquired the following competencies: <ul style="list-style-type: none"> • foundations and general properties of likelihood-based inference in statistics, • bayesian approaches to statistical learning and their properties, • implementation of both approaches in statistical software using appropriate numerical procedures. 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Advanced Statistical Inference (Likelihood & Baye) (Lecture) <i>Contents:</i> The likelihood function and likelihood principles, maximum likelihood estimates and their properties, likelihood-based tests and confidence intervals (derived from Wald, score, and likelihood ratio statistics), expectation maximization algorithm, Bootstrap procedures (estimates for the standard deviation, the bias and confidence intervals), Bayes theorem, Bayes estimates, Bayesian credible intervals, prior choices, computational approaches for Bayesian inference, model choice, predictions		2 WLH
Course: Advanced Statistical Inference (Likelihood & Bayes) (Exercise) <i>Contents:</i> The likelihood function and likelihood principles, maximum likelihood estimates and their properties, likelihood-based tests and confidence intervals (derived from Wald, score, and likelihood ratio statistics), expectation maximization algorithm, Bootstrap procedures (estimates for the standard deviation, the bias and confidence intervals), Bayes theorem, Bayes estimates, Bayesian credible intervals, prior choices, computational approaches for Bayesian inference, model choice, predictions		2 WLH
Examination: Written examination (90 minutes) or oral examination (approx. 20 minutes)		6 C
Examination requirements: The students demonstrate their general understanding of likelihood-based and Bayesian inference for different types of applications and research questions. They know about the advantages and disadvantages as well as general properties of both approaches, can critically assess the appropriateness for specific problems, and can implement them in statistical software. The exam covers contents of both the lecture and the exercise class.		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Thomas Kneib	
Course frequency: every year	Duration: 1 semester[s]	

Number of repeat examinations permitted: twice	Recommended semester: 1 - 2
Maximum number of students: not limited	
Additional notes and regulations: The actual examination will be published at the beginning of the semester.	

Georg-August-Universität Göttingen		6 C
Module M.WIWI-QMW.0004: Econometrics I		6 WLH
Learning outcome, core skills: This course enables students to approach empirical research problems within the framework of the linear regression model, including model specification and selection, estimation, inference and detection of heteroscedasticity and autocorrelation. Moreover, the students can apply the methods discussed to real economic data and problems using the statistical software package R and they are able to assess estimator properties (finite sample and asymptotic). This course enables students to access more advanced topics in econometrics.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Econometrics I (Lecture) <i>Contents:</i> The lecture covers the following topics: 1. Introduction to the basic multiple regression model, model specification, OLS estimation, prediction and model selection, Multicollinearity and partial regression. 2. The normal linear model, including maximum likelihood and interval estimation, hypothesis testing. 3. Asymptotic properties of the OLS and (E)GLS estimators. 4. Generalized linear model: GLS and EGLS estimators, properties of these, heteroskedastic and autocorrelated models, testing for heteroscedasticity and autocorrelation.		2 WLH
Course: Econometrics I (Exercise) <i>Contents:</i> The practical deepens the understanding of the lecture topics by applying the methods from the lecture to economic problems and data, and reviewing and intensify theoretical concepts.		2 WLH
Course: Econometrics I (Tutorial) <i>Contents:</i> The tutorials are small classes with max. 20 students, which give room for applying the concepts to specific problem sets and discussing questions, that students might encounter regarding the concepts addressed in the lecture and practical. A part of the tutorial are hands-on computer exercises using the software R. This enables students to conduct regression analysis in practice and prepares them for others (applied) courses.		2 WLH
Examination: Written examination (90 minutes)		6 C
Examination requirements: The students demonstrate their understanding of basic econometric concepts. They show that they can apply these concepts to real economic problems.		
Admission requirements: none	Recommended previous knowledge: Module B.WIWI-OPH.0006: Statistics and module B.WIWI-OPH.0002: Mathematics

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.WIWI-QMW.0005: Econometrics II		
Learning outcome, core skills: As the outcome of this advanced course the students are able to <ul style="list-style-type: none"> • identify problems of estimation and inference arising due to stochastic regressors, • establish finite sample and asymptotic properties of estimators under the assumption that the data generating process contains stochastic regressors, • model simple univariate stationary and non-stationary time series processes, • carry out and interpret test results of unit root and cointegration tests, • set up, and estimate (over-, under-) identified simultaneous equation models, • model simple multivariate time series with possible cointegration, • implement estimators and analyze real world datasets with the R programming language. 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Econometrics (Lecture) <i>Contents:</i> Stochastic regressors in linear econometric models; OLS, IV, 2SLS, GMM estimators; Dynamic linear econometric models: stationary stochastic processes, ARMA models, (testing) unit roots, (testing) cointegration, spurious regression; Simultaneous equation models: Identification, estimation (GLS, IV, 2SLS, 3SLS, ILS) Vector autoregressive and error correction models: Interpretation, estimation, inference.		2 WLH
Course: Econometrics II (Exercise) <i>Contents:</i> Exercises deepening concepts from the lecture, and demonstrating practical applications. Simulations and data analysis exercises using the R programming language.		2 WLH
Examination: Written examination (90 minutes)		6 C
Examination requirements: The students demonstrate their understanding of advanced econometric concepts. They show that they can apply these concepts to real economic problems.		
Admission requirements: none	Recommended previous knowledge: M.WIWI-QMW.0004 Econometrics I

Georg-August-Universität Göttingen		6 C
Module M.WIWI-QMW.0009: Introduction to Time Series Analysis		4 WLH
Learning outcome, core skills: The students: <ul style="list-style-type: none"> • learn concepts and techniques related to the analysis of time series and forecasting, • gain a solid understanding of the stochastic mechanisms underlying time series data, • learn how to analyse time series using statistical software packages and how to interpret the results obtained. 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Introduction to Time Series Analysis (Lecture) <i>Contents:</i> Classical time series decomposition analysis (moving averages, transformations of time series, parametric trend estimates, seasonal and cyclic components), exponential smoothing, stochastic models for time series (multivariate normal distribution, autocovariance and autocorrelation function), stationarity, spectral analysis, general linear time series models and their properties, ARMA models, ARIMA models, ARCH and GARCH models.		2 WLH
Course: Introduction to Time Series Analysis (Tutorial) <i>Contents:</i> Practical and theoretical exercises covering the content of the lecture. Implementation of time series models and estimation by common statistical software (e.g. R or Matlab). Interpretation of estimation results.		2 WLH
Examination: Written examination (90 minutes)		6 C
Examination requirements: The students show their ability to analyze time series using specific statistical techniques, can derive and interpret properties of stochastic models for time series, and can decide on appropriate models for given time series data. The students are able to implement time series analyses using statistical software and to interpret the corresponding results. The exam covers contents of both the lecture and the exercise class.

3 - 4

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.WIWI-VWL.0001: Advanced Microeconomics		
Learning outcome, core skills: This course covers advanced microeconomic models. In this regard students are provided with the skills required to understand these models including advanced methods of calculus and basic proof techniques. Students learn how to formalize and analyze individual decision making and strategic interactions. They will get acquainted with models of individual choice under certainty and uncertainty. Students will be able to analyze decision problems of firms. They can distinguish between partial analysis of isolated markets and a general analysis considering mutual dependencies of markets. Finally, students will be able to formalize strategic interactions and to predict their theoretical outcomes based on a variety of solution concepts.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Advanced Microeconomics (Lecture) <i>Contents:</i> This course presents a formal treatment of microeconomic theory. <ol style="list-style-type: none"> 1. Rational choice under certainty 2. Consumer theory 3. Rational choice under uncertainty 4. Partial equilibrium 5. General equilibrium 6. Game theory 		2 WLH
Course: Advanced Microeconomics (Exercise) <i>Contents:</i> The exercise deepens the understanding of concepts presented in the lecture. Students will receive problem sets, which they are requested to prepare at home. The solutions of these problem sets will be discussed in class.		2 WLH
Examination: Written examination (90 minutes)		6 C
Examination requirements: <ul style="list-style-type: none"> • Demonstrate the capability to understand advanced economic models • Demonstrate the understanding of the main concepts of individual choice theory • Apply techniques developed in the lecture and in the exercise such as the method of Lagrange multipliers or the Edgeworth Box • Demonstrate the basic knowledge of the theory of partial and general equilibrium • Prove the ability to solve analytical exercises • Find the game theoretical solutions to strategic interactions • Conduct advanced calculations 		
Admission requirements: none	Recommended previous knowledge: BA level microeconomics and mathematics

Module M.WIWI-VWL.0092: International Trade	4 WLH

<p>Learning outcome, core skills:</p> <p>After a successful completion of the course students have achieved following competences:</p> <ul style="list-style-type: none"> • give an overview of the core theoretical concepts explaining international trade patterns by means of various sources of trade flows like different technologies or factor endowments, • understand and apply the concepts of comparative and absolute advantage, • analyze the effects of international trade on the trading partners with respect to (i) their production and overall welfare, (ii) the reallocation of resources in the production process, (iii) the change in nominal factor prices, and (iv) on changes in the purchasing power of consumers, • evaluate and critically reflect the gains and losses of international trade, • evaluate the consequences of different trade policies like tariffs and subsidies, • understand, summarize, and critically assess recent approaches to explain international trade patterns that are observed today based on scientific publications. 	<p>Workload:</p> <p>Attendance time: 56 h</p> <p>Self-study time: 124 h</p>
--	--

<p>Course: International Trade (Lecture)</p> <p><i>Contents:</i></p> <ol style="list-style-type: none"> 1. The Ricardian model Mathematical and graphical analysis of the trade equilibrium in a neoclassical model explaining inter-industry trade with one production factor and (i) two goods, as well as (ii) a continuum of goods. Analysis of the trade effects on production and consumption, wages and overall welfare gains from trade. 2. The Heckscher-Ohlin model Mathematical and graphical analysis of the trade equilibrium in a neoclassical model with two production factors. Analysis of trade effects on production and consumption, factor prices, and of distributional effects as implied by the Stolper-Samuelson Theorem. Analysis of the effects of changes in resource endowments as implied by the Rybczynski Theorem. Empirical test of the Heckscher-Ohlin model. 3. The neoclassical trade model in higher dimensions Generalization of the Heckscher-Ohlin model to many production factors and goods by means of the Heckscher-Ohlin-Vanek model. Empirical test of Heckscher-Ohlin-Vanek model. Derivation of the specific-factors model with more production factors than goods and analysis of changes in goods prices and factor endowments. 4. Imperfect competition in international trade Mathematical and graphical analysis of the Krugman model with increasing returns to scale and monopolistic competition as an explanation of intra-industry trade. Non-formal extensions of the Krugman model with (i) consumer CES preferences and (ii) heterogeneous technologies across firms, and the Melitz model. Formal 	2 WLH
--	-------

<p>derivation of the empirical Gravity equation based on the monopolistic competition model.</p> <p>5. Trade policy under perfect competition Graphical analysis of the introduction of tariffs and quotas to the trade equilibrium under perfect competition on economic welfare. Analysis of partial and general equilibrium effects.</p> <p>6. Trade policy under imperfect competition Graphical analysis of the introduction of tariffs and quotas to the trade equilibrium under monopolistic market power on economic welfare. Formal derivation of the median voter model to analyze political decisions on the usage of trade policies.</p> <p>7. Project work Recent empirical and theoretical contributions from the academic literature on international trade within the frame of student presentations.</p>	
<p>Course: International Trade (Exercise) <i>Contents:</i> In the accompanying practice session students deepen and broaden their knowledge from the lectures.</p>	2 WLH
<p>Examination: Written examination (90 minutes) Examination prerequisites: Presentation of a group work (approx. 20 min)</p>	6 C
<p>Examination requirements:</p> <ul style="list-style-type: none"> • Demonstrate a profound knowledge of the core theoretical concepts in international trade, • show the ability to analyze the welfare and distributional effects of international trade by means of graphical and mathematical tools, • show the ability to analyze the effects of trade policies, • students should be able to assess the theoretical models with respect to empirical applications.

Georg-August-Universität Göttingen Module M.WIWI-VWL.0128: Deep Determinants of Growth and Development	6 C 2 WLH
Learning outcome, core skills: After a successful participation, students have a deeper understanding of the mechanisms that lead to long-run economic growth and development. They learn about the forces that are linked to economic development like governance, corruption, institutions, democracy, inequality, culture, and social capital.	Workload: Attendance time: 28 h Self-study time: 152 h
Course: Deep Determinants of Growth and Development (Lecture) <i>Contents:</i> In this course, we will study long-run trends in economic development. We will analyze questions such as <ul style="list-style-type: none"> • Why are some countries richer than others? • Why is a country today richer than several generations ago? • How can historical events affect the economy today? • What are the mechanisms that lead to the transition from stagnation towards sustained growth? Contents: <ol style="list-style-type: none"> 1. Governance 2. Property Rights 3. Inequality 4. Institutional Change 5. Culture and Social Capital Literature: The course is based upon selected research articles. Further information on the relevant literature is announced in the syllabus.	2 WLH
Examination: Oral exam (ca. 20 minutes) or written exam (90 minutes)	6 C
Examination requirements: Demonstrate: <ul style="list-style-type: none"> • a profound knowledge of the deep determinants of long-run development, • a deep understanding of the fundamental causes and consequences of long-run economic growth, • the ability to solve problems in a verbal, graphical and analytical manner. 	
Admission requirements: none	Recommended previous knowledge: Macroeconomics, Mathematics for Economists, Economic Growth, Econometrics as taught in the Bachelor courses

Language: English	Person responsible for module: Prof. Dr. Holger Strulik
